CONFIDENTIAL

This specification is being forwarded to you strictly for informational purposes. It is solely for the purpose of developing or operating systems for your use that interact with FINRA's Over the Counter Trade Reporting Facility (ORF®) system. This specification is proprietary to FINRA. FINRA reserves the right to withdraw, modify, or replace the specification at any time, without notice. No obligation is made by FINRA regarding the level, scope, or timing of FINRA's implementation of the functions or features discussed in this specification. THE SPECIFICATION IS "AS IS", "WITH ALL FAULTS" AND FINRA MAKES NO WARRANTIES, AND DISCLAIMS ALL WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY RELATED TO THE SPECIFICATIONS. FINRA IS NOT LIABLE FOR ANY INCOMPLETENESS OR INACCURACIESOR FOR ANY CONSEQUENTIAL, INCIDENTAL, OR INDIRECT DAMAGES RELATING TO THE SPECIFICATIONS OR THEIR USE. It is further agreed by you by using this specification, that you agree not to copy, reproduce, or permit access to the information contained in, the specification except to those with a need-to-know for the purpose noted above. Copyright 2023, FINRA, as an unpublished work. All Rights Reserved.

1 Overview

1.1 Introduction

The Over the Counter Trade Reporting Facility (ORF) is a service of FINRA that supports on-line trade reporting of over the counter equity securities. In addition to last sale dissemination of eligible trades, the system also supports trade matching and forwarding to NSCC for clearing. Currently, FINRA members (or their designated third parties) are provided with the capability of submitting trade report information on over the counter equity securities through the use of the Financial Information eXchange Protocol (FIX) linkage.

The Eastern Time operating hours of the ORF system are as follows:

 System Open:
 8:00 A.M.

 Market Open:
 9:30 A.M.

 Market Close:
 4:00 P.M.

 System Close:
 8:00 P.M.

This document describes the new formats of the message text to be used to interface through the NASDAQ network to the FINRA application. Updates to this document will be chronicled in the Revision History section of this document.

For questions concerning FIX connectivity, please contact NASDAQ Technical Support at (212) 231-5180 or via email to: tradingservices@nasdaq.com. For questions concerning ORF trade reporting, please contact FINRA Client and System Management at: FINRA-TSCSM@finra.org.

 $^{^{\, 1} \,\,}$ All entries, including contra party Accepts and Declines, will not be allowed past 8:00pm ET.

2 FIX Protocol

The messaging described in this specification adheres to the standard FIX 4.4 protocol. Please refer to http://fixprotocol.org/specifications/FIX.4.4 for further details.

The interface follows the FIX specifications as far as possible. In the majority of cases the structure and semantics of the messages are identical to the standard.

In some cases, the protocol has been extended to cover functions not considered by the standard. These extensions are clearly detailed in the document. In other cases, the standard is ambiguous or indicates that the details should be bilaterally agreed between the parties. In these cases this manual provides a detailed description to avoid any possible ambiguity.

2.1 Supported Messages

2.1.1 Administrative messages

Logon (in/out)
Logout (in/out)
Sequence Reset (in/out)
Resend Request (in/out)
Reject (out)
Heartbeat (in/out)
Test Request (in/out)

2.1.2 Application Messages

Trade Capture Report (in)
Trade Capture Report (out)
Trade Capture Report Ack (out)

3 The FIX Session

The session layer conforms to the standard FIX session. Please see the standard FIX specification for additional details.

3.1 ComplDs

The Sender- and TargetCompID uniquely define the FIX session. A session can only be active (established) between two hosts simultaneously. Any attempts to establish a second FIX session using the same CompIDs (for instance to a backup gateway) in parallel will be rejected.

- The TargetCompID (56) on all *inbound* transactions must be set to "FNRA".
- The SenderCompID (49) on all outbound transactions will always be set to "FNRA".

The Sender- and TargetCompID used by the client are defined in a separate agreement.

3.2 SubIDs

For *inbound* transactrions:

- The TargetSubID (57) must be set to "ORF".
- The SenderSubID (50) must be set to the user ID defined in a separate agreement.

For *outbound* transactions:

- The TargetSubID (57) will be set to the user ID (same as inbound SenderSubID).
- The SenderSubID (50) will be set to "ORF".

3.3 Logon and authentication

At Logon, clients are identified by:

- CompIDs (SenderCompID and TargetCompID)
- IP Address

When the client is authenticated, the system responds with a Logon message to the client.

3.4 Heartbeat intervals

Heartbeat intervals are negotiated at Logon using the HeartBtInt (108) field. The system accepts a heartbeat interval set to 30 s

3.5 Encryption

The system does not support encryption.

3.6 Datatypes and required fields

This specification does not change the data type on any fields defined in the standard FIX specification. There may be places where this specification restricts the value range of a field further than specified in standard FIX. This will be clearly marked in the spec.

All fields listed in this specification that are marked as required in the standard specification, are required also in this specification. This document specifies additional fields as required by FINRA. These fields are marked with an 'F' in the required column of the message listings.

3.7 Character encoding

Standard FIX 7-bit US-ASCII character encoding is used.

3.8 FIX Timestamps

In FIX all timestamps are expressed in GMT/UTC. Please refer to the standard FIX specification for additional details.

3.9 Session lifetime

The FIX session lifetime is restricted to one trading day. The session lifetime is not ended at connectivity loss or even Logouts. The sequence numbers are reset to one each morning.

3.10 Failover and message recovery

At reconnect and Logon standard FIX message recovery is performed. All FIX sessions have at least one primary and one secondary gateway to which the session states are fully replicated. This means that regardless to which gateway a client connects, full message recovery is provided.

A client cannot have the same FIX session active towards multiple gateway instances simultaneously.

3.11 FIX Session Level Test Cases

This implementation is fully compliant with the session-level test cases specified in the standard FIX 4.4 Specification, Volume 2, section "FIX Session-level Test Cases and Expected Behaviors". The only exception is the encryption test cases.

3.12 Drop Copy Sessions

Drop Copy Sessions, or Drops, can be set up to mirror outbound traffic on one or more FIX sessions. All outbound Quote Status Reports will be seen on the Drop.

Drop Copy Sessions are separate FIX sessions from the sessions which it replicates. This means the Drop session will have its own CompIDs, so the copied messages will differ slightly from the originals. All copied messages will have the CopyMsgIndicator (797) tag set to "Y".

Note that this is an extension to standard FIX where only Execution Reports and Trade Capture Reports can be copied to a drop.

3.13 The Standard Header

All FIX messages contain a Standard Header. The header contains important information such as session identifiers (CompIDs), sequence numbers and message type and length etc.

3.13.1 Inbound Header

Tag	FIX Field name	Req'd	Comment
8	BeginString	Y	
9	BodyLength	Y	
35	MsgType	Y	
49	SenderCompID	Y	As specified in separate agreement
50	SenderSubID	F	Your User ID as defined in separate agreement.
56	TargetCompID	Y	Valid values: "FNRA"
57	TargetSubID	F	Valid values: "ORF"
34	MsgSeqNum	Y	
43	PossDupFlag		Always required for retransmitted messages
97	PossResend		
52	SendingTime	Y	Time of message transmission (always expressed in UTC (Universal Time Coordinated, also known as "GMT"))
115	OnBehalfOfCompID		If present, this MPID will be passed to the ORF

		application. If not present, the value in Tag 49 will be passed to the application. This allows you to use multiple MPIDs through a single connection. For Service Bureaus, if you are sending this message on behalf of your customer, their 4-character MPID is placed here. For both Broker Dealers and regular connections, you can use this field to submit your customer's MPID. This value will be returned to you in Tag 128 on the outbound message. Please note that while it is possible for you to submit a chain of transactions with inconsistent values for this tag in different messages, you are strongly advised not to do so.
116	OnBehalfOfSubID	For both Broker Dealer and regular connections, you can use this field to submit your customer's I1I2 (assigned by NASDAQ upon agreement). This value will be returned to you in Tag 129 on the outbound message. Please note that while it is possible for you to submit a chain of transactions with inconsistent values for this tag in different messages, you are strongly advised not to do so.
122	OrigSendingTime	Required when PossDupFlag is set to Yes (43=Y).

3.13.2 Outbound Header

Tag	FIX Field name	Req'd	Comment
8	BeginString	Y	
9	BodyLength	Y	
35	MsgType	Y	
49	SenderCompID	Y	Set to "FNRA"
50	SenderSubID	F	Set to "ORF"
56	TargetCompID	Y	As specified in separate agreement
57	TargetSubID	F	Your User ID as defined in separate agreement.
34	MsgSeqNum	Y	
43	PossDupFlag		Always required for retransmitted messages
97	PossResend		
52	SendingTime	Y	Time of message transmission (always expressed in UTC (Universal Time Coordinated, also known as "GMT"))
122	OrigSendingTime		Required when PossDupFlag is set to Yes (43=Y).
			Your MPID as stated in Tag 115 in the inbound message
128	DeliverToCompID		is returned to the service bureau in this tag.
129	DeliverToSubID		Your III2 as stated in Tag 116 in the inbound message is returned to the service bureau in this tag.

3.14 The Standard Trailer

All FIX messages end with a Standard Trailer. The trailer only includes a simple checksum field. The details on how to calculate the checksum can be found in the standard FIX specification.

Tag	FIX Field name	Req'd	Comment
10	CheckSum	Y	

3.15 Message Details

3.15.1 How to interpret the Required (Req'd) column

A 'Y' marks the field as required in standard FIX (and of course also in this implementation). An 'F' means that the field is required in this implementation although it is not required in standard FIX. No entry at all means the field is optional.

3.15.2 Default values

Fields which has enumerated values, where one is marked as "default value" need not be included in the message at all if the default value is used.

3.15.3 Logon – inbound to FINRA

The response to a logon is either a Logon, which denotes a successful logon, or a Logout.

A client must be prepared to handle failure scenarios including (but not limited to):

A Logon attempt may fail or be rejected for several reasons. The FIX gateway will react differently depending on the kind of failure. The two different actions it may take are:

Silently ignore the Logon.

- If the wrong Sender or Target CompID is specified.
- For other reasons specified in the standard FIX specifications.

Respond with a Logout.

- If the FIX gateway has no connection with the back-end system.
- Logon failure for other reasons than authentication/security.

The Logout response to a Logon will always contain a note on why in the Text (58) field.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = A
98	EncryptMethod	Y	Encryption not supported.
			Valid values:
			0 = None / Other
108	HeartBtInt	Y	Heartbeat interval. Valid value: 30 s
	Standard Trailer	Y	

3.15.4 Logon – outbound from Marketplace

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = A
98	EncryptMethod	Y	Encryption not supported. Valid values: 0 = None / Other
108	HeartBtInt	Y	Heartbeat interval. Valid value: 30 s
	Standard Trailer	Y	

3.15.5 Logout (in/out)

The Logout message is used to gracefully disconnect a FIX session. When receiving a Logout, the counterparty should respond with a Logout. A Logout can also be the response to an unsuccessful Logon attempt.

Tag	FIX Field name	Req'd	Comment	
	Standard Header	Y	MsgType = 5	
58	Text		Free text	
	Standard Trailer	Y		

3.15.6 Sequence Reset (in/out)

This message has two uses. The common usage is with GapFillFlag set to 'Y', which is used in a response to a Resend Request to indicate that a range of messages will not be resent. This is commonly used to avoid resending administrative messages like Heartbeats.

