Background and Discussion

Currently, under FINRA Rules 6730(c)(2) and (d)(2), firms must report the size of transactions in TRACE-eligible securities,³ including certain ABS, by reporting the total par or principal value of the debt securities traded. However, in a transaction in an ABS that is backed by mortgages or other assets that amortize over the life of the security (*i.e.*, an amortizing ABS), instead of reporting the total par or principal value, a firm reports two items from which the size is calculable: (1) the original face value of the transaction; and (2) the factor, but only if the factor used to execute the transaction is not the most current factor that is publicly available at the time of execution of the transaction (a non-conforming factor).⁴

FINRA amended FINRA Rule 6730(d)(2) to modify the requirement for reporting the size of a limited number of ABS transactions and to restate the current requirements. The modified requirement is set forth in FINRA Rule 6730(d)(2)(B)(iv) and requires a firm to report the factor to TRACE for every transaction in an ABS (except TBA transactions) in the limited instances when the firm effects that ABS transaction as agent and charges a commission. The amendment is necessary to ensure the accuracy of the disseminated price of an ABS transaction,⁵ which, if traded on an agency basis and subject to a commission charge, is calculated using the factor, the price and other information reported by a firm that is party to the transaction.

FINRA also restated the current requirements of FINRA Rule 6730(d)(2) as paragraphs (d)(2)(A), (d)(2)(B)(i), (d)(2)(B)(ii) and (d)(2)(B)(iii). Paragraph (d)(2)(A) restates the current requirement that a firm report the total par value or principal value of a transaction in a TRACE-eligible security, except an ABS transaction. Paragraph (d)(2)(B), which applies to ABS transactions, restates the current requirements that a firm report:

- ▶ in paragraph (d)(2)(B)(i), for an ABS transaction traded TBA, the original face value of the security;
- ▶ in paragraph (d)(2)(B)(ii), for a transaction in an amortizing ABS (other than a TBA transaction), the original face value of the security and, if a member used a factor to execute the transaction that was not the most current factor publicly available at the time of execution, also the factor (except for those ABS transactions executed in agency capacity and subject to the new requirement in FINRA Rule 6730(d)(2)(B)(iv)); and,
- ▶ in paragraph (d)(2)(B)(iii), for a transaction in an ABS not subject to amortization, the total par value, principal value or original face value (except for those ABS transactions executed in agency capacity and subject to the new requirement in FINRA Rule 6730(d)(2)(B)(iv)).
