2023 Annual Budget Summary

Each year, FINRA publishes an Annual Budget Summary describing how we plan to deploy our resources to meet our various regulatory responsibilities in the current year. The Annual Budget Summary complements FINRA’s audited Annual Financial Report, which summarizes our finances and operations over the prior year.

We developed the 2023 budget as part of a multiyear strategic framework designed to support our mission of protecting investors and promoting market integrity in a manner that facilitates vibrant capital markets. The budget is also consistent with FINRA’s Financial Guiding Principles, which are set forth in full below. The operating expenses projected in the budget reflect our continued commitment to strengthening our capabilities to fulfill long-standing regulatory responsibilities, address more recent expansions in the scope of our duties, meet new challenges arising in the markets and adapt to evolving workforce conditions. The budget, approved by the FINRA Board of Governors (Board) in December 2022, incorporates financial projections for 2023 as of that time.

As described in the Annual Budget Summary, FINRA’s 2023 operating revenues are projected to be $1,158 million, a six percent increase from 2022. Our projection for 2023 reflects the impact of previously announced fee increases, partially offset by projected decreases in trading volume and industry revenues, which drive certain fees FINRA collects from firms. As we have communicated in the past, FINRA’s multiyear strategic planning includes targeted fee increases that were detailed in advance, approved by the SEC in December 2020, and phased in over three years, beginning in 2022, to provide time for member firms to plan accordingly.

We project an increase in operating expenses during 2023 due to higher compensation costs as we face competitive labor markets, backfill vacancies and, where necessary, hire new staff to address the increased scope and challenges of our regulatory activities and responsibilities; increased expenses for technology, including costs to support new applications and processing of market volume, as well as to address cyber and information security needs; costs to implement recommendations to enhance our dispute resolution forum; and, as we engage in more in-person activities, increased travel and related expenses.

The Board approved approximately $100 million in capital initiative spending for 2023. We continue to focus on investments in operational efficiency and effectiveness and to improve the quality of regulatory and other programs (such as by modernizing the systems supporting our examination processes, Qualification Exam platform, FINRA Contact Center and Membership Application process). We also are addressing mandatory program enhancements required by technology obsolescence (such as by modernizing our Advertising Regulation and Corporate Financing platforms and retiring WebEFT), as well as regulatory requirements (such as by developing capabilities to support the oversight of securities-based swaps).
In addition, the Board approved approximately $90 million for one-time special projects that are anticipated to be infrequent in nature and not reflective of FINRA’s annual, recurring spending on capital initiatives. These key initiatives, all of which are multiyear, include revamping the technology we use in our Enforcement program, transforming FINRA’s advanced analytic capabilities and expanding investor education efforts. We expect to complete most of these projects over the next several years. In addition, the Board approved funding for renovations enabling us to downsize our corporate headquarters in Washington, D.C., and our Rockville, Maryland, offices. We expect to complete these renovations this year.

The 2023 budget continues to reflect the intentionally conservative methodology we have used in prior years, which assumes there are no fine monies available to support capital initiatives, and that there are no investment gains or losses on our financial reserves. Fine monies are excluded because we do not establish fine targets based on revenue considerations or otherwise. Under our Financial Guiding Principles, they are accounted for separately and their use must be approved by the Board or its Finance Committee for enumerated purposes. We published a separate report describing the use of fine monies from 2022, as we have for the last five years.

Based on this methodology, we expect to have an operating loss in 2023, with a potential drawdown of our reserves of about $220 million (referred to as the Potential Reserve Reliance). This potential loss is in line with our multiyear strategic planning for financial sustainability, as described in prior communications, which contemplates a series of annual losses as we reduce the size of our reserves. The Potential Reserve Reliance calculation helps us understand at the beginning of the year, for budgeting purposes, how reliant we may have to be on our reserves during the course of the year. Our actual 2023 net income or loss—which will be reflected in our 2023 Annual Financial Report—will ultimately include fines, investment returns and other accounting adjustments (as well as the financial performance of consolidated subsidiaries such as the FINRA Investor Education Foundation and FINRA CAT, LLC).

Member firms should be aware that the Consolidated Audit Trail, LLC (CAT LLC) has filed with the SEC a proposed funding model to allocate the costs of the Consolidated Audit Trail (CAT) among relevant market participants, including exchanges, FINRA and broker-dealers. If this CAT fee model is approved and becomes effective, FINRA will collect (and pay to CAT LLC) additional fees from member firms related to the cost of CAT, which could occur by late 2023. Additional information will be available once a CAT fee structure has been approved and becomes effective.