The other (very rare) usage is to reset the sequence numbers to a higher number to get out of a deadlock. This

is only triggered by manual intervention.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = 4
123	GapFillFlag		Indicates that the Sequence Reset message is replacing administrative or application messages which will not be resent.
36	NewSeqNo	Y	New sequence number. The next Sequence Number to be expected after this message.
	Standard Trailer	Y	

3.15.7 Resend Request (in/out)

Resend Request is used to recover messages when a sequence number gap has been detected.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = 2
			Message sequence number of first message in range to be
7	BeginSeqNo	Y	resent
			Message sequence number of last message in range to be
			resent. If request is for a single message BeginSeqNo (7) =
			EndSeqNo. If request is for all messages subsequent to a
16	EndSeqNo	Y	particular message, EndSeqNo = "0" (representing infinity).
	Standard Trailer	Y	

3.15.8 Reject (out)

The Reject, or session-level reject, message is sent whenever the FIX gateway is able to at least partially parse the message, but the message does not adhere to the specification and cannot be delivered to the backend system.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = 3
572	TradeReportRefID	Y	TradeReportID (Tag 571) of rejected message
45	RefSeqNum	Y	MsgSeqNum of rejected message
371	RefTagID		The tag number of the FIX field being referenced.
372	RefMsgType		The MsgType of the FIX message being referenced.
373	SessionRejectReason	F	Valid values: 0 = Invalid Tag Number 1 = Required Tag Missing 2 = Tag Not Defined For This Message Type 3 = Undefined Tag 4 = Tag Specified Without a Value 5 = Value Is Incorrect Out Of Range For This Tag 6 = Incorrect Data Format For Value 9 = CompID Problem 10 = Sending Time Accuracy Problem 11 = Invalid Msg Type 99 = Other
58	Text		Where possible, message to explain reason for rejection
	Standard Trailer	Y	

3.15.9 Heartbeat (in/out)

A heartbeat message is sent at the interval set at Logon. It is also the response to a Test Request message.

Tag	FIX Field name	Req'd	Comment	
	Standard Header	Y	MsgType = 0	
			Required when the heartbeat is the result of a Test	
112	TestReqID		Request message.	
	Standard Trailer	Y		

3.15.10 Test Request (in/out)

Test Request is used to "ping" the counterparty whenever a heartbeat has not arrived at the negotiated heartbeat interval.

Tag	FIX Field name	Req'd	Comment	
	Standard Header	Y	MsgType = 1	
			Identifier included in Test Request message to be returned	
112	TestReqID	Y	in resulting Heartbeat	
	Standard Trailer	Y		

4 General Trade Reporting in FIX

4.1 Introduction

Trades may, subject to regulations or bilateral agreement, be reported to the marketplace in the following cases:

- Trades negotiated between market participants without using execution mechanisms provided by the Marketplace
- Trades formed at other execution venues but reported to the marketplace for regulatory or publication reasons. Such execution venues may include (systematic) internalizers, ECN's, ATS's, and others regulated markets.

4.2 Trade Capture Report Processing

Trade Capture Reports (TCR) have two related purposes; to confirm trades and reporting of privately negotiated trades. Usage of tags differ slightly depending on the purpose of the message:

The confirmed Trade:

Identifier: TradeID

Action: TradeReportType

The process of confirming a trade:

Identifier: **TradeReportID**. Each actor issues their own id for every message sent (excluding TCR Ack messages). To reference a previous message, the **TradeReportRefID** tag is used.

- An initiator always uses TradeReportRefID when referring to a previous report.
- The marketplace uses TradeReportRefID in confirmed trades to reference external actors previous TradeReportIDs.

Action: TradeReportTransType

4.3 As-Of Trades

In FIX, an As-Of Trade is submitted by setting the TradeDate field to the date when the trade occurred and setting the AsOfIndicator (1015) to 1. An original T Date Trade is reported by setting TradeDate to the current date and setting the AsOf Indicator to 0 or omitting the tag.

For As-Of Reporting beyond T+365, Tape Only or No Tape and No Clearing designations may be submitted on trade entry. For As-Of Reporting beyond T+365 where the client publish indicator = 'Y', the trade must be suppressed from dissemination (Publish Indicator must be set to "N"). For As-Of Reporting beyond T+365 the clearing number is required and must be a valid NSCC clearing number on report date and a valid relationship on Trade Date.

As-of trade reports with an execution date that is a non-business date must be submitted as non-clearing and may be published or non-published. Non-business dates are considered to be weekend days and any day the US markets are closed. If the Publish Indicator is "Y" and the trade is executed on a non-business day, the trade must be appended with the "outside normal market hours" modifier in Trade Modifier 3.

If the Publish Indicator is 'Y', and the trade is executed on a non-business day, the trade must be reported by 8:15 a.m. the next business day following execution. Trades not reported by this time must be appended with the "outside normal market hours reported late" modifier in Trade Modifier 3.

4.4 Reversals

The FINRA reporting facility system is designed to retain 4 business days of trade report data, inclusive of

the current day (T date through T minus 3), on a rolling basis. A deletion of a previously reported trade submitted prior to this rolling T-3 day period is allowed via submission of a *Reversal*. This message is used to cancel a trade entry which was originally reported prior to T-3, including trades submitted prior to the migration of the ORF from ACT to the new technological platform. A Reversal must contain all the values submitted in the original Trade, including the Side code (Buy or Sell) that was originally submitted. See section 5.1.3 for message details. To correct a trade entry which was originally reported prior to T-3, a Reversal, followed by an As-Of Trade with the correct trade details, are required.

Reversals are also used to support the cancellation of a trade originally reported to another FINRA reporting facility (e.g., ADF, FINRA/NYSE TRF, FINRA/NASDAQ TRF Carteret, FINRA/NASDAQ TRF Chicago) in the event the security has moved from one market place to another (e.g., listed to unlisted). The reversal message layout includes a field that indicates which reporting facility the trade was originally reported. This supports proper audit trail processing of historical reports. Note that in these cases, the Original Control Number must be a 10-digit "dummy" number that starts with the digit "5", followed by all zeros (e.g., 5000000000).

4.5 Identifiers

4.5.1 Trade Report ID

The TradeReportID (571) is similar to the ClOrdID used for orders and executions. A unique Trade Report ID assigned by the reporting executing broker/dealer must be set on all reported trades (TCR) inbound to the marketplace. There is one important exception to the analogy of ClOrdIDs. The marketplace sets its own TradeReportIDs on outbound TCRs (like confirmed trades).

4.5.2 Trade Report Reference ID

The TradeReportRefID (572) is used to refer to a previous TCR. The marketplace, which sets its own TradeReportIDs on outbound trade confirmations, uses the TradeReportRefID to reference *the submitters TradeReportID* from the original trade report, for example on confirmations to reported trades.

4.5.3 Trade ID (aka FINRA Control Number)

TradeID (1003) is a FINRA extension to FIX 4.4. TradeID carries the ten digit FINRA Control Number assigned to the trade upon acceptance. All Control Numbers shall start with the digit "5" followed by nine digits (numeric) representing the incremental sequence number of the trade. All Control Numbers will be unique within a given day.

4.5.4 Original Trade ID

OrigTradeID (1126) is a FINRA extension to FIX 4.4. OrigTradeID carries the ten digit FINRA control number referenced on Corrections and Reversals.

4.5.5 Firm Trade ID

FirmTradeID (1041) contains the internal ID assigned to a trade by the reporting party (Client Trade Identifier). Must not exceed 20 characters. A firm can use their Client Trade Identifier to subsequently Cancel or Correct a trade (in lieu of Trade ID/FINRA Control Number. Control Date would still be required). If used, firms must ensure uniqueness of their reference numbers every day.

4.5.6 Secondary Firm Trade ID

SecondaryFirmTradeID (1042) is a FINRA Extension to FIX 4.4. It contains the internal ID assigned to a trade by the contra side (Contra Client Trade Identifier). This field can only be submitted on Locked-In (AGU/QSR), Customer and Cross trades.

4.5.7 Party Identifiers

There may be many parties involved in a trade. In FIX, the identifiers and roles of each party is defined in the Parties block. The Parties block is a repeating group of identifiers which can carry an unlimited number of parties and their roles. The Parties block consists of the following fields:

Tag	FIX Field name	Comment	
453	NoPartyIDs	Number of parties included in the message	
		The actual identifier of the party. In this case always the 4	
		character MPID on interdealer trades. On Customer trades,	
448	PartyID	the contra party must be submitted with the value C.	
		Defines the type of the identifier used as PartyID. In this	
		solution always C = Generally accepted market participant	
447	PartyIDSource	identifier (e.g. FINRA mnemonic)	
452	PartyRole	Defines the role of the current party.	

The last three fields listed above are required for each party.

The following party roles are supported:

Party Role	Comment			
	MPID of the Giveup Firm, when applicable. A Uniform Service			
	Bureau/Executing Broker Agreement (Attachment A of the Agreement)			
	must be in place in order for firms to submit trade reports on behalf of			
Giveup Firm	their give ups.			
Executing Firm	MPID of Reporting party (owner of the trade report).			
	Clearing Firm ID Number assigned by the NSCC. Not really a party but			
	treated as such in FIX. If not submitted on the reporting side, will default			
	to the primary clearing number for the reporting party. On Locked-In			
Clearing Firm	trades, may be submitted on both the reporting and the contra side, else			
Number	will default to the primary clearing firms of both sides.			
	MPID of Contra party or "C" to denote the contra is a non-FINRA			
	member (Customer trade). An AGU or QSR trade can be submitted as a			
	Locked-in trade provided the reporting party has Uniform Service			
Contra Firm	Agreement with the contra party.			

In addition to the above three main party identifier fields, there is also a Parties Sub identifier group that may be added to certain parties. This group contains the following fields:

- **NoPartySubIDs** (802) Number of Party sub identifiers. In this solution always set to 1 if present.
- **PartySubID** (523) The actual Party Sub Identifier. In this solution only used for identifying a branch office of a reporting party or a contra party (Contra party branch office may only be submitted on Locked-In trades). Maximum of 8 alphanumeric characters allowed.
- **PartySubIDType** (803) Type of sub identifier. In this solution always set to 24 = Department. The Parties sub identifiers are only allowed to be attached to the reporting party or to the contra party (on Locked-In trades). These fields are optional.

In this solution the Trade Capture Reports contains one set of parties for each Side (Buy/Sell) of the trade. The parties are found in the repeating group called TrdCapRptSideGrp. This group will always contain two sides (NoSides = 2), one buy and one sell². Each of these contains a Parties repeating group.

- The reporting side (buy or sell) *must* contain a PartyID with PartyRole = Executing Firm.
- The contra side (opposite of reporting side) *must* contain a PartyID with PartyRole = Contra Firm.

For Cross trades (Tag 54 Side = 8), the reporting and contra sides must be the same and must both be submitted, therefore the NoSides must also be set to "2".

² The exception is Trade Cancels, which only contains one side (the reporting side).

The field Reporting Obligation (Tag 22030) is a FINRA required field that allows the submitter of the trade report to identify whether or not they are the party that has the responsibility to report the trade, as defined in FINRA Rule $6622(b)^3$. For the purpose of reporting Step-Outs/ Step-Ins, the firm stepping-out (transferring the position out) must always populate the Reporting Obligation Flag with a 'Y' value, and the firm stepping-in (receiving the shares in) must always populate the field with an 'N' value. The rule for Step-Outs includes Special/Step-Out, Step-Out with Fees and Special/Step-Out with Fees. The rule for Step-Ins includes Special/Step-In.

