About the Data Dictionary

- Referring to the table below, the rows of data shown on a white background are available to add to the main table within Dynamic Reports templates. The rows of data shown with a blue background are hierarchical and will appear in a subtable. The rows of data that are blue and white indicate the data point you will click on to expand the subtable.
- When you want to export data to a CSV file, you can include the main table (white rows) plus one subtable (blue rows). The export will flatten the hierarchy and present all data points in a single row.
- Sample values are listed for each field. If you want to know all the values available for a given field, you can use the Group tool in FINRA Gateway Reports and group by the given field. The grouped view will show you all values for that field available within your data at that point in time.
- If there is no data for a given field, it may show as "Missing" or "Other."
