#### **Overview**

FINRA's Automated Data Delivery Service (FINRA ADDS) is a secure website through which firms can request transaction data submitted to TRACE, the Alternate Display Facility (ADF) or the OTC Reporting Facility (ORF) through the TRAQS system. By request, FINRA ADDS also can deliver monthly activity reports for TRACE securities as well as end-of-day TRACE dissemination files.

Firms may use ADDS data to help monitor their trading and reporting activity and support compliance procedures.

#### Access

FINRA ADDS offers two types of access:

#### **Web Access**

FINRA ADDS web site is accessible via Chrome, Edge, Firefox, or Safari.

#### **Trade Journals**

The FINRA ADDS website allows users with the TRACE, ADF, ORF and/or Clearing Firm Trade Journals entitlement privileges to request trade journals from any date within the past 2 years via the <u>FINRA ADDS</u> website. There is no fee for web access.

#### **TRACE Security Activity Report (TSAR)**

Subscribing users can access the TSAR monthly reports via the ADDS website. Subscribers to the report pay \$750 per month, unless the subscriber is a qualifying tax-exempt organization, in which case FINRA would charge \$250 per month.

#### **End-of-Day TRACE Transaction Files**

Subscribing users can download daily TRACE transaction files via the ADDS website. These files differ from the TRACE Trade Journals in that they contain all trades disseminated to the public, whereas the Trade Journals contain trades to which the requesting firm is a party (whether as the reporting, executing party or contra). These files are provided in data sets that correspond to the TRACE data feeds; i.e., ATDS for Agency data, BTDS for corporate bond trading activity, SPDS containing Securitized Products trades, and BTDS 144a and SPDS 144a, providing Rule 144a transactions within the BTDS and SPDS categories defined above. Subscribers are assessed \$750 per month per data set, unless the subscriber is a qualifying tax-exempt organization, in which case FINRA would charge \$250 per month per data set. Subscribers to the vendor real-time data feed(s) will not be charged a fee to receive the end-of-day TRACE Transaction file(s) for the feed(s) to which they subscribe.

#### **SFTP Access**

#### Data Delivery SFTP for Trade Journals

Firms that enroll in the SFTP service to receive Trade Journals for one or more products can establish an automated interface to retrieve their data via Secure File Transfer Protocol (SFTP). On a daily basis, FINRA makes the prior day's transaction and reject files available for SFTP retrieval for all firms that subscribe to this service. The SFTP services are fee-based; firms will be assessed a fee per MPID or Clearing Number enrolled in each service and product. <u>Read about fees</u> for the respective services below.

## Data Delivery SFTP for TRACE Security Activity Reports and/or End-of-Day TRACE Transaction Files

SFTP access is available to any firm subscribing to receive the End-of-Day TRACE Transaction files and/or TRACE Security Activity Reports. Once a firm has requested an SFTP account and the account and firm's Gateway IP address have been established, the firm's SFTP user can log in to retrieve the daily End-of-Day TRACE files, and/or the monthly TSAR files.

## **Enrollment**

#### Web Access Enrollment

Access to the FINRA ADDS website is available to firms for free, and all types of data are available for free via the website except for the TRACE Security Activity Reports and the End-of-Day TRACE Transaction files (those are purely subscription-based). Firms gain access via the <u>FINRA Entitlement</u> <u>Program</u>. Note: FINRA ADDS is separate from the TRAQS system. The user's TRAQS user ID and password will not work for FINRA ADDS.

Each FINRA Member Firm has a Super Account Administrator (SAA) that can grant trade journal access to users at the firm. To identify your firm's SAA: log into the <u>FINRA Firm Gateway</u>, click on My Account and view the information on the Applications & Administrators tab or call the FINRA Gateway Call Center at (800) 321-6273. Non-member firms need to establish an account administrator for FINRA ADDS that can set up user accounts for the firm.

To grant access to Trade Journals, the Account Administrator should give the users at least one MPID (a TRACE MPID for the TRACE trade journals and/or an Equity MPID for the ORF and/or ADF trade journals) and access to the appropriate trade journals entitlements in the FINRA ADDS section. Note: Clearing firm users do not need an MPID on their account, as their files are organized by Clearing Number.

Once access is granted, users can log into FINRA ADDS to request and download data.

To access the TRACE Security Activity Reports and/or the End-of-Day TRACE Transaction files via the web, firms must first contact the TRACE Data Services group to sign an agreement. The TRACE Data Services group may be reached by <u>email</u> or by phone at 888-507-3665.

## **Data Delivery SFTP Enrollment for Trade Journals**

Data Delivery SFTP enables firms to establish an automated interface to retrieve their data via Secure File Transfer Protocol (SFTP).

Enrollment in Data Delivery SFTP for Trade Journals is *optional*, and requires the firm to submit a FINRA ADDS Optional Services Request Form to establish a dedicated FTP user account. Data Delivery SFTP access is available for TRACE, ADF, ORF, and Clearing trade journals. A link to the request forms can be found at <u>www.finra.org/datadelivery</u>.

Firms need to submit a separate form for each reporting facility they wish to enroll an MPID or clearing number, and will be charged a monthly fee per facility. Fee information is available at <a href="https://www.finra.org/datadelivery/fees">www.finra.org/datadelivery/fees</a>, and in the <a href="https://www.finra.org/datadelivery/fees">Fee section</a> of this document.

Upon receipt of the Request Form, FINRA will enroll the firm in Data Delivery SFTP, create an FTP user account for the firm, and contact the submitter with the information regarding the new account. At that

point, FINRA will be able to establish SFTP access for the firm. **Please see the Access Data via SFTP** section below for more information on setting up your SFTP access.

Please note: the FTP account will only be able to access data made available for SFTP access; the firm will not be able to use the FTP user's ID and password to log into <u>https://myfiles.finra.org/myfiles-</u><u>ui/tradeJournals</u>. Since FTP users are intended for automated access, their passwords are not required to be reset every 120 days.

## Data Delivery SFTP Enrollment for TRACE Security Activity Reports and Endof-Day TRACE Transaction Files

Firms that wish to receive their TRACE Security Activity Reports and/or End-of-Day TRACE Transaction files via SFTP must first contact the TRACE Data Services group to sign an agreement. The TRACE Data Services group may be reached by <u>email</u> or by phone at 888-507-3665.

Upon receipt of the completed form, FINRA will create an FTP user account for the firm or modify an existing FTP user account, to provide access (note: this process can take up to 3 business days). FINRA will contact the submitter with the information regarding the new or updated account. The FTP user will then be able to set up his/her SFTP account. **Please see the Access Data via SFTP section below for more information on setting up your SFTP access.** 

## Access Data on the FINRA ADDS Website

## **File Availability**

FINRA ADDS data will be available via the new My Files service: https://myfiles.finra.org/myfiles-ui/tradeJournals

Trade Journals are made available on FINRA ADDS by 5 a.m. on the next day after the trade report date. For example, trades reported to ORF on a Friday will be available by 5 a.m. on Monday.