Cross trades and Customer trades may never be submitted with the Reporting Obligation value of "N", they must always be submitted with the value "Y".

On trades where the firm submitted Publish Indicator = Y, the Reporting Obligation must also = Y.

PartyIDs with other Party Roles may be added as necessary to both sides.

4.5.8 Trades reported by a Service Bureau

In order to report trades as a Service Bureau, you would need to utilize the "On Behalf Of" FIX functionality. In the header of the message, you must include Tags 115 (OnBehalfOfCompID) and 116 (OnBehalfOfSubID). Tags 128 (DeliverToCompID) and 129 (DeliverToSubID) will be returned in the outbound messages to you. You will set up a standard FIX session with your MPID. For additional clients, the port will be turned into a service bureau port and client connections can be added to it. In order for you to send trade reports on behalf of these clients, you must send Tags 115 and 116 with the corresponding values given to you by NASDAQ for each client.

Note: A fully executed Uniform Service Bureau/Executing Broker Agreement (Attachment A of the Agreement) must be in place in order for service bureaus to submit trade reports on behalf of their clients.

Here is a sample set up of a service bureau port with multiple clients (MPIDs, I1I2s and port used for illustrative purposes):

Tag 49 SenderCompID: WXYZ (Service Bureau MPID)

representing the sell-side contemporaneously documents such agreement.

Tag 50 SenderSubID: 1111
Tag 56 TargetCompID: FNRA
Tag 57 TargetSubID: ORF

Port: 12345

Client #1

Tag 115 OnBehalfOfCompID: ABCD Tag 116 OnBehalfOfSubID: 2222

Client #2

Tag 115 OnBehalfOfCompID: EFGH Tag 116 OnBehalfOfSubID: 3333

Client #3

Tag 115 OnBehalfOfCompID: IJKL Tag 116 OnBehalfOfSubID: 4444

³ In transactions between two members, the executing party shall report the transaction. In transactions between a member and a non-member or customer, the member shall report the transaction. The "executing party" shall mean the member that receives an order for handling or execution or is presented an order against its quote, does not subsequently re-route the order, and executes the transaction. In a transaction between two members where both members may satisfy the definition of executing party (e.g., manually negotiated transactions via the telephone), the member representing the sell-side shall report the transaction, unless the parties agree otherwise and the member

Client #4

Tag 115 OnBehalfOfCompID: MNOP Tag 116 OnBehalfOfSubID: 5555

4.5.9 Compliance Identifier

Required by FINRA for any transaction in an order for which a member has recording and reporting obligations under Rules 6830 and 6870 of FINRA's CAT Compliance Rules, the trade report must include an order identifier assigned to the order that uniquely identifies the order for the date it was received. The Compliance Identifier shall be reported in Tag 376 ComplianceID. This field allows up to 20 alphanumeric characters. Contra side Compliance Identifier allowed on Locked-In (AGU/QSR) trades (Tag 22013=A or Q), Cross trades (Side = 8), and Customer (Contra Firm MPID = C) trades. Allowed on Trade Accepts. Contra side Compliance Identifier allowed on trades where the contra party will not submit a matching trade or trade accept.

4.6 Timestamps and dates

Timestamps and dates can be represented in several ways in FIX. The data types used in this solution are:

Data Type	Format	Comment			
YYYYMMDI		The most common data type in FIX. Used in standard FIX tags			
	HH:MM:SS.sss	such as TransactTime (60), SendingTime (52) etc.			
		NOTE 1: times are given in UTC (GMT).			
		NOTE 2: FIX supports timestamps that include fractions of			
		seconds. Where noted in this document, certain timestamps			
		allow reporting up to nanoseconds. This granularity would be			
UTCTimestamp		represented as follows: YYYYMMDD-HH:MM:SS.sssssssss			
	YYYYMMDD	Standard date. Notice that it is NOT in UTC. Used in standard			
LocalMktDate		tags such as TradeDate (75).			
	HH:MM:SS.sss	Basically the time part of a UTCTimestamp.			
		NOTE: times are given in UTC (GMT). For inclusion of			
		nanoseconds, the timestamp would be represented as			
UTCTimeOnly		HH:MM:SS.ssssssss			

4.6.1 TransactTime

TransactTime (60) is a standard FIX tag that is set to the time the transaction it is contained in occurred. On Trade Entry, Trade Cancel, Trade Correction and Trade Reversal messages, TransactTime must be used to indicate the Execution Time of the trade.

Format: UTCTimestamp

4.6.2 SendingTime

SendingTime (52) is contained in the header of every FIX message and must contain the time of message transmission.

Format: UTCTimestamp

4.6.3 TradeDate

TradeDate (75) is used to indicate the date the trade occurred. Non-business days are allowed to be reported as valid Trade Dates. Non-business dates are considered to be weekend days and any day the US markets are closed. Refer to section 4.3 for processing of non-business day trade reports.

Format: LocalMktDate

4.6.4 PreparationTime

PreparationTime (22009) is an optional field defined by FINRA. Denotes the time the submitter prepared the transaction for submission. Outbound messages contain the value set in the inbound message.

Format: UTCTimeOnly

4.6.5 ControlDate

ControlDate (22011) is a field defined by FINRA. ControlDate shall be generated by FINRA in the format YYYYMMDD and shall reflect the date that the trade was received by FINRA from the participant firm. The ControlDate together with the Control Number (TradeID) uniquely identifies a trade throughout the life of the system. Control Date is required in conjunction with Control Number (TradeID) to subsequently cancel or correct a trade.

Format: LocalMktDate

4.6.6 OrigControlDate

OrigControlDate (22012) is a field defined by FINRA (YYYYMMDD format). The OrigControlDate reflects the date when the system received and processed the *original* trade entry. It is found on trade reversal inbound and outbound messages, and on trade correction outbound messages.

Format: LocalMktDate

4.6.7 ServiceBureauPrepTime

ServiceBureauPrepTime (22022) is an optional field defined by FINRA. If a participant firm used a Service Bureau to submit the trade, this field denotes the time the Service Bureau prepared the transaction for submission. Outbound messages contain the value set in the inbound message.

Format: UTCTimeOnly

4.6.8 TradeModifier4Time

TradeModifier4Time (22018) is a conditionally required field defined by FINRA. If a participant firm reports a TradeModifier4 (22004) value of "S" (Stopped Stock) or "P" (Prior Reference Price), this field would be required and must denote the time associated with this condition. Outbound messages contain the value set in the inbound message.

ORF shall validate that the Modifier 4 Time field is populated when the Modifier 4 field is populated with either Prior Reference Price or Stop Stock. If the validation fails, the trade will reject.

On T-Date trades (i.e., non-As Of trades), the Modifier 4 Time field, when present, must be more than 10 seconds prior to <u>both</u> the execution time of the trade and the time the trade is reported to ORF, otherwise the trade will reject. On As-Of trades, this time validation is not required and the trade will be accepted regardless of the Modifier 4 Time in comparison to the Execution Time and report time.

Format: UTCTimeOnly

4.6.9 MatchControlDate

MatchControlDate (22027) is a field defined by FINRA (YYYYMMDD format). Reflects the date when the system matched the trade on match/compared trades. If the trade was matched against the contra party's trade report (where ReportingObligation = N), then this tag will contain the Control Date of the contra party's trade report (Tag 9857 will be set to "C"). If the contra party accepted the executing reporting party's trade report, then this tag will be omitted. It is found on outbound confirmed match messages (ORMA/OCMA).

Format: LocalMktDate

5 Equity Trade Message Formats

5.1 Inbound Trade Report Messages

5.1.1 Trade Capture Report – Reporting a trade (in)

Tag	FIX tag name	Req'd	Comment	
	Standard Header	Υ	MsgType = AE	
			Client-generated identifier (reporting participant firm), not	
571	TradeReportID	Υ	to exceed 20 characters.	
			The client identifier assigned to a trade by the Firm to	
			track a trade within the Firm's system. Must be unique for	
1041	FirmTradeID		the day.	
			FINRA Extension to FIX 4.4:	
			The Contra Client Identifier assigned to a trade by the	
1042	Socondary/FirmTradoID		contra side. Only allowed on Locked-in, Cross and	
1042	SecondaryFirmTradeID		Customer Trade Reports. Valid values:	
487	TradeReportTransType	F	0 = New	
407	Пачетсротттанотурс	'	Valid values:	
856	TradeReportType	F	0 = Submit	
	21 - 21 -		Indicates if the trade capture report was previously	
			reported to the counterparty	
			Valid values:	
570	PreviouslyReported	Υ	N = No	
			Used to indicate that a trade was executed "as of" a prior	
			date.	
			Valid values:	
1015	AsOfIndicator		0 = false - trade is not an AsOf trade (default) 1 = true - trade is an AsOf trade	
55	Symbol	F	Ticker symbol. Max size: 14 characters.	
55	Symbol	Г	Symbol suffix. Additional information about the security	
65	SymbolSfx		(e.g., preferred, warrants, etc.)	
- 00	Cymboloix		Trade Volume as number of shares.	
32	LastQty	Υ	Format: max 8 characters, no decimal.	
			Trade Price. Can be entered as a decimal unit price or as	
			a contract amount price (see Tag 423 Price Type).	
			Format: nnnnnnnnnnnnnnnn (6v6), when Tag 423 = 98.	
			Maximum of 6 digits allowed before the decimal.	
			Maximum of 6 digits allowed after the decimal.	
			Format: nnnnnnnnnnnnn (10v2), when Tag 423 = 99.	
31	LastPx	Υ	Maximum of 10 digits allowed before the decimal. Maximum of 2 digits allowed after the decimal.	
31	Lasii A		98 = Decimal Unit Price	
423	PriceType	F	99 = Contract Amount	
.20			Price inclusive of Explicit Fee. Cannot equal trade price.	
			Can be entered as a decimal unit price or as a contract	
			amount price (see Tag 423 Price Type).	
			Format: nnnnnn.nnnnnn (6v6), when Tag 423 = 98.	
			Maximum of 6 digits allowed before the decimal.	
0000			Maximum of 6 digits allowed after the decimal.	
9822	ClearingPrice		Format: nnnnnnnnnnnn (10v2), when Tag 423 = 99.	