FINRA remains committed to properly funding our mission of protecting investors and promoting market integrity. We continue to welcome comments or suggestions from our member firms and other stakeholders regarding our financial transparency initiatives.
1. **Fund Our Mission** – As a not-for-profit organization, we target break-even cash flows that allow us to appropriately fund our mission of protecting investors and promoting market integrity while facilitating vibrant capital markets. Operating expenses are primarily funded through operating revenues. We rely on our financial reserves (discussed below) to support our mission, and draw upon the principal as needed.

2. **Ensure Financial Transparency** – We publish an Annual Financial Report that is prepared and presented in accordance with GAAP and audited by an independent public accounting firm. We also publish a top-line annual budget that demonstrates our primary sources of income and our primary expenses for the coming year. Following each fiscal year, we provide an accounting of the approved uses of fine monies (discussed below) during that year.

3. **Manage Expenses Responsibly** – We carefully manage expenses while ensuring that we can carry out our regulatory responsibilities effectively.

   3.1 **Compensation Oversight** – Our employees are our most important asset. We seek to offer compensation in line with the competitive market in order to attract, develop and retain high-performing individuals who can help us achieve our mission. The Board’s Management Compensation Committee reviews and approves the salary structure and the annual incentive compensation pool for the organization, as well as the individual incentive compensation awards for the most senior executives. Each year, the Committee provides a report that is included in our Annual Financial Report. Although a variety of factors are considered when determining compensation levels for individual employees and the organization as a whole, no compensation determinations are based on fines or other sanctions imposed on the industry.

   3.2 **Capital Initiatives Oversight** – Appropriate investments in capital initiatives to enhance our technology and regulatory capabilities are critical to our mission. These projects are non-recurring expenditures that improve the effectiveness and efficiency of our operations; they must undergo a senior management review and approval process, with projects above defined thresholds requiring special approval by the Board or its Finance, Operations and Technology Committee (Finance Committee). These projects fall into several categories:

   - **Capital** – Expenditures for items such as building/leasehold improvements or hardware/software (such as servers, storage devices or network equipment).
   - **Minor Enhancements** – Funding for minor enhancements to existing technology applications that provide moderate new functionality, features and improvements.
   - **Mandatory Initiatives** – Funding to address regulatory expectations driven by the SEC or other legal, regulatory, audit or contractual requirements; initiatives required by technology obsolescence (such as software no longer supported by vendors); and required infrastructure support (such as cybersecurity improvements).
   - **New Initiatives** – Investments in new systems or technology that will improve our regulatory capabilities or services. These initiatives are assessed for their contribution to our operational efficiency and effectiveness, including their ability to provide demonstrable improvements to the quality of FINRA’s regulatory program, tangible benefits for member firm compliance, or a measurable and acceptable financial return.
   - **Carryover Initiatives** – Projects in one of the former categories that carry over from a prior year are evaluated for continued funding.
4. **Maintain Reasonable Member Fee Levels** – We increase member fees only after evaluating other potential sources of funding (*including* drawing down on excess reserves) and determining that our expenses are appropriately calibrated to our regulatory responsibilities.

5. **Use Fines to Promote Compliance and Improve Markets** – When a member firm or registered representative engages in misconduct, restitution for harmed customers is our highest priority, although there are many cases in which it is not practical. We also assess whether a sanction should be imposed in order to discourage similar conduct by the firm, registered representative, or others. When we impose fines, the amounts are based on the facts and circumstances of the misconduct and the principles set forth in our Sanction Guidelines; fines are not based on revenue considerations, and we do not establish any minimum amount of fines that must be collected for purposes of our annual budget.

Fines collected are accounted for separately, and the use of these monies is subject to special governance procedures, restrictions on use and transparency requirements.

− Any use of fine monies, regardless of amount, must be separately approved by the Board or its Finance Committee. These monies are not considered in determining employee compensation and benefits.

− The Board or Finance Committee may authorize the use of these funds for: (i) capital/initiatives or non-recurring strategic expenditures that promote more effective and efficient regulatory oversight by FINRA (including leveraging technology and data in a secure manner) or that enable improved compliance by member firms; (ii) activities to educate investors, promote compliance by member firms through education, compliance resources or similar projects, or ensure our employees are highly trained in the markets, products and businesses we regulate; (iii) capital/initiatives required by new legal, regulatory or audit requirements; or (iv) replenishing reserves (described below) in years where such reserves drop below levels reasonably appropriate to preserve FINRA’s long-term ability to fund its regulatory obligations.

− On an annual basis, we make public a description of the Board or Finance Committee-approved uses of fine monies during the prior year.

