

Please do not interfere, I trade forex for a hobby, have been studying it and enjoying it for many years, and now it seems as always people want to interfere and change things.

Please, please, please stay away, go and make changes to the real things in the world that really do need addressing.

Here is a hint - the squandering and the free reign the Governments have with our taxes and Pensions, oh, and dare I mention banks, these areas have lost me more money than any trade I have made from a trading account / Broker.

Please Butt out.

Thank you  
Peter Marsh.
