

To Whom It May Concern:

In regards to your proposed ruling of limiting leverage to 1.5 to 1.0, I think this is totally uncalled for. You propose this in order to "protect investors" but you're really eliminating any small investor from being profitable and able to trade the forex market. Small investors don't have tons of capital to trade with like the big investors do. This ruling seems to be on the basis of protecting us from ourselves, which we don't need or want. We are responsible adults and our capitalistic investment abilities shouldn't be restricted in this manner!

Thank you for hearing my concern.

Sincerely,

Terry Lyon