6. **Sustain Appropriate Reserves** – We rely on our financial reserves, which originally derived from the sale of Nasdaq, to support our regulatory mission. We strive to maintain an appropriate level of reserves; currently, the Board believes that level is at least one year of expenditures. Reserves are invested at the direction of the Board’s Investment Committee, which provides a report that is included in our Annual Financial Report. The Board may draw upon the principal as needed, including to cover cash flow losses, defer fee increases, support FINRA’s regulatory operations, enhance member firm compliance or otherwise improve markets.

The FINRA Board will review these Principles every two years.
FINRA 2023 Annual Budget Summary

Budget summaries reflect management’s internal reporting framework and differ from U.S. generally accepted accounting principles (GAAP). Annual budgets are subject to change during the year as circumstances arise.

4. Other Regulatory Operations include the Office of General Counsel, Advertising Regulation, Corporate Financing, the Office of Hearing Officers, the Office of Member Relations and Education, the Office of Investor Education and other regulatory and support functions.
5. Operating Expenses reflect an allocation to each key function for compensation and benefits, professional and contract services, technology and occupancy, as well as costs attributed to other general and administrative services.
6. Regulatory Fees primarily include the Gross Income Assessment, Personnel Assessment and Trading Activity Fee.

7. User Fees primarily include Transparency Services Fees, Registration Fees, Qualification Fees, Dispute Resolution Fees, Corporate Financing Fees, Advertising Fees and Continuing Education Fees.

8. Contract Services Fees represent amounts charged for regulatory services provided primarily to markets operated by Nasdaq, NYSE, Cboe and other exchanges. These services include surveillance, investigations, examinations and disciplinary work. Contract Services Fees also include fees for the mortgage licensing system FINRA developed and maintains on behalf of the Conference of State Bank Supervisors, and fees for implementing and maintaining the Bluesheets system, eFOCUS and Form CRS on behalf of the SEC. Contract Services Fees cover the cost of the services being provided.

9. Compensation includes only non-Technology staff.

10. Technology includes costs for employees and contractors; security; and hardware, cloud hosting and software support required to maintain and operate the applications and environments that enable FINRA’s regulatory activities.

11. For purposes of this chart, Key Finance/Board Initiatives are included. Refer to the Financial Guiding Principles for a description of the different categories of Capital Initiatives.
2022 Actuals are preliminary and do not reflect final year-end adjustments.

### Historical Trends

#### Operating Revenues* 
FINRA derives over half of its revenues from industry fees that are assessed according to firms’ gross revenue and trading volume, as well as firms’ total number of registered representatives, while approximately 25 percent of FINRA’s revenues is driven from user fees, including registration fees and qualification fees. Operating revenue peaked in 2021 due to continued market volatility driving higher trading volume, as well as record-breaking public offering filing volume, but declined in 2022 as market volume settled and public offering filing volume returned to more normal levels. Operating revenue is expected to increase in 2023, primarily stemming from the second year impact of approved fee increases offset by a reduction in trading volume. More detail is available on the next page.

#### Operating Expenses* 
Ninety percent of FINRA’s operating expenses are driven by compensation and technology costs. Cost-saving efforts over the last five years have included managing compensation expenses and making process and other improvements in a manner designed to improve FINRA’s long-term financial sustainability without compromising the performance of our regulatory responsibilities. For example, all officer salaries were held flat in 2018 and 2021, and in 2020 we implemented a one-time voluntary retirement program designed in part to manage long-term compensation costs. In addition, we are continuing to identify opportunities to better leverage technology to do our work and become more efficient. Operating expenses increased in 2022 and are expected to increase in 2023, partially driven by annual compensation increases due to wage inflation and competitive labor markets, technology growth for new applications in production as well as market volume data growth increasing cloud hosting costs, and hiring additional staff to meet our increased regulatory responsibilities.

#### Capital Initiatives*12 
Capital initiative spending varies from year to year based on the need to enhance regulatory and related technology capabilities. We anticipate capital initiatives of $187.5 million for 2023, a significant increase from 2022, to support renovations of our down-sized D.C. and Maryland properties, regulatory operational improvements, regulatory oversight initiatives, enterprise-wide advanced analytics efforts and other new strategic opportunities.

* Historical results reflect internal management reporting and will differ from GAAP, which includes depreciation and other accounting adjustments.

12. Capital Initiatives spending also includes Key Finance/Board Initiatives.
Workforce

FINRA’s growth in headcount since 2019 is largely attributable to additional staff needed to support regulatory operations, in order to respond to the demands of an evolving marketplace and expansion in FINRA’s regulatory responsibilities. Headcount (excluding Technology) remained relatively flat from 2015 to 2020. In addition, approximately 250 contractors and temporary employees have been converted to full-time staff since 2019.