<u>Please note:</u> Occasionally, network maintenance is performed on Friday nights or Saturday mornings that may impact your ability to log in and retrieve your files. Whenever possible, we will notify firms in advance of maintenance work.

TRACE Security Activity Reports are also made available on the first business day of each month, for the month three months prior (i.e., October data will be available on the first day of the following February). Users will receive an email when each month's data becomes available.

The End-of-Day TRACE Transaction files will be available each trading day after 7:30pm.

#### **Request Files**

To request data, log into <u>FINRA ADDS</u>. The immediate view shows reports from the past 30 calendar days. Reports for the past 2 years are available by query. The default view of reports can be filtered by the following fields:

- 1. Start Date
- 2. End Date
- 3. Report Category

- 4. Firm ID
- 5. Request Type (different for each Report Category)
- 6. File Type (different for each Request Type)
- 7. You need to click Search button to apply the filters
- 8. You can sort the list by clicking on any of the column headers
- 9. Once you have located the file you need click the download 🚣 icon to save file to your machine

Start Date 7/12/2019	End Date 10/10/2019	2			
Report Category	3 Firm ID	Any Request Type	Any 6	Search 7	
CRD ID	Report Category	Firm ID	Request Type	File Type	Trade Report Da
9	Trace	JPMS	Corporate & Agency Debt	Trades	10/06/19
79	Trace	JPMS	Securitized Products	Trades	09/29/19
79	Trace	JPMS	Corporate & Agency Debt	Rejected	09/26/19
79	Trace	JPMS	Corporate & Agency Debt	Trades	09/26/19
79	Equity	JPMS	OTC Trade Reporting Facility	Rejected	09/26/19
79	Equity	BSSC	OTC Trade Reporting Facility	Rejected	09/26/19
79	Equity	JPMS	OTC Trade Reporting Facility	Trades	09/26/19
79	Equity	BSSC	OTC Trade Reporting Facility	Trades	09/26/19
79	Equity	BEST	OTC Trade Reporting Facility	Trades	09/26/19
79	Trace	JPMS	Securitized Products	Trades	09/26/19

#### **Access Data via SFTP**

Firms that sign up for Data Delivery SFTP access have a **dedicated user account** created specifically for accessing the files via SFTP. That account will be able to log in programmatically to retrieve files, but will not be able to log into the FINRA ADDS website. Please note: SFTP files are retained in their delivery folders for 30 days after which they are deleted.

## **SFTP Set-Up Process**

To set up your firm to retrieve data via SFTP, you will need to follow these steps:

- For Trade Journal access, submit the appropriate form on the <u>How to Request Access Page</u> to request a dedicated FTP user account.
   For access to the TRACE Security Activity Report and/or End-of-Day TRACE Transaction files, contact the TRACE Data Services team at 888-507-3665 or via email.
- 2. Send your firm's Gateway IP address to <u>datadelivery@finra.org</u> so that FINRA can associate your firm with our firewall. **This should be your firm's externally visible IP.** (*If applying for TSAR or End-of-Day TRACE Transaction files, you should already have provided this information on the*

agreement and do not have to provide it again.) FINRA will then set up your firm's SFTP account for access and notify you when that process is complete. Note: this process will take several days at minimum, and may take longer if there are issues with the IP address provided.

- 3. Change the temporary password provided by the Entitlement Group and choose a permanent password. FTP users should log into: <u>https://accountmgmt.finra.org/myews/</u> to update their passwords (this cannot be done via the FINRA SFTP site). Since FTP users are intended for automated access, passwords are not required to be reset every 120 days. Once the user has updated his/her password, he/she will see an Access Denied page. At that point, the browser can be closed.
- 4. Connect via SFTP using connection information provided in the fileX user guide: <u>https://www.finra.org/sites/default/files/fileX\_User\_Guide.pdf</u>
- 5. Download your files. Reports previously located in a single **tradejournals/out** folder will be split by types into separate folders listed below and will have your CRD ID at the root (shown below as XXXXX). You will need to integrate with folders depending on the report type(s) you're interested in.

Alternate Display Facility Rejected	XXXXX/tradejrnls/equity_adf
Alternate Display Facility Trades	XXXXX/tradejrnls/equity_adf

Security Activity Report without CUSIP	XXXXX/tradejrnls/tsar
Security Activity Report with CUSIP	XXXXX/tradejrnls/tsarc

Questions regarding the SFTP set-up process may be directed to datadelivery@finra.org.

#### **SFTP Data Delivery**

Trade journal files will be delivered to your firm's folder daily for each MPID or clearing number you have enrolled in one of the Data Delivery SFTP services. FINRA will deliver both the Trades and, if applicable, Rejects files for every date on which the enrolled firm has data. If your firm has no transactions or rejects of either type for a date, you will not receive any files for that date.

TRACE Security Activity Reports will be delivered monthly when they become available, to all subscribers. Users that have not opted out of email notification will receive an email when the report is available for retrieval.

End-of-Day TRACE Transaction data will be delivered daily. No email notification will be sent when the daily files are available.

#### **File Format**

Trade journal files, End-of-Day TRACE Transaction files, and TSAR Monthly files are made available in .zip format. Many systems allow users to open .zip files without requiring any additional software. Simply double-click the zip file to extract your data file.

Please note: When opening files in Excel, dates, CUSIPs, and other fields may be auto-formatted and display differently than intended. If viewing the data in Excel, you may wish to set formatting on those fields to Text rather than General so that the fields are not mis-formatted.

If your system does not permit you to open a .zip file, you may need to download a compression program (such as WinZip, available free of charge). If your firm blocks access to .zip files, you can save your files with a different extension to access them. Contact your firm's technology support for assistance.

#### **File Naming Convention**

The files will be named per the following convention, where TR is the trades file and RJ is the rejects file:

TRACE Files for Corporate and Agency trades: CA\_TR\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip CA\_RJ\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip TRACE Files for Securitized Products trades: SP\_TR\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip SP\_RJ\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip TRACE Files for Treasury trades: TS\_TR\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip TS\_RJ\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip ORF Files: ORF\_TR\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip ORF\_RJ\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip Clearing Files:

CTO\_TR\_<ClearingNumber>\_<YYYYMMDD>\_<Seq#>.zip ADF Files:

ADF\_TR\_<MPID>\_<YYYYMMDD>\_<Seq#>.zip ADF RJ <MPID> <YYYYMMDD> <Seq#>.zip

ADF\_RJ\_<IVIPID>\_<1111 IVIVIDD>\_<Seq#>.

