## Introduction

The FINRA Trade Reporting and Quotation Service (TRAQS™) is a new system currently being developed by FINRA. TRAQS will consolidate the various fixed income and equity reporting facilities FINRA currently maintains (e.g., TRACE, ADF, OTC Equity Reporting, etc) into a single platform. The new TRAQS web interface will offer member firms enhanced reporting and data retrieval functionality.

Note: TRAQS does not replace TRACE as the primary FINRA fixed income trade reporting facility. TRACE will continue to exist and support firms for their fixed income reporting capabilities. TRAQS is merely the core system which consolidates FINRA transaction activity.

The TRAQS Download site supports client needs via Web Application Programming Interface (API) to download daily lists, security master files and files of authorized participants.

FINRA will implement the various 'products in phases, starting with Securitized Products (SP)<sup>1</sup>. This document outlines the parameters and values for each available SP file. The data in each of these files is current as of the time of download.

## Access to the file domain

SP file downloads use the NASDAQ Web Security Framework (NWSF) for authentication (proper client authorization for access to particular files must be in place). In order to access the site and download files, a user needs to present a valid NWSF account/password and client certificate with access to the application.

The Security Masters, Daily Lists and Participant Lists are maintained by FINRA Operations. For questions concerning the data in these files, or to subscribe to receive these files, please contact FINRA Operations at (866) 776-0800 or [FINRAOperations@finra.org](mailto:FINRAOperations@finra.org). For technical questions or issues accessing the files, please contact FINRA Product Management at (866) 899-2107 or [ProdMgmtTransparencySvcs@finra.org](mailto:ProdMgmtTransparencySvcs@finra.org).

---

<sup>1</sup> As stated in Regulatory Notice 10-55 (October 2010), effective May 16, 2011, member firms will be required to report trades in asset-backed securities, mortgage-backed securities and other similar securities, collectively defined hereinafter as Securitized Products (SP), to TRACE.

## Protocol

FINRA's TRAQS download site provides access to files using standard HTTP Secure (https) protocol. It is a combination of the Hypertext Transfer protocol and the SSL/TLS protocol to provide encrypted communications and secure identification. The URL <https://download.finratraqs.org> is the domain where the files reside. In order to access file reference data users should refer to the query string detailed on page 4 of this specification. Examples of actual download query strings are available on page 10 of this specification.

## File availability – all times are approximate

<b>File</b>	<b>Time</b>
Start of day security master files	7:00 a.m. ET
Security master and daily list updates	Beginning at 8:00 a.m. ET and continuing throughout the day – near real-time
Final possible security master and daily list updates	8:00 p.m. ET

Users may attempt to access the files on non-business days; however, due to server maintenance which occurs on weekends and other non-business days it is possible the user will not have immediate success in access the data during these days.

## URL Parameters

Parameter	Parameter Options

Note 1: All requests are categorized and recorded. When a DELTA request is made, the time of the previous request is used to determine the items that appear in the DELTA results. The time used for the previous request is the time of request minus five minutes. This ensures that no updates are missed but it can mean items from a previous request may appear in the next DELTA request. Systems should be coded with this in mind.

## Example Requests

### *Ex 1 - Get the current TRACE Participant List*

This request retrieves the current list of TRACE authorized Participants:

<https://download.finratraqs.org/DownloadHandler.ashx?action=DOWNLOAD&file=PARTICIPANT&facility=TRACE>

### *Ex 2 - Get the TRACE Participant Daily List for 5/16/2011*

This request retrieves the list of changes to TRACE authorized Participants published on 5/16/2011 (*note 5/6/2011 is used as an example. Any specific date may be used*):

<https://download.finratraqs.org/DownloadHandler.ashx?action=DOWNLOAD&file=PDAILYLIST&facility=TRACE&day=5/16/2011>

### *Ex 3 - Get today's TRACE Participant Daily List (no day provided)*

This request retrieves the current day's cumulative list of changes to TRACE authorized Participants:

<https://download.finratraqs.org/DownloadHandler.ashx?action=DOWNLOAD&file=PDAILYLIST&facility=TRACE>

### *Ex 4 - Get changes to the TRACE Participant Daily List since the last download (no day provided)*

This request retrieves the latest list of changes to TRACE authorized Participants since the last user download of the Participant List:

<https://download.finratraqs.org/DownloadHandler.ashx?action=DELTA&file=PDAILYLIST&facility=TRACE>

### *Ex 5 - Get the current SP CMO Security Master file*

This request retrieves the current list of all CMO Securities for Securitized Products:

<https://download.finratraqs.org/DownloadHandler.ashx?action=DOWNLOAD&file=CMOMASTER&facility=TRACE>

### *Ex 6 - Get the current SP Fannie Mae Security Master file*

This request retrieves the current list of all Fannie Mae MBS Securities:

<https://download.finratraqs.org/DownloadHandler.ashx?action=DOWNLOAD&file=MBSFNMA&facility=TRACE>

*Ex 7 - Get today's SP Daily List (no day provided)*

This request retrieves the current day's cumulative list of changes to all the Securitized Products Security Masters (ABS, CMO, MBS and TBA data is contained in one file):

<https://download.finratraqs.org/DownloadHandler.ashx?action=DOWNLOAD&file=DAILYLISTSP&facility=TRACE>

## Programmatic Access (C#, .NET example)

The following is a code excerpt to illustrate how to use the MPP Download site programmatically. If you are going to access the site with an application the first step is to download the NWSF client certificate using your web browser. Install it in the browser then export the certificate from the browser, saving the certificate to a location on the machine as an X905 certificate (.cer).

### *Example using the TBA Security Master:*

```
string Action = "DOWNLOAD";
string file = "TBAMASTER";
string facility = "TRACE";

string site = "https:// download.finratraqs.org/DownloadHandler.ashx";
string query = string.Format("{0}?action={1}&file={2}&facility={3}", site,
                             Action, file, facility);

// Create request
HttpWebRequest webRequest = WebRequest.Create(query) as HttpWebRequest;

// Get cert and add to request
X509Certificate Cert =
    X509Certificate.CreateFromCertFile("C:\\MPP\\cert\\mpp_cert.cer");

webRequest.ClientCertificates.Add(Cert);
webRequest.Method = "GET";

// Add nwsf user/password to request

NetworkCredential nwCredentials = new NetworkCredential("user", "pwd");
webRequest.Credentials = nwCredentials;

// Make the request
HttpWebResponse Response = (HttpWebResponse)webRequest.GetResponse();

// Fiddle with the header in the response to get the file name

int pos = Response.Headers["Content-Disposition"].IndexOf("TRACE");

string Filename = Response.Headers["Content-Disposition"].Substring(pos);

// Create a file to save it in ..
StreamWriter sw = new StreamWriter("C:\\MPP\\files\\" + Filename, false);

StreamReader sr = new StreamReader(Response.GetResponseStream(),
                                   Encoding.Default);

int cnt;
char [] ReadBuf = new char[1024];

while ((cnt = sr.Read(ReadBuf, 0, 1024)) != 0)
{
    sw.Write(ReadBuf);
}
```