		I		Maximum of 10 digits allowed before the decimal.
				Maximum of 2 digits allowed after the decimal.
				Execution Date. Interpreted as an As-Of trade if not
75	Trac	eDate	Υ	current date. Format: YYYYMMDD
				Time the transaction represented by this Trade Capture
				Report occurred, i.e. Execution Time (in UTC/GMT).
60	Trar	sactTime	Υ	Format: YYYYMMDD-HH:MM:SS. sssssssss
				Optional, used for informational purposes only. Specific
				date of trade settlement (Settlement Date) in
				YYYYMMDD format. Note: if settlement is other than
		_		regular way, the appropriate settlement modifier must be
64	Sett	Date		entered in Trade Modifier 1 (Tag 22001).
				Specifies whether or not this trade report represents the
				submission from the member with the trade reporting
				obligation, as defined under FINRA Rule 6622(b).
				Valid values: Y = Trade reported by the member with the reporting
				obligation.
				N = Trade reported by the member who does not have
22030	Rep	ortingObligation	F	the reporting obligation.
				Set value to 2 (One side for the Reporting party and one
				side for the Contra party).
				On Cross trades, set value to 2 and Reporting party and
552	TrdC	apRptSideGrp/NoSides	Υ	Contra party must be the same MPID.
				Side of trade.
				Valid values:
				1 = Buy
	F 4	Cido	V	2 = Sell
\rightarrow		Side	Y	8 = Cross
\rightarrow	37	OrderID	Υ	Required in FIX, but ignored
	150	Dortico/NoDorty/Do	_	Number of parties on the reporting/contra side of the
\rightarrow	453	Parties/NoPartyIDs	F	trade.
				Identifier for the type of party defined in PartyRole. Either an MPID or a Clearing Firm number or "C" for customer
	\rightarrow	448PartyID	F	on the contra side.
		THOI GITYID	-	Valid values:
				C = Generally accepted market participant identifier (e.g.
\rightarrow	\rightarrow	447 PartyIDSource	F	FINRA mnemonic)
		,	-	Valid values:
				1 = Executing Firm
				14 = Giveup Firm
				17 = Contra Firm
				83 = Clearing Firm Number (if not entered, will default to
\rightarrow	\rightarrow	452 PartyRole	F	primary clearing firm)
\rightarrow	\rightarrow	802NoPartySubIDs		PartySubID is only allowed for PartyRole = 1 or 17.
				Sub-identifier. Branch office of executing/contra firm
				(Branch Sequence Number /Contra Branch Sequence
				Number). Up to 8 characters allowed.
		500D		Contra PartySubID may only be entered on Locked-In,
\rightarrow	\rightarrow	→ 523 PartySubID		Cross and Customer trades.
				Type of PartySubID (523) value
\rightarrow		→ 803PartySubIDType		Valid values: 24 = Department
	520		F	·
\rightarrow	ე28	OrderCapacity		Designates the capacity of the reporting/contra party.

		\ \ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\
		Valid values:
		A = Agency
		P = Principal
		R = Riskless Principal
		Required on the reporting side. Contra side is required on
		all Locked-In trades and allowed on Cross and Customer
		trades.
		Free format user Memo field. Not to exceed 10
\rightarrow	58Text	characters.
		Compliance Identifier. Required as detailed in Section
		4.5.9. Contra side Compliance ID allowed on Locked-In
		trades (AGU/QSR), Cross and Customer trades. Not to
\rightarrow	376ComplianceID	exceed 20 characters.
	1 1 2 2	FINRA Extension to FIX 4.4.
		Valid values:
		Y = Yes
		N = No (default value)
		Price override may only be submitted after the initial
9854	OverrideFlag	trade report is rejected due to price out of range.
1001		FINRA Extension to FIX 4.4.
		Indicates that the firm entering the trade is reporting for
		both sides of the trade. This occurs on an AGU trade
		when two of its give-ups trade with each other (Two-
		sided giveup) or the firm trades with one of its own give-
		ups (One-sided giveup), or on a QSR trade (no giveups
		or giveup on the contra side only).
		Valid values:
		A = AGU
		Q = QSR
		A Uniform Service Agreement (USA) must be in place in
22042	l cokodinindicato:	order for firms to submit trade reports on behalf of their
22013	LockedInIndicator	give ups or contra parties and as Locked-In trades.
		FINRA Extension to FIX 4.4.
		This field allows a trade to be marked for special
		processing (e.g., position transfers). Where indicated,
		certain values MUST be authorized by FINRA Operations
		prior to submission of trades.
		Valid values:
		N = No Special Processing (default)
		Y = Position Transfer (<i>AUTHORIZATION REQUIRED</i>)
22005	SpecialProcessingFlag	O = Clearing-Only, Non-Regulatory Report
		FINRA Extension to FIX 4.4.
		Settlement modifiers. Valid values are:
		0 = regular (T+21, default)
		C = Cash (same day)
		N = Next Day
22001	TradeModifier1	R = Seller's Option
		Days to settlement:
		03-02 – 60 = Seller's Option
		Can only be submitted when Tag 22001 TradeModifier1
855	SecondaryTrdType	= R.
	TradeModifier3	FINRA Extension to FIX 4.4.
22003	Tradomodificio	I THE VALLACOTOR TO FIX T.T.

1	1	ī	
			Time modifiers. Submitted by the participant firm.
			Valid values are:
			T = Executed outside normal market hours
			Z = Executed during normal market hours and reported
			late
			U = Executed outside normal market hours and reported
			late
			FINRA Extension to FIX 4.4.
			SRO detail sale condition. Required indicator if a trade
			falls under one of the following transaction types
			(otherwise the field must not be set):
			M. Milata A. A. Bila
			W = Weighted Average Price
			S = Stopped Stock
			P = Prior Reference Price
			X = Trade related to option exercises
			R = Trade price unrelated to the current market
			Note: values S and P may only be submitted if the
			associated SS or PRP time is more than 10 seconds
			prior to both the execution time and the time the trade is
22004	TradeModifier4		reported to ORF.
22004			Time associated with Prior Reference Price or Stopped
			Stock trade, (in UTC/GMT). Format:
			HH:MM:SS.sssssssss
			ПП.IVIIVI.33.55555555
			May only be submitted when Tag 22004 TradeModifier4
			= S (Stopped Stock) or P (Prior Reference Price) and the
			Modifier 4 Time field is more than 10 seconds prior to the
22018	TradeModifier4Time		execution time of the trade, as described in section 4.6.9.
22010	Trademodification Trans		Time of trade submission (in UTC/GMT) by the
22009	PreparationTime		participant firm. Optional. Format: HH:MM:SS.sssssssss

22022	ServiceBureauPrepTime		(in UTC/GMT). Format: HH:MM:SS. sssssssss
22022	ServiceBureaur reprime		<u>'</u>
			0 = regular (default) 2 = Step In trade
			3 = Step Out trade
			7 = Special trade
			8 = Special and Step Out trade
			9 = Special and Step Out trade
			A = Step Out trade with Fees (for Section 3)
81	ProcessCode		B = Special and Step Out trade with Fees (for Section 3)
J.			Trade Reference Number used to discretely tie a Media
			eligible trade to one or more non-Media eligible trades.
			E.g., same ref number used on a Media trade and on a
			Riskless Principal trade. May only be submitted on
			reporting/executing party trades.
527	SecondaryExecID		Up to 20 characters.
52.			0 = send to clearing
			97 = don't send to clearing
			Note: On AGU trades (Tag 22013 = A),
577	ClearingInstruction	F	ClearingInstruction MUST be set to '0' (send to clearing).
5,,	2.54migmon donon	•	Indicates if the trade should be published to the tape
852	PublishTrdIndicator	F	(disseminated). Required. Valid values are:
UUZ	i abiion ramaicatoi	_ '	Naisserimated). Neguired. Valid Valdes are.

22024	ShortSaleIndicator		Y = Report to the tape N = Do not report to the tape S = Sold Short E = Sold Short Exempt Allowed only on:	
9277	RelatedMarketCenter		O = unknown mkt ctr U = unspecified mult mkt trades 0 = ORF F = Foreign Market	
	Standard Trailer	Υ		

5.1.2 Trade Capture Report – Trade Cancel / Break (in)

To be used to cancel trades submitted T-Date through T-3. Cancels may also be used to Break a matched/locked-in trade (matched by trade comparison or matched by acceptance). Trades that were matched by comparison may be broken by both reporting parties using the TradeReportType value "6" (Tag 856=6) as outlined below. On matched trades where the reported trade was Accepted by the alleged contra party, the contra party must use the TradeReportType value "7" (Tag 856=7) as outlined below to indicate they are breaking their acceptance of the trade. ORF will automatically send a reversal to DTCC if the trade was originally submitted with instructions to send to clearing. Unless otherwise noted, all fields follow rules/definitions as outlined in the Comments column of the Trade Capture Report inbound message.

Tag	FIX tag name	Req'd	Comment
	Standard Header	Υ	MsgType = AE
571	TradeReportID	Y	Unique client-generated identifier. Must be different from the TradeReportID submitted on the original trade report.
1041	FirmTradeID		Client Trade Identifier may be used to Cancel a trade in lieu of FINRA Control Number (TradeID). May not be submitted by the contra party on a Break.
1003	TradeID		FINRA Control Number used to identify the trade being cancelled. Used in lieu of FirmTradeID to reference the trade being cancelled.
22011	ControlDate	F	Control Date of the original trade.
487	TradeReportTransType	F	Valid values: 1 = Cancel Valid values:
			6 = Trade Report Cancel This code must be used only by the reporting party of a trade. If the trade was matched for clearing, this entry will cancel the trade's Status and act as a Break for clearing purposes.
856	TradeReportType	F	7 = Locked In Trade Break This code must be used only by the contra party of an Accepted trade. This entry will allow the contra party to indicate a Break of the reported trade for clearing purposes. The trade will not be cancelled until the reporting party submits a Cancel entry. The Contra Party MUST reference the ControlDate and TradeID of the trade that was accepted.
			Indicates if the trade capture report was previously reported to the counterparty. Required in FIX, but ignored in cancels. Valid values:
570	PreviouslyReported	Υ	N = No
			Must reflect value submitted on original trade report. Valid values:
1015	AsOfIndicator		0 = false – trade is not an AsOf trade (default)

		1	1 = true – trade is an AsOf trade.
55	Symbol	F	Ticker symbol submitted on original trade report.
65	SymbolSfx		Symbol suffix submitted on original trade report.
32	LastQty	Υ	Required in FIX, but ignored in cancels. Can be set to zero.
31	LastPx	Y	Required in FIX, but ignored in cancels. Can be set to zero.
75	TradeDate	Y	Required in FIX but ignored.
60	TransactTime	Y	Execution Time submitted on original trade report (in UTC/GMT). Format: YYYYMMDD-HH:MM:SS. sssssssss
552	TrdCapRptSideGrp/NoSides	Υ	For Trade Cancels this is always set to 1.
→	54Side	Y	Side of trade. Valid values: 1 = Buy 2 = Sell 8 = Cross (cannot be used on Break entries)
\rightarrow	37 OrderID	Υ	Required in FIX, but ignored
\rightarrow	453Parties/NoPartyIDs	F	Number of parties. Always set to "1".
→	→ 448PartyID	F	Identifier (MPID) for the reporting party of the original trade to be cancelled. On breaks of accepted trades, the contra party must enter their MPID.
\rightarrow	→ 447PartyIDSource	F	Valid values : C = Generally accepted market participant identifier (e.g. FINRA mnemonic)
\rightarrow	→ 452PartyRole	F	Valid values: 1 = Executing Firm 17 = Contra Firm (this value only to be used by the contra party on breaks of accepted trades.
		Y	contra party on breaks or accepted trades.
	Standard Trailer	Y	

5.1.3 Trade Capture Report – Reversal (in)

To be used to cancel trades submitted prior to the T-3 day period. May also be used to correct a trade submitted prior to T-3 (submitted in conjunction with a separate As-Of trade report). Unless otherwise noted, all fields follow rules/definitions as outlined in the Comments column of the Trade Capture Report inbound message.