TRACE Monthly Security Activity Reports:

TSAR\_Monthly\_<CUSIP or NOCUSIP>\_<YYYYMMDD>.zip

End-of-Day TRACE Transactions

MPPBTDSS\_<CUSIP or NONCUSIP>\_<YYYYMMDD>.zip MPPATDSS\_<CUSIP or NONCUSIP>\_<YYYYMMDD>.zip MPPSPDSS\_<CUSIP or NONCUSIP>\_<YYYYMMDD>.zip MPPBT14S\_<CUSIP or NONCUSIP>\_<YYYYMMDD>.zip MPPSP14S\_<CUSIP or NONCUSIP>\_<YYYYMMDD>.zip

## **File Contents**

#### **TRACE Trades File**

The **TRACE Trades** files contain all transaction reports for the type (Corporate and Agency (CA), Securitized Products (SP), or Treasuries (TS)) and date requested where the selected MPID was present in any of the following fields:

- Reporting Party (RPID)
- Reporting Party Give Up (RPGU)
- Contra Party (CPID)
- Contra Party Give Up (CPGU)

The Trades files contain new transactions, correction submissions, cancelations and reversals. The last row in the file will contain a count of the number of trade records included in the file. The following fields are provided in the file:

Column	Description	Data Type/Possible Values
Trade Report Date	The date the transaction was reported to TRACE	MM/DD/YYYY
Trade Report Time	The time the transaction was reported to TRACE	HH:MM:SS – format for CA & SP HH:MM:SS.TTTTTT – format for TS
Sub Product	The sub-product of the security being traded.	Values: CORP, AGCY, ELN, CHRC, <u>SOVN (Effective</u> <u>11/6/2023),</u> ABS, ABSX, MBS, CMO, TBA, BILL, NOTE, STRP, TIPS
Trade Status	Indicates the status of the trade: T = Newly Reported Trade X = Canceled C = Correction Canceled – the canceled portion of a trade that was modified R = Correction New Trade – represents the new trade resulting from a trade correction Y = Reversal If a trade was submitted and then canceled or corrected, each version of the trade that occurred on this date is included in this file.	Values: T, X, C, R, Y

Side	Indicates whether the trade was reported as a buy or a sell	Values: B, S
Symbol	The symbol of the security reported	Varchar(14)
CUSIP	The CUSIP of the security reported	Varchar(9)
Quantity	Displays the quantity reported in the trade (in dollar amount)	Numeric(13,2)
Price	Displays the price at which the trade was executed	Numeric(12,6) for TRACE CA, SP Numeric(15, 11) for TRACE TS
Price Type	Specific to TRACE for Treasuries files, indicates the type of price reported: D = Decimal Y = Yield N = Negative Yield	Values: D, Y, N
Price Override	Indicates if a price override was used to process the trade report	Values: O, null
When Issued	Specific to TRACE for Treasuries files, indicates if the trade was executed before the issuance of the security.	Values: Y, N
Reporting Party ID	The identifier of the party reporting the trade	Varchar(6)
Reporting Party Give Up	If the reporting party submitted the trade on behalf of the executing firm, this is the executing firm that the reporting party "gave up" on the trade report.	Varchar(6)
Reporting Party Capacity	Indicates whether the firm executed the trade for its own account (P for Principal) or for a third party (A for Agent)	Values: P, A
Reporting Party Clearing Number	The Clearing number of the firm reporting the trade. This field is not required.	Varchar(4)
Contra Party	The party on the other side of the trade. Contra parties that are non-FINRA member firms will be identified with a C for customer.	Varchar(6)
Contra Party Give Up	The give-up identifier (if entered) for the contra party to the trade. This field will only appear if the trade is locked in.	Varchar(6)
Contra Capacity	The capacity (Principal or Agent) for the contra party to the trade. This field will only appear if the trade is locked in.	Values: P, A
Contra Party Clearing Number	The clearing number for the contra party to the trade. This field will only appear if the trade is locked in.	Varchar(4)
Locked In Indicator	A Y in this column indicates that the trade is locked-in and satisfies both sides (Buy and Sell) of the trade reporting requirement.	Values: Y, null
As Of Indicator	A Y in this column indicates that the trade was reported as an as-of report.	Values: Y, null
Execution Date	The date the trade was executed	MM/DD/YYYY
Execution Time	The time the trade was executed	HH:MM:SS – format for CA & SP HH:MM:SS.TTTTTT – format for TS

Trade Mod 2	For ABS trades ndicates whether the ABS trade was executed in the Primary (P) or Secondary (S) market. Used to indicate a Hedged treasury trade.	Values: P (ABS Only), S (ABS Only), H (Treasury) Null (all other sub-products)
Trade Mod 3	This field includes any system-assigned values indicating that the trade was executed outside of normal market hours and/or was reported late: T = trade reported outside normal market hours Z = trade reported during normal market hours and late U = trade reported outside normal market hours and late	Values: T, Z, U, null
Trade Mod 4	This field includes any modifier provided on the trade report. For Securitized Products transactions, possible values are: O = Specified Pool Transaction N = Stipulation Transaction D = Dollar Roll without Stipulation L = Stipulated Dollar Roll W = Weighted Average Price For Corporate & Agency Debt transactions, possible value is: <u>P=Portfolio Trade (effective 5/15/2023)</u> W = Weighted Average Price For Treasuries transactions, possible values are: W = Weighted Average Price S = transaction is part of a series of transactions and may not be priced based on the current market B = transaction is part of a series of transactions where one or more transactions involve a futures contract	Values: O, N, D, L, W, S, B, null
Settlement Date	The date the transaction is reported to settle	MM/DD/YYYY
Seller's Commission	The dollar amount charged as commission on the sell side	Numeric(8,2)
Buyer's Commission	The dollar amount charged as commission on the buy side	Numeric(8,2)
Branch Sequence Number	An in-house reference number assigned to the trade by the Reporting Party	Varchar(8)
Contra Branch Sequence Number	The reference number assigned to the trade by the contra party. This field will only appear if the trade is locked in.	Varchar(8)
Memo	This field may be used for internal purposes by the reporting firm.	Varchar(10)
Factor	A decimal representing the factor reported on the trade. This field applies to Securitized Products transactions only.	Numeric(13,2)

Calculated Yield	Displays the yield reported on the trade. This field applies to Corporate and Agency transactions only.	Numeric(12,6)
Special Processing Flag	Indicates if the trade report was designated as a position transfer.	Values: 3, P, A, null
Special Price Indicator	A Y in this column indicates that the firm set the Special Price flag when reporting this transaction.	Values: Y, null
Special Price Memo	This is a required field when Special Price = Y, and is used by the reporting firm to provide the reason for the Special Price indicator.	Varchar(50)
Method of Entry	Indicates whether the trade was submitted via the TRAQS Web Site (W), CTCI (C), FIX (F), B (Batch File), or Multi-Entry (G).	Values: C, W, F, B, G
Trading Market Indicator	Indicates whether the trade was submitted as a P1 or S1. This field applies to Corporate and Agency transactions only.	Values: P1, S1, null
Control Date	The date the trade was reported. A trade is uniquely identified by Control ID + Control Date. In the case of a cancelation or correction, this is the date the cancelation or correction was reported, and prior trade control date will contain the date the trade being canceled or corrected was originally submitted.	MM/DD/YYYY
Control Number	The reference number of the transaction, provided by TRACE.	Bigint
Prior Control Date Prior Control	This is populated on cancelations and corrections, and is the date the trade being canceled or corrected was originally submitted. This is populated on cancelations and	MM/DD/YYYY Bigint
Number	corrections, and is the reference number of the prior transaction (i.e., the transaction being subsequently canceled or corrected).	
Executing Client Trade Identifier	An optional user-defined trade reference number which may be used by firms to perform trade management.	Varchar(20)
Contra Client Trade Identifier	The contra party's internal user reference number for the trade report. This field will only appear if the trade is locked in.	Varchar(20)
Reversal Indicator Submitting Firm	A Y in this column indicates that the transaction was a reversal of a previous submission. The entity that entered the trade. The trade may be entered by the responsible ( <i>i.e.</i> , executing) party, a give-up firm, a firm you have an agreement with or a service bureau. This value will differ from reporting party when a service bureau submits the trade on the reporting party's behalf.	Values: Y, null Varchar(6)
Web User ID	The I1I2 code of the terminal where the trade was entered.	Varchar(20)

