To whom it may concern:

In a word....."Bad" legislation. Why would you, your organization, or anyone try to impose your will on free enterprise? Especially now....We should wear the black eye for those who are irresponsible? You think what you are doing is protecting us? Would you like to pay my bills too? Write my checks, borrow the money for me, tell how much I can and can not invest and where?

This is ridiculous! I will write my congressmen and senators and strongly oppose this and your organization. I will call your office tomorrow to express my concerns for the "big brother" attitude your group has!