5.1.4 Trade Capture Report - Trade Correction (in)

To be used to correct trades submitted T-Date through T-3. Please note that only unmatched trades, and trades submitted as Locked-In (AGU or QSR) can be corrected. Matched trades (by trade comparison or by acceptance, or auto-locked by ORF on T+1 2:30pm ET), must be Canceled (Broken) first, followed with a new trade submission, in order to correct them during the 4-day period. ORF will automatically send a reversal and new clearing instructions to DTCC if the trade was originally submitted with instructions to send to clearing. If the correction only involves editing of a non-clearing relevant field (e.g., ComplianceID, SecondaryExecID, etc), ORF will NOT send a reversal/new clearing instructions to DTCC.

Unless otherwise noted, all fields follow rules/definitions as outlined in the Comments column of the Trade Capture Report inbound message.

Tag	FIX tag name	Req'd	Comment
	Standard Header	Υ	MsgType = AE
571	TradeReportID	Y	Client-generated identifier (reporting participant firm), not to exceed 20 characters. Must be different from the TradeReportID submitted on the original trade report.
1041	FirmTradeID		Client Trade Identifier may be used to Correct a trade in lieu of FINRA Control Number (TradeID). If a new client identifier is desired for the corrected trade, then the FINRA Control Number MUST be submitted as well. The FINRA Control Number will be used to reference the original trade and the new record will contain the new Client Trade Identifier.
572	TradeReportRefID		TradeReportID of report to amend.
1042	SecondaryFirmTradeID		The Contra Client Identifier assigned to a trade by the contra side. Only allowed on Locked-in, Cross and Customer Trade Reports.
22011	ControlDate	F	Control Date of the trade being corrected.
1003	TradeID		FINRA Control Number used to identify the trade being corrected. Used in lieu of FirmTradeID to reference the trade being corrected.
487	TradeReportTransType	F	Valid values: 2 = Replace
856	TradeReportType	F	Valid values: 5 = Correction
570	PreviouslyReported	Y	Indicates if the trade capture report was previously reported to the counterparty. Required in FIX, but ignored in Corrections. Valid values: N = No
4045			Valid values: 0 = false - trade is not an AsOf trade 1 = true - trade is an AsOf trade Note: Trades submitted during the T-1 through T-3 period must be submitted with AsOfIndicator set to "1" on the correction, regardless if the original
	AsOfIndicator	F	trade was submitted as a non AsOf trade. Ticker symbol submitted on original trade report. Please note Symbol cannot be amended on a

						E = Sold Short Exempt
						Note: The Short Sale Indicator may only be used when the Accepting party's side is a Sell (54=2). If the Accepting
	٥.					party's side is a Buy and the Short Sale Indicator is used,
22024	Shor	tSale	eIndi	cator		the submission will be rejected.
	Stan	dard	Trail	er	Υ	

5.1.6 Trade Capture Report – Trade Decline (DK) (in)

To be used by either side alleged on a trade report to decline the trade report. Either party to a trade will use this message to decline (DK) a trade that is alleged against them. ORF will forward an ORDK (Decline confirmation) message to both parties of the trade to advise them that the specified trade has been declined by the contra party. Trades that have been declined are carried over to the next business day and remain available for cancellation or correction by the reporting party, or for Accepting by the contra party until 2:30 p.m. ET of T+1. Declined trades that are carried over are not eligible for the automatic lock-in at 2:30 p.m. ET and will not be sent to clearing unless the parties take action. Reporting firms must Cancel a declined trade that was previously reported for dissemination purposes to have the trade removed from the tape.

Unless otherwise noted, all fields follow rules/definitions as outlined in the Comments column of the Trade Capture Report inbound message.

Tag	FIX tag name	Req'd	Comment
	Standard Header	Υ	MsgType = AE

			E = Price exceeds limit
127	DKReason	F	F = Calculation difference

			Z = Other
58	Text		Memo field. May be used to further define the reason for the DK, when Tag 127 = Z, e.g., "DUPE TRADE". Not to exceed 10 characters.
	Standard Trailer	Υ	

5.2 Outbound Trade Report Acknowledgements

All inbound messages accepted by the system will produce an acknowledgement confirming the details submitted to FINRA. Reporting party and contra party will receive the proper acknowledgement. These acknowledgments are identified by the first two characters "ORxx" in Tag 1011. If elected, correspondent clearing firm copies of these acknowledgments will also be forwarded to the specified clearing firms of each party. The clearing copies are identified by the first two characters "OCxx" in Tag 1011 and are identical to the OR versions.

5.2.1 Trade Capture Report – Acknowledgement: OREN / OCEN (out)

Unless otherwise specified, the fields returned on the acknowledgement will echo back the values submitted on the Trade Capture Report.

Tag	FIX tag name	Req'd	Comment
	Standard Header	Y	MsgType = AE
			Used to identify the type of acknowledgement. Value "OREN" identifies a Trade Capture Report accepted by FINRA.

5.2.3 Trade Capture Report – Confirmed Cancel: ORCX / OCCX ; ORBX/OCBX (out)

Tag	FIX tag name	Rea'd	Comment
	Standard Header	Υ	MsgType = AE
		-	Used to identify the type of acknowledgment. Value "ORCX" identifies a Trade cancel accepted by FINRA, sent to both parties of the trade.
			Value "ORBX" identifies a Trade break accepted by FINRA, sent to both parties of the trade.
1011	MessageEventSource	F	Value "OCCX" or "OCBX" identifies the versions forwarded to the specified clearing firms of both parties of the trade.
571	TradeReportID	Υ	Identifier assigned by FINRA (not Control Number).
570	T., I. D.,		To the reporting party, this field is set to the reporter's previous TradeReportID. To the contra party, this field is set to the TradeReportID from
572	TradeReportRefID	F	the previous allege message (ORAL).
1041	FirmTradeID	F	Client Trade Identifier from inbound Trade Cancel.
22011	ControlDate	<u> </u>	ControlDate from inbound Trade Cancel. TradeID from inbound Trade Cancel. (FINRA
1003	TradeID	F	Control Number). Valid values:
487	TradeReportTransType	F	1 = Cancel
			Valid values: 6 = Cancel (on ORCX/OCCX)
856	TradeReportType	F	7 = Break (on ORBX/OCBX)
570	PreviouslyReported	Y	Will always be set to: N = No
32	LoctOhy	Y	LastQty from inbound Trade Cancel. NOTE: on a Cancel of a trade report submitted on a prior day (up to T-3), the value "0" will always be returned.
32	LastQty	ı	LastPx from inbound Trade Cancel.
31	LastPx	Y	NOTE: on a Cancel of a trade report submitted on a prior day (up to T-3), the value "0" will always be returned.
75	TradeDate	Y	TradeDate from inbound Trade Cancel. NOTE: on a Cancel of a trade report submitted on a prior day (up to T-3), the current date will always be returned.
60	TransactTime	Y	FINRA system generated timestamp (in UTC/GMT). Format: YYYYMMDD-HH:MM:SS.
60 552		Y	SSSSSSSSS
552	TrdCapRptSideGrp/NoSides	Y	For Trade Cancels this is always set to 1. Side of trade. Valid values:
\rightarrow	54Side	Y	1 = Buy 2 = Sell

			8 = Cross (not used on ORBX/OCBX)
			NOTE: on a Cancel of a trade report submitted on a prior day (up to T-3), the value "1" will always be returned regardless of the value submitted in Tag 54 on the inbound Trade
	1 -1 - 1 - 1		Cancel request.
→	37 OrderID	Y	Required in FIX, set to NONE. Will only be included on Cancels (Breaks) of match/locked trades. Contains the current status of the matched/locked trade. Valid values: A = Trade still locked-in (by trade acceptance) because both parties' Cancel requests have not been received. M = Trade still locked-in (by trade matching) because both parties' Cancel requests have not been received. B = The locked-in trade is effectively broken
9847	LockedInStatus		because both parties' Cancel requests have been received.
9856	BreakIndicator		Will only be included on Cancels (Breaks) of match/locked trades. Indicates initiator on the first Break confirm, or if both parties have submitted Breaks (on the second confirm). Valid values: B = only buyer has broken S = only seller has broken X = both buyer and seller have broken L = broken through market center (used only in the event FINRA breaks the trade).
22027	MatchControlDate		If the trade was matched against the contra party's trade report, then this tag will contain the Control Date of the contra party's trade report. If the contra party accepted the executing reporting party's trade report, then this tag will be omitted. This tag will be omitted on non-matched trade reports.
			If the trade was matched against the contra party's trade report, then this tag will contain the Control Number of the contra party's trade report. If the contra party accepted the executing reporting party's trade report, then this tag will be omitted. This tag will be omitted on non-matched trade
22028	MatchTradeID		reports.

6 Custom values and user defined fields

This chapter details how this solution deviates from standard FIX 4.4. While great care has been taken to conform to the standard, a number of deviations are unavoidable to support all mechanisms provided by the host. Wherever later versions of FIX (up to version 5.0 SP2) provide the missing functionality, we have chosen to use that.

The deviations come in two forms, added fields and added values to existing fields. In addition, a list of the reject codes and associated reasons returned in the Trade Capture Report ACK – Reject (section 5.2.9) has been added and will be maintained going forward if more reject codes/reasons are instituted.

6.1 Fields added

A number of fields had to be added to standard FIX 4.4 to cover all the requirements in this solution. Wherever possible, fields from later versions of FIX (5.0 SP2) has been used (please note that submission of tags not included in this document may cause the Trade Capture Report to not be processed). Custom fields have been added in two ranges:

- In the 22XXX-range custom fields with no representation in standard FIX has been added.
- Certain fields need to appear twice; once with the original values, and once with the new values. Since the same FIX tag can't appear twice in the same message outside a repeating group, copies of the original FIX tags had to be added. They have the same data type as the "real" FIX tags, the names are prefixed with "Orig", and in some cases, the tag number prefixed with 20.

The following fields have been added to FIX 4.4:

		FIX	ζ .
Tag	FIX tag name	5.0	Comment
1003	TradeID	Yes	
1015	AsOfIndicator	Yes	
1042	SecondaryFirmTradeID	Yes	
9854	OverrideFlag	No	
1126	OrigTradeID	Yes	
22001	TradeModifier1	No	
22003	TradeModifier3	No	
22004	TradeModifier4	No	
22005	SpecialProcessingFlag	No	
22009	PreparationTime	No	
22011	ControlDate	No	
22012	OrigControlDate	No	
22013	LockedInIndicator	No	
22015	BranchOfficeCodeSequenceNumber	No	
22018	TradeModifier4Time	No	
22020	FINRATradeModifier3	No	
22022	ServiceBureauPrepTime	No	
22024	ShortSaleIndicator	No	
22027	MatchControlDate	No	
22028	MatchTradeID	No	
22029	ReferenceReportingFacility	No	
22030	ReportingObligation	No	

6.2 Enumerations added

Enum	Enum description	Tag	Comment
83	Clearing Firm Number	452	PartyRole
9	Special and Step In trade	81	Additional values to support Step In reporting as
A	Step Out trade with Fees		well as reporting Step Outs with Section 3 fees.
В	Special and Step Out trade with		
	Fees		

6.3 Reject Reason Table

This table contains the Reject Reason Code (Tag 751) and associated Reject Reason (Tag 58) returned on rejected entries. This list will be subject to updates as necessary.

7 Limitations

7.1 Field lengths and data types

All fields in this specification adhere to the standard FIX 4.4 field definitions. Please refer to http://fixprotocol.org/specifications/FIX.4.4 for details.