No Remuneration Indicator	Indication of whether the trade does or does not include remuneration.	Values: N, null
ATS Execution MPID	If the firm indicated the trade was executed on an ATS, this is the MPID associated with the ATS.	Varchar(6)
Match Status (effective 2/4/2019)	Indicates whether the trade has matched (M). If a trade was matched and subsequently unmatched due to one side correcting or canceling the trade, the status will be U (unmatched). If the trade has never matched, this field will be null. NOTE: if your trade was matched and has subsequently unmatched, you will see the trade repeated in the file, showing both the original M status and the subsequent U status. If your trade was matched and your firm or the contra party subsequently canceled one side, the file will contain several versions of the trade reports: the trade reports with Match Status of M, the same trade reports with Match Status of U to show that they unmatched, and then the trade report with a status of cancelled.	Values: M, U, null
Match Date (effective 2/4/2019)	The date the Match Status was applied.	MM/DD/YYYY
Match ID (effective 2/4/2019)	The ID linking the two matched trades.	Numeric

#### **TRACE Rejects File**

The **TRACE** Rejects files contain all transaction reports for the type (Corporate and Agency (CA), Securitized Products (SP), or Treasuries (TS)) and date requested where the selected MPID was the submitting firm. The last row in the file will contain a count of the number of reject records included in the file. Note: data type is not included below as non-conforming information may be the cause of the reject. The following fields are provided in the file:

Column	Description
Trade Report Date	The date the rejected transaction was submitted to TRACE
Trade Report Time	The time the rejected transaction was reported to TRACE
Sub Product	The sub-product of the rejected transaction. For Securitized Products files, this field will contain ABS, ABSX, MBS, CMO or TBA. For Corporate & Agency Debt files, this field will contain CORP, AGCY, ELN, CHRC, or SOVN (Effective 11/6/2023). For Treasury files, this field will contain BILL, NOTE, STRP or TIPS
Reject Status	Identifies the current state of the reject: J = Rejected - indicates that the transaction is available for follow-up action P = Repaired - indicates that the transaction has been successfully repaired F = Repair Failed - indicates that an unsuccessful attempt was made to repair the transaction Z = Closed - indicates that the reject was closed by an unsuccessful repair or a close request
Side	Indicates whether the rejected transaction was reported as a buy or a sell.
Symbol	The symbol of the security reported

CUSIP	The CUSIP of the security reported
Quantity	Displays the quantity reported in the rejected transaction (in dollar amount).
Price	Displays the price at which the trade was executed.
Price Override	Indicates if a price override was used to attempt to process the rejected
	transaction.
Reporting Party ID	The identifier of the party reporting the transaction
Reporting Party Give Up	If the reporting party submitted the transaction on behalf of the executing firm, this is the executing firm that the reporting party "gave up" on the rejected transaction report.
Reporting Capacity	Indicates whether the firm executed the trade for its own account (P for Principal) or for a third party (A for Agent).
Reporting Party Clearing Number	The clearing number of the firm reporting the transaction. This field is not required.
Contra Party	The party on the other side of the trade. Contra parties that are non-FINRA member firms will be identified with C for customer.
Contra Party Give Up	The give-up identifier (if entered) for the contra party to the trade. This field will only appear if the trade is locked in.
Contra Capacity	The capacity (Principal or Agent) for the contra party to the trade. This field will only appear if the trade is locked in.
Contra Party Clearing Number	The clearing number for the contra party to the trade. This field only appears if the trade is locked in.
Locked In Indicator	A Y in this column indicates that the transaction is locked-in and would satisfy both sides (Buy and Sell) of the trade reporting requirement if successfully submitted.
As Of Indicator	A Y in this column indicates that the trade was reported as an as-of report.
Execution Date	The date the trade was executed
Execution Time	The time the trade was executed
Trade Mod 1	This field is not applicable to bond reporting.
Trade Mod 2	Applies to ABS trades only; indicates whether the ABS trade was executed in the Primary (P) or Secondary (S) market.
Trade Mod 3	Rejected transactions are not evaluated for timeliness; therefore, this field is not applicable.
Trade Mod 4	This field includes any modifier provided on the transaction. For Securitized Products transactions, possible values are: O = Specified Pool Transaction N = Stipulation Transaction D = Dollar Roll without Stipulation L = Stipulated Dollar Roll W = Weighted Average Price For Corporate & Agency Debt transactions, possible value is: <u>P=Portfolio Trade (Effective 5/15/2023)</u> W = Weighted Average Price For Treasuries transactions, possible values are: W = Weighted Average Price S = transaction is part of a series of transactions and may not be priced based on the current market B = transaction is part of a series of transactions where one or more transactions involve a futures contract
Settlement Date	The date the transaction is reported to settle
Seller's Commission Buyer's Commission	The dollar amount charged as commission on the sell side The dollar amount charged as commission on the buy side