Historical Operating Revenue Trends

The following provides a five-year look back at the four fees that represent FINRA’s largest sources of operating revenue. 2022 Actuals are preliminary and do not reflect final year-end adjustments.

Trading Activity Fee
The Trading Activity Fee is a transaction-based fee that is assessed monthly on firm trading activity in covered securities across all markets. Increases since 2019 are driven by market volatility. Fees for 2022 and 2023 reflect approved fee changes, offset by a gradual decline in volume since the peak in 2021.

Gross Income Assessment
The Gross Income Assessment is an annual fee that is assessed based on the firm’s prior year’s total gross revenue less commodities revenue and is based on a tiered rate structure. Increases since 2018 were driven by an increase in firm revenues. Additionally, the 2022 and 2023 increases are driven by the approved fee changes.

Personnel Assessment
The Personnel Assessment is an annual fee that is assessed based on the firm’s number of registered representatives as of December 31 of the previous year and is applied to a regressive tiered rate structure. The 2022 and 2023 increases reflect the impact of approved fee changes.

# Key Functions

The 2023 budget is allocated according to the following key functions.13

### Member Supervision
FINRA's Member Supervision Department monitors and examines for member compliance with industry rules and regulations, and works to detect and address possible fraud or other misconduct.

### Market Regulation
FINRA's Market Regulation Department conducts automated surveillance and investigations of trading activity in U.S. equities, options and fixed income markets.

### Enforcement
FINRA's Enforcement Department investigates possible misconduct and brings disciplinary actions for violations of industry rules and regulations.

### Credentialing, Registration, Education and Disclosure
FINRA's Credentialing, Registration, Education and Disclosure Department operates FINRA's utilities to register and test securities industry personnel, and provides those same services under contract for the benefit of investment advisers and mortgage brokers.

### Transparency Services
FINRA's Transparency Services Department operates facilities that support the reporting and real-time dissemination of market information for over-the-counter (OTC) trading in the equity and fixed income markets including the Trade Reporting and Compliance Engine (TRACE).

### Dispute Resolution Services
FINRA's Dispute Resolution Services Department operates a dispute resolution forum for investors, brokerage firms and their registered employees, and administers arbitrations and mediations through a network of four regional offices, with 70 hearing locations, including one in each state and Puerto Rico.

### Other Initiatives
Other Initiatives include capital initiative projects and one-time Key Finance/Board initiatives. Capital Initiative projects are non-recurring expenditures that improve the effectiveness and efficiency of our operations, as well as the ongoing transformation of our regulatory programs. Key Finance/Board Initiatives reflect one-time special projects that are anticipated to be infrequent in nature and not reflective of FINRA's annual, recurring spending on capital initiatives.

### Other Regulatory Operations
FINRA's other regulatory operations include the Office of General Counsel, Advertising Regulation, Corporate Financing, the Office of Hearing Officers, the Office of Member Relations and Education, the Office of Investor Education and other regulatory and support functions.

### Corporate Financing
regulates corporate offerings to address fraudulent private placements and ensure underwriting compensation is fair.

### Advertising Regulation
oversees compliance with rules intended to ensure that member communications to the public are fair, balanced and not misleading.

### The Office of Hearing Officers
is an office of impartial adjudicators of disciplinary cases brought by FINRA's Enforcement Department against FINRA members.

### The Office of Member Relations and Education
is responsible for maintaining and enhancing open and effective dialogue with FINRA member firms, and oversees FINRA conferences and the FINRA Institute at Georgetown Certified Regulatory and Compliance Professional program.

### The Office of Investor Education
provides investors with financial tools and resources; and through the FINRA Investor Education Foundation®, FINRA supports important research and financial education initiatives.

### FINRA Investor Education Foundation
The Foundation empowers underserved Americans with the knowledge, skills and tools to make sound financial decisions throughout life. The Foundation supports innovative research and educational projects aimed at segments of the investing public that could benefit from additional resources.

### FINRA CAT, LLC
FINRA CAT, LLC acts as the Plan Processor of the Consolidated Audit Trail (CAT) system, the central repository of trades, quotes and orders for all U.S. exchange-listed and over-the-counter equity securities and U.S. exchange-listed options contracts across all U.S. markets and trading venues.

---

13. The 2023 budget by key function represents an allocation of operating expenses for compensation and benefits, professional and contract services, technology, and occupancy, as well as costs attributed to other general and administrative services.