In addition, this solution imposes the following restrictions on fields:

Tag	FIX tag name	Comment
448	PartyID	PartyID. Max valid 4 character MPIDs.
571	TradeReportID	Limited to 20 characters
572	TradeReportRefID	Limited to 20 characters
1041	FirmTradeID	Limited to 20 characters
1042	SecondaryFirmTradeID	Limited to 20 characters
32	LastQty	Format: Max eight digits.
		Format: nnnnnnnnnnnnnn (for decimal unit price)
31	LastPx	nnnnnnnnnnnn (for contract amount)
1003	TradeID	Max ten digits.
1126	OrigTradeID	Max ten digits.
523	PartySubID	Max 8 characters
22013	LockedInIndicator	FIX Data type: Boolean
22015	BranchOfficeCodeSequenceNumber	FIX Data type: String
376	ComplianceID	Max 20 characters.

8 Field Definitions

8.1 Field Descriptions and Values

The following contains the general definitions for all fields that are contained within the ORF message text. Some field definitions are also covered in sections 4.5 and 4.6 of this document. Any specific information that is relevant to a particular transaction type can be found in the description of the transaction. In addition, these definitions apply to both ORF Input and Output messages.

Tag	Field	Description
22005	SpecialProcessingFlag	This field allows a trade to be marked for special processing (e.g., position transfers). Where indicated, use of this field for special processing purposes MUST be authorized by FINRA Operations prior to submission of trades. Authorization will be granted on a trade by trade basis. Valid values are: N = No special processing (or this tag may be omitted) Y = Position Transfer (AUTHORIZATION REQUIRED) O = Clearing-Only, Non-Regulatory Report Note: the Clearing-Only, Non-Regulatory Report is used by firms for a previously executed trade for which a tape report has been submitted to ORF, or for the offsetting portion of a riskless principal or agency transaction for which a non-tape, non-clearing report already has been submitted to ORF satisfying FINRA regulatory requirements. Trades submitted with this indicator may not be submitted with Publish Indicator
		= Y. Please refer to <u>FINRA Rule Filing 2015-035</u> for more information on the use of this value.
54	Side	Required. Identifies the side of the trade under the corresponding party role. Valid values are: 1 = Buy 2 = Sell 8 = Cross (internalized trade)
22024	ShortSaleIndicator	Indicates whether the trade is a short sale or short sale exempt trade. Valid values are: S = Short Sale E = Short Sale Exempt For match eligible trades, the seller has the responsibility to report short sale transactions using the Short Sale Indicator to identify them. Trades submitted as tape-only (non-clearing) or audit trail-only (non-tape, nonclearing) are not match eligible trades and where the reporting party is the buyer, the short sale indication may be submitted. May also be submitted on locked-in (AGU/QSR) trade reports. If one of these conditions are not met, and the transaction is submitted with the short sale indicator, the transaction will be rejected. Note: The Short Sale Exempt value is currently not applicable to OTC
		Equity securities because such securities are not subject to Rule 201 of Regulation SHO and, thus, should not be marked as short exempt pursuant to Rule 200 of Regulation SHO. The Short Exempt value is reserved for future use in the event that rules change to allow Short Exempt order marking for OTC Equity securities.
32	LastQty	8 digit numeric field representing the actual number of shares traded (please note the ORF system will only allow a maximum quantity of 99,999,999 shares to be reported. Trades involving a quantity greater than this

Tag	Field	Description
U		amount must be broken into multiple trade reports). Required field.
55	Symbol	A required field. Up to fourteen alphanumeric character security identifier.
		Please note: Symbol CANNOT be changed on a correction. In order to
		change the security on a previously submitted trade report, firms must
		cancel the original trade and submit a new trade with the correct
		Symbol.
65	SymbolSfx	An optional field. Up to seven alphanumeric character suffix assigned to
		the security that provides additional information regarding that security
21	T D	(e.g., preferred, warrants, etc.)
31	LastPx	A required maximum 13 character field which indicates the price at which
		the security traded. Can be entered as a decimal unit price or a contract
		amount, based on Price Type. Formats (' $v' = decimal\ point$):
		Decimal Unit (PriceType = 98): 9999999999999999999999999999999999
423	PriceType	Contract Amount (PriceType = 99): 99999999999999999999999999999999
423	riiceType	98 = Decimal Unit Amount
		99 = Contract Amount
9854	OverrideFlag	Used to indicate that the entered price is valid although it may fall outside
7054	Overridering	the reasonability check made by the system. The override should not be
		used on initial submission; used only after a trade report has been rejected
		for having a price that is considered out of range.
9822	ClearingPrice	Price inclusive of Explicit Fee. Cannot equal the trade price. Can be
		entered as a maximum 13 character decimal unit price or contract amount,
		based on Price Type used. Formats (' $v' = decimal\ point$):
		Decimal Unit (PriceType = 98): 9999999999999999999999999999999999
		Contract Amount (PriceType = 99): 99999999999999999999999999999999
60	TransactTime	Time the transaction represented by this Trade Capture Report occurred (in UTC/GMT). Format: YYYYMMDD-HH:MM:SS.ssssssss
		Note 1: If a firm's system does not capture time in increments finer than seconds, , firms can submit zeros ("000000000") in the milliseconds through nanoseconds portion of this timestamp, or submit time up to the seconds and ORF will zero-fill up to the nanosecond increment of the timestamp.
		Note 2: On Corrections, Execution Time can be changed only to a time prior to the originally submitted execution time. Execution time cannot be changed to a time that is subsequent to the originally submitted time. In the case of the latter, firms would be required to Cancel the original trade and resubmit a new Trade Report with the intended Execution Time.
22001	TradeModifier1	Settlement modifiers. Valid values are:
		C = Cash (same day) settlement
		N = Next Day settlement
		R = Seller's Option
0.5.5		0 = regular (T+21) settlement (or tag may be omitted)
855	SecondaryTrdType (aka Seller's Option Days)	Required days to settlement when Trade Modifier $1 = R$. Valid values are $\frac{03}{02} - 60$, otherwise this tag must be omitted.
22003	TradeModifier3	Time modifiers to be submitted by the reporting party identifying
		Extended hours/Late sale conditions, when applicable, otherwise the tag
		may be omitted. Valid values are:
		T = Trade executed outside normal market hours

Tag	Field	Description
		Z = Trade executed during normal market hours and reported late
		U = Trade executed outside normal market hours and reported late
		Note: FINRA will also determine and generate time modifiers and append
		accordingly on the outbound acknowledgement.
22004	TradeModifier4	SRO detail sale condition. Required modifier if a trade falls under one of
		the following transaction types, otherwise omit the tag:
		W = Weighted Average Price
		S = Stopped Stock P = Prior Reference Price
		X = Trade related to option exercises
		R = Trade price unrelated to the current market
		Note: values S and P may only be submitted if the associated SS or PRP
		time is more than 10 seconds prior to both the execution time and the time
		the trade is reported.
22018	TradeModifier4Time	The time associated with a Prior Reference Price or Stopped Stock trade
		(May only be submitted when Tag 22004 TradeModifier4 = S (Stopped
		Stock) or P (Prior Reference Price) and the Modifier 4 Time field is more
		than 10 seconds prior to both the execution time of the trade and the time
		the trade is reported, otherwise the field must be left blank.
		Format: HH:MM:SS.sssssssss (see Note 1 of Tag 60/TransactTime
520	OudanCanasita:	above).
528	OrderCapacity	A one character Capacity Indicator field denoting whether the firm is acting as "P" for principal, "A" for agency or "R" for riskless principal on this
		trade. Required for the Executing Firm side. Required for the Contra Firm
		side on Locked In (AGU/QSR) trades. Required for the Contra Firm side
		on non-clearing (ClearingInstruction = 97) trades (where the contra firm
		does not submit their version of the trade or Accept the trade alleged against
		them). Allowed on the Contra Firm side on Cross trades and on Customer
		trades.
22030	ReportingObligation	Required field. Indicates whether or not this trade report represents the
		submission from the member firm with the trade reporting obligation, as
		defined under FINRA Rule 6622(b). Valid values are:
		Y = Trade reported by firm with the reporting obligation N = Trade reported by firm that does not have the obligation
1015	AsOfIndicator	This field is used to denote whether the trade is an As-Of trade entry (i.e.,
1013	Asomidicator	executed on a prior day), or a cancel or correction of an As-Of trade. Valid
		values are:
		0 = Current day trade
		1 = As-Of (T+n) trade
		Note: "1" is required on all Reversals. "1" is required on Corrections of
		prior day submissions and T-day submissions originally submitted as an As-
		Of trade. For Corrections of non-As-Of T-day submissions, this field must
7.5	T 1 D	be "0" or omitted.
75	TradeDate	The date that the transaction was executed (aka Execution Date). For an
		As-of trade (As-Of Indicator = 1), the date must be T+1 or older. The
		format is YYYYMMDD. Note 1: On non-As-Of trades, the Trade Date cannot be changed on a
		Correction submission to a different date than what was originally
		submitted. Firms would be required to Cancel the original trade and
		resubmit a new Trade Report with the intended Trade Date.
		On As-Of trades, the Trade Date can be changed only to a date prior
		to the original execution date. The Trade Date cannot be changed to a
		date that is subsequent to the original execution date. In the case of
		the latter, firms would be required to Cancel the original trade and

Tag	Field	Description
8		resubmit a new As-Of Trade Report with the intended Trade Date.
		Note 2: Trades executed on non-business days (i.e., weekends and holidays) and trades executed greater than 365 days prior to a current day are reportable to ORF with the exact date of execution. Non-business day trades and T+365 trades cannot be marked for clearing on the submission to ORF. Non-business day trades must be reported as As-Of by 8:15am ET the next business day with the appropriate outside normal market hours modifier.
58	Text	An optional ten character alphanumeric Memo field.
22013	LockedInIndicator	Indicates that the reporting party entering the trade report is reporting for both sides of the trade in a single trade report, as an AGU (Automatic Give Up) trade or as a QSR (Qualified Service Representative) trade. Valid values are: A = AGU trade report Q = QSR trade report Firms may use the Locked-In Indicator to identify an AGU trade report when a firm trades with one of its correspondents (one-sided AGU trade), or when a firm reports a trade executed between two of its correspondents (two-sided AGU trade). A correspondent must be a FINRA member and is
27.6		entered under one or both Give Up fields (on two-sided Locked-In trades). The reporting party's MPID must be the same on the RPID and CPID fields. Firms may use the Locked-In Indicator to identify a QSR trade report when a firm has an agreement to report on behalf of their contra party for an execution they entered into. For QSR trade reports, the RPID and CPID cannot be the same and only the Contra Party Give Up field can be used. Locked-In trades cannot be submitted as Cross trades (54=8). A Uniform Service Agreement must be in place in order for firms to submit Locked In trade reports.
376	ComplianceID	Required by FINRA for any transaction in an order for which a member has recording and reporting obligations under Rules 6830 and 6870 of FINRA's CAT Compliance Rules, the trade report must include an order identifier assigned to the order that uniquely identifies the order for the date it was received. The Compliance Identifier shall be reported in Tag 376 ComplianceID. This field allows up to 20 alphanumeric characters. Contra side allowed on Locked-In (AGU/QSR) trades (Tag 22013=A or Q), Cross trades (Side = 8), and Customer (Contra Firm MPID = C) trades. Allowed on Trade Accepts. Contra side allowed on trades where the contra party will not submit a matching trade or trade accept.
64	SettlDate	Optional, used for informational purposes only. Specific date of trade settlement (Settlement Date) in YYYYMMDD format. Note: if settlement is other than regular way, the appropriate settlement modifier must be entered in Trade Modifier 1 (Tag 22001).
577	ClearingInstruction	Indicates if the trade should be forwarded to NSCC for clearing. Required. Valid values are: 0 = send to clearing 97 = do not send to clearing Note: on AGU trades (Tag 22013 = A), this field MUST be set to "0"