Branch Sequence Number	An in-house reference number assigned to the trade by the reporting party
Contra Branch Sequence Number	The reference number assigned to the trade by the contra party. This field will only appear if the trade is locked in.
Memo	This field may be used for internal purposes by the reporting firm.
Factor	A decimal representing the factor reported on the trade. This field only applies to Securitized Products transactions.
Price Type	Specific to TRACE for Treasuries files, indicates the type of price reported: D = Decimal Y = Yield N = Negative Yield
Special Processing Flag	Indicates if the transaction was designated as a position transfer.
Special Price Indicator	A Y in this column indicates that the firm set the Special Price flag when attempting to report this transaction.
Special Price Memo	This is a required field when Special Price = Y, and is used by the reporting firm to provide the reason for the Special Price indicator.
Method of Entry	On rejects, this is a code indicating how the rejected trade was sent into the system.
Trading Market	Indicates whether the transaction was submitted as a P1 or S1. This field only
Indicator	applies to Corporate and Agency transactions.
Control Date	The date the transaction report was entered in TRACE. A trade is uniquely identified by Control ID + Control Date. In the case of a cancelation or correction, this is the date the cancelation or correction was reported, and prior trade control date contains the date the trade being canceled or corrected was originally submitted.
Control Number	The reference number of the rejected transaction, provided by TRACE
Prior Control Date	Populated on rejections of corrected submissions, and is the date the trade being canceled or corrected was originally submitted.
Prior Control Number	Populated on cancelations and corrections, and is the reference number of the prior transaction ( <i>i.e.</i> , the transaction being subsequently canceled or corrected).
Executing Client Trade Identifier	An optional user-defined trade reference number that may be used by firms to perform trade management
Contra Client Trade Identifier	The contra party's internal user reference number for the trade report. This field will only appear if the trade is locked in.
Reversal Indicator	A Y in this column indicates that the transaction was a reversal of a previous submission.
Submitting Firm	The entity that entered the trade. The trade may be entered by the responsible ( <i>i.e.</i> , executing) party, a give-up firm, a firm you have an agreement with, or a service bureau. This value differs from reporting party when a service bureau submits the trade on the reporting party's behalf.
Web User ID	The I1I2 code of the terminal where the trade was entered
Reject Code	The reject code associated with the transaction
Reject Description	The reason the transaction was rejected
Repair Control Number	The control number assigned to the successful repair of a rejected transaction
Next Reject Control Number	The control number assigned when an attempt to repair a reject fails

## **ORF Trades File**

The **ORF Trades** file contains the transactions reported for the requested date where the requesting MPID is present in any of the following fields:

- Reporting Party Reporting Party Give Up
- Contra Party
- Contra Party Give Up

The Trades files contain new transactions, correction submissions, cancelations, and reversals. The last row in the file will contain a count of the number of trade records included in the file. The following fields are provided in the file:

Column	Description	Data Type/Possible Values	
Symbol	The ticker symbol of the security reported	Varchar(14)	
Suffix	The suffix assigned to the security symbol in the transaction, if applicable	Varchar(7)	
Reporting Party (RPID)	The identifier of the party reporting the trade	Varchar(6)	
Reporting Party Capacity	Displays the capacity of the reporting party: P = Principal A = Agency R = Riskless Principal This field will not be visible by the party on the contra side of the transaction.	Values: P, A, R	
Trade Report Date	The date the trade was reported to ORF	YYYY-MM-DD	
Trade Report Time	The time the trade was reported to ORF	HH:MM:SS.mmm:nnnnn	
Execution Time	The execution time reported on the transaction by the reporting party	HH:MM:SS.mmm:nnnnn	
Reporting Party Give Up (RPGU)	If a firm is being given up as the reporting executing firm, this will be the MPID of the executing party on the reporting side.	Varchar(6)	
As Of Indicator	A Y in this field indicates that the trade was reported on a date other than the date the trade was executed. An R in this field indicates that the trade is a reversal.	Values: Y, R, null	
Side	Indicates whether the trade was reported as a: B = Buy S = Sell X = Cross	Values: B, S, X	
Quantity	Trade volume as number of shares; max 8 characters, no decimal	Bigint	
Price	Trade price. Can be a decimal unit price (D) or contract amount price (C). Price type field identifies the type of price entered.	Numeric(12,6) if price type = D, Numeric(12,2) if price type = C	
Clearing Price	Trade price inclusive of explicit fee. Note: if explicit fee = 0.00, this field will be null.	Numeric(16,6)	
Explicit Fee	If there is an explicit fee on the trade, this is the explicit fee amount.	Numeric(16,2)	
Price Type	Indicates the type of price entered. C = Contract Amount D = Decimal Unit Price	Values: C, D	
Contract Amount	The contract amount of the trade (i.e., price x quantity)	Numeric(16,2)	

Clearing Contract Amount	Clearing price * quantity if clearing price exists, otherwise contract amount	Numeric(16,2)
Price Override	An O in this field indicates that a price override was used to process the transaction.	Values: O, null
Short Sale Indicator	Indicates if the trade was submitted with the sold short (S) or sold short exempt (E) indicator. This field will not be visible by the clearing firm on the buy side of the transaction unless the trade was locked in, a tape only, or an audit trail only submission.	Values: S, E, null
Method of Entry	Indicates whether the trade was submitted via the TRAQS Web Site (W), CTCI (C), FIX (F), or B (Batch File).	Values: W, C, F, B
Status	Indicates the status of the record: T = new trade C = canceled portion of corrected trade R = new (corrected) portion of corrected trade X = canceled trade Y = reversal	Values: T, C, R, X, Y
Matched Status	Indicates the match status of the record: D = Declined B = Break Pending K = Broken M = Matched by Acceptance C = Matched by Comparison L = Matched by Auto-Lock	Values: D, B, K, M, C, L, null
Prior Control Date	On a trade that has been canceled or corrected, this is the date the original trade was submitted.	YYYY-MM-DD
Prior FINRA Control Number	On a trade that has been canceled or corrected, this is the control number of the original submission. Max size: 18 characters	Bigint
Contra Party (CPID)	MPID on the other side of the trade. A C in this field indicates that the contra party is not a FINRA member firm.	Varchar(6)
Reported Volume	Quantity disseminated	Varchar(14)
Reported Price	Price disseminated	Decimal(16,6)
Contra Capacity	Displays the capacity of the contra party: P – Principal A – Agency R – Riskless Principal This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Values: P, A, R
<b>Execution Date</b>	The date the trade was executed	YYYY-MM-DD
Contra Party Give Up (CPGU)	If a firm is being given up as the contra executing firm, this will be the MPID of the executing party on the contra side.	Varchar(6)
System Assigned Publish Indicator	A Y in this field indicates that the trade was reported to the tape.	Values: Y, N