Tag	Field	Description
		(send to clearing).
852	PublishTrdIndicator	Indicates that the trade should be published to the tape (disseminated).
		Required. Valid values are:
		Y = report to the tape
		N = do not report to the tape
81	ProcessCode	This field indicates if the trade falls under any of the following conditions:
	(aka Special Instruction	7 = Special trade
	Indicator)	3 = Step Out trade
		8 = Special and Step Out trade
		2 = Step In trade
		9 = Special and Step In trade
		A = Step Out trade with Fees (for Section 3) B = Special and Step Out trade with Fees (for Section 3)
		B = Special and Step Out trade with Fees (for Section3) 0 = regular trade (none of the above) or tag may be omitted
		A special trade (7), special/step out trade (8), special/step in trade (9) and
		special/step out trade with fees (B) instructs the NSCC not to include the
		trade in the CNS settlement process.
9277	Related Market Center	Available on transaction reports submitted through ORF such as step outs,
9211	Related Warket Celler	non-tape, and riskless principal transactions, the market where the
		underlying transaction was reported, as applicable, otherwise omit the tag.
		Valid values are:
		O = Unknown Market Center
		U = Unspecified Multiple Market trades
		0 = ORF
		F = Foreign Market
527	SecondaryExecID	Used to discretely tie a Media eligible trade to one or more non-Media
	(akaTrade Reference	eligible trades, e.g., same ref number used on a Media trade and on a
	Number)	riskless principal trade. Up to 20 characters allowed.
22011	ControlDate	When a trade is submitted to ORF and accepted, the system will return a
		Control Date with the trade acknowledgement. The Control Date reflects
		the date when the system received and processed the trade entry. Control
		Date, in combination with Control Number, is required in subsequent
		trade cancel and correction messages to modify a trade report. Firms that
		elect to use their Client Trade Identifier (FirmTradeID) to Cancel or
		Control Data assigned to the original trade report. Trade corrections will
		Control Date assigned to the original trade report. Trade corrections will receive a new Control Date/Control Number trade identifier.
1003	TradeID	When a trade is submitted to ORF and accepted, the system will assign a
1003	(aka Control Number)	Control Number which will be returned on the trade acknowledgement.
	(and Comion Ivamoer)	The Control Number is a 10 digit identifier of the trade, which will be
		unique throughout the day. Control Date, in combination with Control
		Number, is required in subsequent trade cancel and correction messages to
		modify a trade report. Trade corrections will receive a new Control
		Date/Control Number trade identifier. In ORF, all control numbers will
		start with the value "5" followed by nine sequential numeric integers.
22029	ReferenceReporting	Used if a participant transitions from one FINRA Reporting Facility to
	Facility	another and the participant needs to reverse a trade on the new reporting
	-	facility that was originally entered on the old reporting facility. This field
		is only available on Trade Reversals.
		Valid values:
		A = ADF
		Q = FINRA/NASDAQ TRF Carteret
		B = FINRA/NASDAQ TRF Chicago

Tag	Field	Description
		N = FINRA/NYSE TRF

9 Sample FIX Submissions

This section contains basic examples of various trade report types and submissions to ORF. For simplicity, only the pertinent tags are used in these examples. Firms must still refer to the input layouts specified in section 5 of this document.

9.1 Interdealer Trade Report – with Reporting responsibility

Where contra party is another FINRA member.

- Firm ABCD is submitting the trade and is the party with the reporting obligation.
- Firm WXYZ is ABCD's counter party.
- ABCD is the seller, WXYZ is the buyer.
- ABCD is acting in a Principal capacity.
- The trade is tape reportable and to be sent to clearing.
- The only other party identified is the reporting party's clearing firm.

Field	Tag=Value	Description
Reporting		Firm ABCD indicates it is the firm with the responsibility to
Obligation	22030=Y	report.
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=2	Sell side group.
Number of		
Parties	453=2	Indicates there are 2 parties reported on the sell side.
Party ID	448=ABCD	First party on the sell side identified as ABCD.
Party Role	452=1	ABCD is the Executing (reporting) firm.
Party ID	448=1234	Second party identified as 1234.
Party Role	452=83	1234 is the clearing firm for ABCD.
Order Capacity	528=P	ABCD is acting in a Principal capacity.
Side	54=1	Buy side group.
Number of		
Parties	453=1	Indicates there is 1 party reported on the buy side.
Party ID	448=WXYZ	First party on the buy side identified as WXYZ.
Party Role	452=17	WXYZ is the Contra firm.
Clearing		
Instruction	577=0	Send trade to clearing.
Publish Indicator	852=Y	Send trade to the tape.

9.2 Interdealer Trade Report - with no Reporting responsibility

Where contra party is another FINRA member.

- Firm WXYZ is submitting the trade and is NOT the party with the reporting obligation.
- Firm ABCD is WXYZ's counter party.
- WXYZ is the buyer, ABCD is the seller.
- WXYZ is acting in an Agent capacity.
- The trade is not tape reportable but is to be sent to clearing.
- The only other party identified is the reporting party's clearing firm.

Field	Tag=Value	Description
Reporting		Firm WXYZ indicates it is not the firm with the
Obligation	22030=N	responsibility to report.
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=1	Buy side group.
Number of		
Parties	453=2	Indicates there are 2 parties reported on the buy side.
Party ID	448=WXYZ	First party on the buy side identified as WXYZ.
Party Role	452=1	WXYZ is the Executing (reporting) firm.
Party ID	448=5678	Second party identified as 5678.
Party Role	452=83	5678 is the clearing firm for WXYZ.
Order Capacity	528=A	WXYZ is acting in an Agent capacity.
Side	54=2	Sell side group.
Number of		
Parties	453=1	Indicates there is 1 party reported on the sell side.
Party ID	448=ABCD	First party on the sell side identified as ABCD.
Party Role	452=17	ABCD is the Contra firm.
Clearing		
Instruction	577=0	Send trade to clearing.
Publish Indicator	852=N	Do not send trade to the tape.

Example 9.2 would be the matching submission to example 9.1. This would be the trade report submitted from the buyer's perspective.

9.3 Customer Trade Report

Where contra party is not a FINRA member.

- Firm ABCD is submitting the trade.
- A non FINRA member is ABCD's counter party.
- ABCD is the buyer, non-member is the seller.
- ABCD is acting in a Principal capacity and knows the contra party is also acting as Principal.
- The trade is tape reportable but is not sent to clearing.

Field	Tag=Value	Description
Reporting		On trade reports against a non-FINRA member, the
Obligation	22030=Y	reporting party always has the responsibility to report.
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=1	Buy side group.
Number of		
Parties	453=1	Indicates there is 1 party reported on the buy side.
Party ID	448=ABCD	First party on the buy side identified as ABCD.
Party Role	452=1	ABCD is the Executing (reporting) firm.
Order Capacity	528=P	ABCD is acting in a Principal capacity.
Side	54=2	Sell side group.
Number of		
Parties	453=1	Indicates there is 1 party reported on the sell side.
		First party on the sell side identified as "C", the standard
Party ID	448=C	mnemonic for a non-FINRA member (Customer).
Party Role	452=17	C is the Contra firm.
Order Capacity	528=P	C is acting in a Principal capacity.
Clearing		
Instruction	577=97	Do not send trade to clearing.
Publish Indicator	852=Y	Send trade to the tape.

All Customer trades must be reported as Reporting Obligation = Y, and not for Clearing. On Customer trades, the reporting party is allowed to submit the contra Capacity, and Compliance ID if applicable.

9.4 Cross Trade Report

Where a trade is internalized or crossed between a FINRA members two customers.

- Firm ABCD is submitting the trade.
- ABCD is acting in an Agent capacity on both sides of the cross.
- The trade is tape reportable but is not sent to clearing.

Field	Tag=Value	Description
Reporting		On all Cross trade reports, the reporting obligation must
Obligation	22030=Y	always be set to "Y".
		Must always be set to "2" on all Cross trades to report
Number of Sides	552=2	both sides' information.
Side	54=8	First cross group.
Number of Parties	453=1	Indicates there is 1 party reported on the first cross side.
Party ID	448=ABCD	First party identified as ABCD.
Party Role	452=1	ABCD is the Executing (reporting) firm.
Order Capacity	528=A	ABCD is acting in an Agent capacity.
Side	54=8	Second cross group.
		Indicates there is 1 party reported on the second cross
Number of Parties	453=1	side.
		On cross trades, the reporting party and contra firm must
Party ID	448=ABCD	be the same.
Party Role	452=17	ABCD is the Contra firm.
Order Capacity	528=A	ABCD is acting in an Agent capacity.
Clearing		
Instruction	577=97	Do not send trade to clearing.
Publish Indicator	852=Y	Send trade to the tape.

All Cross trades must be reported as Reporting Obligation = Y, and not for Clearing. Publish Indicator may be set to Y or N. On Cross trades, the reporting party may submit the contra Capacity, and is allowed to submit the Compliance ID if applicable.

Please note: Cross trades will not be sent to NSCC for clearing regardless of the Clearing Indicator.

9.5 AGU Trades

Where reporting party is executing against and submitting for another FINRA member.

- Firm EFGH is submitting the trade.
- Firm IJKL is EFGH's counter party and EFGH is also authorized to submit for IJKL.
- EFGH is the buyer, IJKL is the seller and the party with the reporting obligation.
- EFGH is acting in an Agent capacity, IJKL is acting in a Principal capacity.
- The trade is tape reportable and is to be sent to clearing.
- The other parties identified are both firms' clearing firms.

Field	Tag=Value	Description
Reporting		On all AGU trade reports, the reporting obligation must
Obligation	22030=Y	always be set to "Y".
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=1	Buy side group.
Number of Parties	453=2	Indicates there are 2 parties reported on the buy side.
Party ID	448=EFGH	First party identified as EFGH.
Party Role	452=17	EFGH is the Contra firm.
Party ID	448=5678	Second party identified as 5678.
Party Role	452=83	5678 is the clearing firm for EFGH.
Order Capacity	528=A	EFGH is acting in an Agent capacity.
Side	54=2	Sell side group.
Number of Parties	453=3	Indicates there are 3 parties reported on the sell side.
Party ID	448=EFGH	First party on the sell side identified as EFGH.
Party Role	452=1	EFGH is the Executing (reporting) firm.
Party ID	448=IJKL	Second party identified as IJKL.
Party Role	452=14	IJKL is the Giveup Firm, i.e., EFGH is giving up IJKL.
Party ID	448=1234	Third party identified as 1234.
Party Role	452=83	1234 is the clearing firm for IJKL.
Order Capacity	528=P	IJKL is acting in a Principal capacity.
Locked In		
Indicator	22013=A	Indicates the trade report is an AGU trade.
Clearing		
Instruction	577=0	Send trade to clearing.
Publish Indicator	852=Y	Send trade to the tape.