Publish	A Y in this field indicates that the reporting firm indicated	Values: Y, N
Indicator	the trade was for publication.	Distint
Match Control Number	Identifier assigned by the system to trades that have been matched. Max size: 18 characters	Bigint
Match	Indicates when the trades were matched	YYYY-MM-DD
Timestamp	indicates when the trades were matched	HH:MM:SS.mmm:nnnnn
Accept Time	Indicates when the Accept was received	HH:MM:SS.mmm:nnnnn
Decline Time	Indicates when the trade was declined	HH:MM:SS.mmm:nnnnn
Break Time	Indicates when matched trade is canceled by one party,	HH:MM:SS.mmm:nnnnn
	resulting in a Matched Status of Break Pending.	
Broken Time	Indicates when matched trade is broken, i.e., both	HH:MM:SS.mmm:nnnnn
	parties have canceled the trade.	
Branch	Internal reference number assigned to the trade by the	Varchar(8)
Sequence	submitting firm. This field will not be visible by the party	
Number	on the contra side of the transaction.	
Reversal Indicator	A Y in this field indicates that the trade has been reversed.	Values: Y, N
Special	A value in this field indicates that the transaction has	Values: Y, N, O, null
Processing	been submitted for special processing:	
Flag	N or null = No Special Processing	
	Y = Position Transfer	
Onesial	O = Clearing-Only, Non-Regulatory Report	
Special Instructions	A value in this field indicates that there are special instructions on the transaction:	Values: null, I, S, Y, X, J, A, B
Indicator	Null = Regular	А, В
mulcator	I = Step In trade	
	S = Step Out trade	
	Y = Special trade	
	X = Special and Step Out trade	
	J = Special and Step In trade	
	A = Step Out trade with Fees	
	B = Special and Step Out trade with Fees	
Clearing	A 0 in this field means the trade was sent to clearing; a 1	Values: 0, 1
Indicator	means it was not.	
Control Date	The date the transaction was received in the system.	YYYY-MM-DD
FINRA Control	The unique identifier assigned to the trade by the	Bigint
Number	system. Max size: 18 characters	Digint
Cancel Receipt	Populated on cancellation records, this is the time the	HH:MM:SS.mmm:nnnnn
Time	trade cancellation was received by the system.	
FINRA Trade	Assigned and disseminated by the system if the trade	Values: T, Z, U, null
Mod 3	meets one of these conditions:	
	T = Trade was executed outside normal market hours	
	Z = Trade was executed during normal market hours and	
	reported late	
	U = Trade was executed outside normal market hours	
	and reported late	
	If the trade is published, this will be the modifier disseminated on the trade message.	
FINRA Trade	Assigned and disseminated by the system if the trade	Values: W, P, I, null
Mod 4	meets one of these conditions:	
	W = Weighted Average Price or Stopped Stock	
	P = Prior Reference Price	

	I = Odd Lot	
Trade Mod 1	Settlement modifier on the trade as submitted by reporting firm: @ = Regular C = Cash N = Next Day R = Seller's Option	Values: @, C, <del>N,</del> R, null <u>Effective with change to</u> <u>T+1 regular way</u> <u>settlement (date TBD),</u> "Next Day" will no longer
Trade Mod 3	Submitted by reporting firm if the trade meets one of	<u>be a valid Settlement</u> <u>Modifier.</u> Values: T, Z, U, null
	these conditions: T = Trade was executed outside normal market hours Z = Trade was executed during normal market hours and reported late U = Trade was executed outside normal market hours and reported late	
Trade Mod 4	Submitted by reporting firm if the trade meets one of these conditions: W = Weighted Average Price S = Stopped Stock P = Prior Reference Price X = Trade related to Options Exercises R = Trade Price Unrelated to Current Market	Values: W, S, P, X, R, null
Trade Mod 4 Time	This is the time associated with Prior Reference Price or Stopped Stock trade.	HH:MM:SS.mmm:nnnnn
Seller Days	If Trade Modifier 1 is Sellers Option, this field shall contain the days to settlement. If Trade Modifier 1 is not R (Sellers Option) the value in this field should be ignored.	Values: 02-60, null Note: 02 will no longer be a valid value effective September 2017
		Effective with change to <u>T+1 regular way</u> <u>settlement (date TBD).</u> <u>02 will again be a valid</u> <u>seller's option value.</u>
Related Market Indicator	Represents the market center for the trade: F = foreign market O = unknown market center U = unspecified multi market trades 0 = ADF/ORF	Values: F, O, U, 0, null
Contra Branch Sequence Number	Internal reference number assigned to the trade by the contra firm. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(8)
Reporting Party Clearing Number	Identifier for the clearing firm associated with the reporting party.	Varchar(4)
Contra Clearing Number	Identifier for the clearing firm associated with the contra party.	Varchar(4)
Locked-In Indicator	A value in this field indicates that the trade was locked-in at submission: A = AGU	Values: A, Q, null

	Q = QSR	
Reporting Obligation	A Y in this field indicates that the trade report is the submission from the member with the trade reporting obligation.	Values: Y, N
Settlement Date	The date the trade is reported to settle	YYYY-MM-DD
Trade Reference Number	Trade Reference Number used to tie a Tape eligible trade to one or more non-Tape eligible trades.	Varchar(20)
OATS Identifier	Order audit trail reference number associated with the transaction. This field will not be visible by the party on the contra side of the transaction.	Varchar(20)
Contra OATS Identifier	Order audit trail reference number for the contra party associated with the transaction. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(20)
Memo	Used for firm internal memo purposes. This field will not be visible by the party on the contra side of the transaction.	Varchar(10)
Contra Memo	Used for firm internal memo purposes by the contra firm. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(10)
Client Trade ID	The trade reporting party internal user reference number for the trade report. This field will not be visible by the party on the contra side of the transaction.	Varchar(20)
Contra Client Trade ID	The contra party internal user reference number for the trade report. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(20)
Reference Reporting Facility	Populated only on reversals, to indicate on what facility the original transaction being reversed was entered: A = ADF Q = FINRA/NASDAQ TRF N = FINRA/NYSE TRF	Values: A, Q, N, null
Submitter	The Web User ID, if the source is W, or the I1I2 address, if the source is C or F, of the person or terminal that entered the trade. This field will only be visible to the firm that submitted the trade.	Varchar(20)

#### **ORF Rejects File**

The **ORF Rejects** file contains all transaction reports for the date requested where the selected MPID was the submitting firm. The last row in the file will contain a count of the number of reject records included in the file. Note: data type is not included below as non-conforming information may be the cause of the reject. The following fields are provided in the file:

Column	Description
Reject Time	The time the transaction was rejected.
Reject	The reject code associated with the transaction
Reason	Max size: 3 characters
Code	Code Description

1	TRFMC IS MISSING

Reject The	
Control Ma Number	e system-assigned identifier for the reject ax size: 10 characters
Status J - P - F -	e current state of the reject: Rejected - Repaired - Repair Failed - Closed
Type OT OT OT OT OT	dicates the status of the rejected transaction: TIT = Trade Entry TIX = Cancel TIR = Correction TIY = Reversal TIA = Accept TID = Decline
Client The Trade Identifier	e trade reporting party internal user reference number for the trade report.
Side Ind	dicates whether the rejected transaction was reported as a Buy (B), Sell (S) or Cross (X)
	e ticker symbol of the security reported
	e suffix assigned to the security symbol in the rejected transaction, if applicable
Quantity Tra	ade volume as number of shares
	ade price. Can be a decimal unit price or contract amount price. Price type field identifies e type of price entered.
Reporting The Party (RPID)	e identifier of the party reporting the trade
	a firm is being given up as the reporting executing firm, this will be the MPID of the ecuting party on the reporting side.
	PID on the other side of the trade. A C in this field indicates that the contra party is not a NRA member firm.
	a firm is being given up as the contra executing firm, this will be the MPID of the ecuting party on the contra side.
Executio The n Date	e date the trade was executed
n Time	e execution time reported on the transaction by the reporting party
of Entry CT	dicates whether the rejected transaction was submitted via the TRAQS Web Site (W), CI (C), FIX (F), or Batch File (B).
Center	presents the market center for the trade
Locked In A v	value in this field indicates that the transaction was locked-in at submission.