All AGU trades must be reported as Reporting Obligation = Y, and must be set for Clearing. Publish Indicator may be set to Y or N. On AGU trades, the reporting party MPID must be the same as the contra party MPID, and the Give up party can be on either side. In the above case, since the Give up Firm has the reporting responsibility, it is included in the nested group of the executing party role. On all AGU trades, the contra Capacity must be submitted, and the reporting firm is allowed to submit the Compliance ID if applicable.

Note: A Uniform Service Agreement (USA) is required in order to submit AGU trades on behalf of reported parties.

9.6 Give Up Trades

Where reporting party is submitting for a FINRA member who executed against another FINRA member.

- Firm EFGH is submitting the trade.
- EFGH is authorized to submit for IJKL, who executed a trade against WXYZ.
- IJKL is the buyer, WXYZ is the seller and the party with the reporting obligation.
- IJKL is acting in a Principal capacity.
- The trade is not tape reportable but is to be sent to clearing.

Field	Tag=Value	Description
Reporting		Firm EFGH, giving up IJKL, indicates IJKL is not the firm
Obligation	22030=N	with the responsibility to report.
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=1	Buy side group.
Number of		
Parties	453=2	Indicates there are 2 parties reported on the buy side.
Party ID	448=EFGH	First party identified as EFGH.
Party Role	452=1	EFGH is the Executing/reporting firm.
Party ID	448=IJKL	Second party identified as IJKL.
Party Role	452=14	IJKL is the Giveup firm.
Order Capacity	528=P	IJKL is acting in a Principal capacity.
Side	54=2	Sell side group.
Number of		
Parties	453=1	Indicates there is 1 party reported on the sell side.
Party ID	448=WXYZ	First party on the sell side identified as WXYZ.
Party Role	452=17	WXYZ is the Contra firm.
Clearing		
Instruction	577=0	Send trade to clearing.
Publish Indicator	852=N	Do not send trade to the tape.

Give up trades may be reported as Reporting Obligation = Y or N depending on the reporting responsibility of the Giveup firm. Giveup trades can be set to Clear or not, can be set to Publish or not. The Giveup firm's Capacity must be submitted, and the reporting firm is allowed to submit the Giveup firm's Compliance ID if applicable.

Note: A Uniform Service Agreement (USA) is required in order to give firms on a trade report.

9.7 QSR Trades

Where reporting party is executing against and submitting for another FINRA member using the NSCC QSR agreement.

- Firm EFGH is submitting the trade.
- Firm IJKL is EFGH's counter party and EFGH is also authorized to submit for IJKL.
- EFGH is the seller and the party with the reporting obligation, IJKL is the buyer.
- EFGH is acting in an Agent capacity, IJKL is acting in a Principal capacity.
- The trade is tape reportable and is to be sent to clearing.
- The other parties identified are both firms' clearing firms.

Field	Tag=Value	Description
Reporting		Firm EFGH indicates it is the firm with the responsibility to
Obligation	22030=Y	report.
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=2	Sell side group.
Number of		
Parties	453=2	Indicates there are 2 parties reported on the sell side.
Party ID	448=EFGH	First party identified as EFGH.
Party Role	452=1	EFGH is the Executing/reporting firm.
Party ID	448=1234	Second party identified as 1234.
Party Role	452=83	1234 is the Clearing firm for EFGH.
Order Capacity	528=A	EFGH is acting in an Agent capacity.
Side	54=1	Buy side group.
Number of		
Parties	453=2	Indicates there are 2 parties reported on the buy side.
Party ID	448=IJKL	First party on the sell side identified as IJKL.
Party Role	452=17	IJKL is the Contra firm.
Party ID	448=5678	Second party on the sell side identified as 5678.
Party Role	452=83	5678 is the Clearing firm for IJKL.
Locked In		
Indicator	22013=Q	Indicates the trade report is a QSR trade.
Clearing		
Instruction	577=0	Send trade to clearing.
Publish Indicator	852=Y	Send trade to the tape.

QSR trades may be reported as Reporting Obligation = Y or N depending on the role of the reporting party. QSR trades may be set to Clear or not. Publish Indicator may be set to Y or N. On QSR trades, a give up on the contra side group is allowed, if applicable. On all QSR trades, the contra Capacity must be submitted, and the reporting firm is allowed to submit the Compliance ID if applicable.

Note: A Uniform Service Agreement (USA) is required in order to submit QSR trades on behalf of reported parties.

9.8 Step In / Step Out Trades

When two FINRA members are reporting a step out trade.

- Firm MNOP is submitting the trade.
- Firm QRST is MNOP's counter party.
- MNOP is stepping out to QRST and is the the seller, QRST is the buyer (and stepping in).
- MNOP is acting in a Principal capacity,
- The trade is to be sent to clearing.

Field	Tag=Value	Description
Reporting		Firm MNOP as the part stepping out indicates it is the firm
Obligation	22030=Y	with the responsibility to report.
		Must always be set to "2" to identify the buy and sell
Number of Sides	552=2	sides.
Side	54=2	Sell side group.
Number of		
Parties	453=2	Indicates there are 2 parties reported on the sell side.
Party ID	448=MNOP	First party identified as MNOP.
Party Role	452=1	MNOP is the Executing/reporting firm.
Party ID	448=1234	Second party identified as 1234.
Party Role	452=83	1234 is the Clearing firm for MNOP.
Order Capacity	528=P	MNOP is acting in a Principal capacity.
Side	54=1	Buy side group.
Number of		
Parties	453=1	Indicates there is 1 party reported on the buy side.
Party ID	448=QRST	First party on the sell side identified as QRST.
Party Role	452=17	QRST is the Contra firm.
Process Code	81=3	Indicates the trade report is a Step Out trade.
Clearing		
Instruction	577=0	Send trade to clearing.
Publish Indicator	852=N	Do not send trade to the tape.

The firm stepping out must always set Reporting Obligation = Y. Step Out trades are clearing transactions and must be set to Clear. Step Out trades are non-tape reportable and Publish Indicator must be set to N.

For the firm stepping in, the above tags would be used with the following exceptions:

- Tag 22030=N (firm stepping in must always set this field to N.
- Firm stepping in would identify itself as the executing firm (Tag 452=1) and the other side as the contra firm (Tag 452=17), and report under the proper Side group.
- Tag 81=2 (indicates the submission is a Step In trade).

Step in and Step Out trades are matched against each other and sent to clearing by ORF.

Revision History

Revision	Date	Comment	
1.0	11/30/2012	Initial version.	
1.1	1/25/2013	 Revised throughout document that clearing number is not a required field and if not submitted, will default to firm's primary clearing relation. In section 5.1.1 tag 22013, removed statement that all Locked-In trades must be submitted as sells. Removed tags 22002 (TradeModifier2) and 829 (TrdSubType) from all in/out messages (not applicable to ORF). Tag 577 (ClearingInstruction) – added note to Comments that tag must be set to '0' on all AGU trades. Tag 9277 (RelatedMarketCenter) – revised valid values for this field. Section 5.1.6 Trade Decline – redefined message to indicate it can be used by either side to the trade. Also redefined tag 54 (Side) and removed tags 453, 448, 447 and 452 to this message, as well as the corresponding ORDK message (section 5.2.7). Sections 5.2.1 (OREN), 5.2.4 (ORHX) and 5.2.5 (ORCR) – added tag 22031 (FINRATradeModifier4). Added section 5.2.2, ORAL Allege message confirmation. Section 5.2.3 (ORCX) – redefined Comments on various tags. 	
1.2	11/8/2013	 Section 5.2.8 (ORMA) – removed tags 572 and 881. Revised throughout document that ORF will retain 4 rolling business days (T date through T-3) of online trade reports, instead of 5. Added Acknowledgement type codes for the Clearing versions of confirmations that can be sent to reporting/contra parties' clearing firms. Added Tag 572 (TradeReportRefID) to Reject messages. Added Tag 1041 (FirmTradeID) to most messages. For Cross trades, amended numb of sides (Tag 552) to "2". Expanded Tag 81 (ProcessCode), aka Special Instruction Indicator, to support values for reporting Step Ins, and Step Outs with Section 3 Fee reports. Removed Tag 577 (ClearingInstruction) from Cancels and Corrections. Added Tag 1042 (SecondaryFirmTradeID) to Accept messages. Removed Tag 22026 (PriorDayClearingInstruction) from all messages. Removed Tag 22031 (FINRATradeModifier4) from all messages. Revised values for Tag 9857 (LockedInMethod) in the confirmed Match message. Added section 6.3 to list Reject reasons and codes. 	
1.3	3/4/2014	 Added tags 115 and 116 to inbound header for OBO reporting (sect. 3.13.1) Added tags 128 and 129 to outbound header for OBO reporting (sect. 3.13.2) Removed Party Role of "Entering Firm" and value "7" throughout document Clarified the definition and use of the Reporting Obligation field (tag 22030) in sect. 4.5.8 Updated sect. 4.5.9 for service bureau reporting (using OnBehalfOf methodology) Renamed Party Role of "Clearing Account Number" (value 83) to "Clearing Firm Number 	

	1	,
1.4	7/11/2014	 Changed OATS Identifier (ComplianceID) definition as a required field Changed tag 453 to always be set to "1" on inbound Cancel (sect. 5.1.2) Removed FINRATradeModifier4 from outbound ORAL (sect. 5.2.2) Removed a few Reject Codes that are not applicable to ORF (sect. 6.3) Added new section 8 (Field Definitions). Sect. 1.1 – added the ORF normal operating hours. Sect. 4.6.9 – removed reference to Rule Filing SR2013-50 in Trade Modifier 4 Time.
		 Sect. 5.1.2 – further defined the processing of Break messages as it applies to trades Accepted by the contra party (CP). Sect 5.1.5 – added a note for the use of Short Sale Indicator on Trade Accepts. Sect. 5.1.6 – additional comments to the definition and processing of Declines. Sect 5.2.3 – expanded the Cancel confirmation to support Break message processing by adding new ORBX/OCBX message event source. Sect. 5.2.8 – added value "L" to tag 9857 for auto-locked trades. Sect 8.1 – added Note 2 to definition of Trade Date regarding non-business day and T+365 trades. Sect 9 – added this new section to provide examples of tag usage for various types of basic trade reports.
1.5	10/1/2015	• Sect. 5.1.1 and sect. 8.1 - Introduction of new value "O" to tag 22005 for clearing-only, non-regulatory reports.
1.6	1/18/2017	• Updated Regular Way and Seller's Option Days definitions for T+2 Settlement.
1.7	3/5/2018	Removed Tag 22007 from the Spec. Will use Tag 60 for Execution Time instead.
1.7a	4/18/2018	Expanded on Short Sale Indicator definition and allowed usage.
1.8	5/7/2018	 Updated for the addition of FINRA/NASDAQ TRF Chicago: added new Related Market Center and new Reference Reporting Facility Clarifications for Reference Reporting Facility 5.1.3 Trade Capture Report – Reversal 8.1 Field Descriptions and Values
1.9	9/16/2021	Replaced references to the OATS rules with references to FINRA's CAT Compliance Rules.
1.10	6/6/2022	Updated timestamps to support inclusion of nanoseconds in reference to FINRA Regulatory Notice <u>20-41</u> .
1.11	3/13/2023	Updated Regular Way and Seller's Option Days definitions for T+1 Settlement.
<u>1.11</u>	1/8/24	Updated the Reject Reason table to reflect 3-digit codes and revised reasons.