## **Clearing Trades File**

The **Clearing Trades** file contains the transactions reported for the requested date where the requesting clearing identifier is present in the Reporting Clearing Number or Contra Clearing Number field:

The Trades files contain new transactions, correction submissions, cancelations, and reversals. The last row in the file will contain a count of the number of trade records included in the file. The following fields are provided in the file:

Column	Description	Data Type/Possible Values
Symbol	The ticker symbol of the security reported	Varchar(14)
Suffix	The suffix assigned to the security symbol in the transaction, if applicable	Varchar(7)
Reporting Party (RPID)	The identifier of the party reporting the trade	Varchar(6)
Reporting Party Capacity	Displays the capacity of the reporting party: P = Principal A = Agency R = Riskless Principal This field will not be visible by the party on the contra clearing side of the transaction.	Values: P, A, R
Trade Report Date	The date the trade was reported to ORF	YYYY-MM-DD
Trade Report Time	The time the trade was reported to ORF	HH:MM:SS.mmm:nnnnn
Execution Time	The execution time reported on the transaction by the reporting party	HH:MM:SS.mmm:nnnnn
Reporting Party Give Up (RPGU)	If a firm is being given up as the reporting executing firm, this will be the MPID of the executing party on the reporting side.	Varchar(6)
As Of Indicator	A Y in this field indicates that the trade was reported on a date other than the date the trade was executed. An R in this field indicates that the trade is a reversal.	Values: Y, R, null
Side	Indicates whether the trade was reported as a: B = Buy S = Sell X = Cross	Values: B, S, X
Quantity	Trade volume as number of shares; max 8 characters, no decimal	Bigint
Price	Trade price. Can be a decimal unit price (D) or contract amount price (C). Price type field identifies the type of price entered.	Numeric(12,6) if price type = D, Numeric(12,2) if price type = C
Clearing Price	Trade price inclusive of explicit fee. Note: if explicit fee = 0.00, this field will be null.	Numeric(16,6)
Explicit Fee	If there is an explicit fee on the trade, this is the explicit fee amount.	Numeric(16,2)
Price Type	Indicates the type of price entered. C = Contract Amount D = Decimal Unit Price	Values: C, D
Contract Amount	The contract amount of the trade (i.e., price x quantity)	Numeric(16,2)
Clearing Contract Amount	Clearing price * quantity if clearing price exists, otherwise contract amount	Numeric(16,2)
Price Override	An O in this field indicates that a price override was used to process the transaction.	Values: O, null

Short Sale Indicator	Indicates if the trade was submitted with the sold short (S) or sold short exempt (E) indicator. This field will not	Values: S, E, null
maioator	be visible by the clearing firm on the buy side of the	
	transaction unless the trade was locked in, a tape only,	
	or an audit trail only submission.	
Method of	Indicates whether the trade was submitted via the	Values: W, C, F, B
Entry	TRAQS Web Site (W), CTCI (C), FIX (F), or B (Batch	
	File).	
Status	Indicates the status of the record:	Values: T, C, R, X, Y
	T = new trade	
	C = canceled portion of corrected trade R = new (corrected) portion of corrected trade	
	X = canceled trade	
	Y = reversal	
Matched	Indicates the match status of the record:	Values: D, B, K, M, C, L,
Status	D = Declined	null
	B = Break Pending	
	K = Broken	
	M = Matched by Acceptance	
	C = Matched by Comparison	
Prior Control	L = Matched by Auto-Lock On a trade that has been canceled or corrected, this is	YYYY-MM-DD
Date	the date the original trade was submitted.	
Prior FINRA	On a trade that has been canceled or corrected, this is	Bigint
Control	the control number of the original submission. Max size:	5
Number	18 characters	
Contra Party	MPID on the other side of the trade. A C in this field	Varchar(6)
(CPID)	indicates that the contra party is not a FINRA member	
Demented	firm.	$\lambda$ (analysis $r(4.4)$
Reported Volume	Quantity disseminated	Varchar(14)
Reported Price	Price disseminated	Decimal(16,6)
Contra	Displays the capacity of the contra party:	Values: P, A, R
Capacity	P – Principal	, ,
	A – Agency	
	R – Riskless Principal	
	This field will not be visible by the party on the reporting	
	side of the transaction, unless the transaction is locked	
Execution Date	in, tape only, or audit trail only. The date the trade was executed	YYYY-MM-DD
Contra Party	If a firm is being given up as the contra executing firm,	Varchar(6)
Give Up	this will be the MPID of the executing party on the contra	varchar(0)
(CPGU)	side.	
System	A Y in this field indicates that the trade was reported to	Values: Y, N
Assigned	the tape.	
Publish		
Indicator		
Publish	A Y in this field indicates that the reporting firm indicated	Values: Y, N
Indicator Match Control	the trade was for publication. Identifier assigned by the system to trades that have	Bigint
Number	been matched. Max size: 18 characters	Diginit
Match	Indicates when the trades were matched	YYYY-MM-DD
Timestamp		HH:MM:SS.mmm:nnnnn
hinostanip		

Accept Time	Indicates when the Accept was received	HH:MM:SS.mmm:nnnnn
Decline Time	Indicates when the trade was declined	HH:MM:SS.mmm:nnnnn
Break Time	Indicates when matched trade is canceled by one party, resulting in a Matched Status of Break Pending.	HH:MM:SS.mmm:nnnnn
Broken Time	Indicates when matched trade is broken, i.e., both parties have canceled the trade.	HH:MM:SS.mmm:nnnnn
Branch Sequence Number	Internal reference number assigned to the trade by the submitting firm. This field will not be visible by the party on the contra side of the transaction.	Varchar(8)
Reversal Indicator	A Y in this field indicates that the trade has been reversed.	Values: Y, N
Special Processing Flag	A value in this field indicates that the transaction has been submitted for special processing: N or null = No Special Processing Y = Position Transfer O = Clearing-Only, Non-Regulatory Report	Values: Y, N, O, null
Special Instructions Indicator	A value in this field indicates that there are special instructions on the transaction: Null = Regular I = Step In trade S = Step Out trade Y = Special trade X = Special and Step Out trade J = Special and Step In trade A = Step Out trade with Fees B = Special and Step Out trade with Fees	Values: null, I, S, Y, X, J, A, B
Clearing	A 0 in this field means the trade was sent to clearing; a 1	Values: 0, 1
Indicator	means it was not.	
Control Date	The date the transaction was received in the system.	YYYY-MM-DD
FINRA Control	The unique identifier assigned to the trade by the	Bigint
Number Cancel Receipt Time	system. Max size: 18 characters Populated on cancellation records, this is the time the trade cancellation was received by the system.	HH:MM:SS.mmm
FINRA Trade Mod 3	Assigned and disseminated by the system if the trade meets one of these conditions: T = Trade was executed outside normal market hours Z = Trade was executed during normal market hours and reported late U = Trade was executed outside normal market hours and reported late If the trade is published, this will be the modifier disseminated on the trade message.	Values: T, Z, U, null
FINRA Trade Mod 4	Assigned and disseminated by the system if the trade meets one of these conditions: W = Weighted Average Price or Stopped Stock P = Prior Reference Price I = Odd Lot	Values: W, P, I, null
Trade Mod 1	Settlement modifier on the trade as submitted by reporting firm: @ = Regular C = Cash N = Next Day	Values: @, C,- <del>N,</del> R, null <u>Effective with change to</u> <u>T+1 regular way</u> <u>settlement (date TBD)</u> ,

	R = Seller's Option	<u>"Next Day" will no longer</u> <u>be a valid Settlement</u> Modifier.
Trade Mod 3	Submitted by reporting firm if the trade meets one of these conditions: T = Trade was executed outside normal market hours Z = Trade was executed during normal market hours and reported late U = Trade was executed outside normal market hours and reported late	Values: T, Z, U, null
Trade Mod 4	Submitted by reporting firm if the trade meets one of these conditions: W = Weighted Average Price S = Stopped Stock P = Prior Reference Price X = Trade related to Options Exercises R = Trade Price Unrelated to Current Market	Values: W, S, P, X, R, null
Trade Mod 4 Time Seller Days	This is the time associated with Prior Reference Price or Stopped Stock trade. If Trade Modifier 1 is Sellers Option, this field shall contain the days to settlement.	HH:MM:SS.mmm:nnnnnn Values: 02-60, null Note: 02 will no longer be a valid value effective September 2017 <u>Effective with change to</u> T+1 regular way
Related Market Indicator	Represents the market center for the trade: F = foreign market O = unknown market center U = unspecified multi market trades	<u>settlement (date TBD),</u> <u>02 will again be a valid</u> <u>seller's option value.</u> Values: F, O, U, 0, null
Contra Branch Sequence Number	0 = ADF/ORF Internal reference number assigned to the trade by the contra firm. This field will not be visible by the clearing party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(8)
Reporting Party Clearing Number Contra	Identifier for the clearing firm associated with the reporting party.	Varchar(4) Varchar(4)
Clearing Number	party.	
Locked-In Indicator	A value in this field indicates that the trade was locked-in at submission: A = AGU Q = QSR	Values: A, Q, null
Reporting Obligation	A Y in this field indicates that the trade report is the submission from the member with the trade reporting obligation.	Values: Y, N
Settlement Date	The date the trade is reported to settle	YYYY-MM-DD

Trade Reference Number	Trade Reference Number used to tie a Tape eligible trade to one or more non-Tape eligible trades.	Varchar(20)
OATS Identifier	Order audit trail reference number associated with the transaction. This field will not be visible by the clearing party on the contra side of the transaction.	Varchar(20)
Contra OATS Identifier	Order audit trail reference number for the contra party associated with the transaction. This field will not be visible by the clearing party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(20)
Memo	Used for firm internal memo purposes. This field will not be visible by the clearing party on the contra side of the transaction.	Varchar(10)
Contra Memo	Used for firm internal memo purposes by the contra firm. This field will not be visible by the clearing party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(10)
Client Trade ID	The trade reporting party internal user reference number for the trade report. This field will not be visible by the clearing party on the contra side of the transaction.	Varchar(20)
Contra Client Trade ID	The contra party internal user reference number for the trade report. This field will not be visible by the clearing party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(20)
Reference Reporting Facility	Populated only on reversals, to indicate on what facility the original transaction being reversed was entered: A = ADF Q = FINRA/NASDAQ TRF N = FINRA/NYSE TRF	Values: A, Q, N, null
Submitter	The Web User ID, if the source is W, or the I1I2 address, if the source is C or F, of the person or terminal that entered the trade. This field will only be visible to the firm that submitted the trade.	Varchar(20)

#### **ADF Trades File**

The **ADF Trades** file contains all transaction reports for the date requested where the selected MPID was present in any of the following fields:

- Reporting Party (RPID)
- Reporting Party Give Up (RPGU)
- Contra Party (CPID)
- Contra Party Give Up (CPGU)

The Trades files contain new transactions, correction submissions, cancelations and reversals. The last row in the file will contain a count of the number of trade records included in the file. The following fields are provided in the file:

Column	Description	Data Type/Possible Values
Symbol	The ticker symbol of the security reported	Varchar(14)
Suffix	The suffix assigned to the security symbol in the transaction, if applicable	Varchar(7)

Reporting Party (RPID)	The identifier of the party reporting the trade	Varchar(6)
Reporting Party Capacity	Displays the capacity of the reporting party: P = Principal A = Agency R = Riskless Principal This field will not be visible by the party on the contra side of the transaction.	Values: P, A, R
Trade Report Date	The date the transaction was reported to ADF	YYYY-MM-DD
Trade Report Time	The time the transaction was reported to ADF	HH:MM:SS.mmm:nnnnnn
Execution Time	The execution time reported on the transaction by the reporting party	HH:MM:SS.mmm:nnnnnn
Reporting Party Give Up (RPGU) As Of Indicator	If a firm is being given up as the reporting executing firm, this will be the MPID of the executing party on the reporting side. A Y in this field indicates that the trade was	Varchar(6) Values: Y, null
	reported on a date other than the date the trade was executed.	
Side	<ul> <li>Indicates whether the trade was reported as a:</li> <li>B = Buy</li> <li>S = Sell</li> <li>X = Cross</li> </ul>	Values: B, S, C
Quantity	Trade volume as number of shares	Bigint
Price	Trade price. Can be a decimal unit price (D) or contract amount price (C). Price type field identifies the type of price entered.	Numeric(12,6) if price type = D, Numeric(12,2) if price type = C
Clearing Price	Trade price inclusive of explicit fee	Numeric(16,6)
Price Type	Indicates the type of price entered: C = Contract Amount D = Decimal Unit Price	Values: C, D
Contract Amount	The contract amount of the trade (i.e., price x quantity)	Numeric(16,2)
Clearing Contract Amount	Clearing price * quantity if clearing price exists, otherwise contract amount	Numeric(16,2)
Price Override	An O in this field indicates that a price override was used to process the transaction.	Values: O, null
Short Sale Indicator	Indicates if the trade was submitted with the sold short (S) or sold short exempt (E) indicator. This field will not be visible by the party on the contra side of the transaction.	Values: S, E, null
Method of Entry	Indicates whether the trade was submitted via the TRAQS Website (W), CTCI (C), FIX (F), or Batch File (B).	Values: W, C, F, B
Status Matched Status	Indicates the status of the record: T = New trade C = Canceled portion of corrected trade R = New (corrected) portion of corrected trade X = Canceled trade Y = Reversal Indicates if and how the trade is matched:	Values: T, C, R, X, Y
Matched Status		Values: D, B, K, M, C, L, null

	D = Declined	
	B = Break Pending	
	K = Broken	
	M = Matched by Acceptance C = Matched by Comparison	
	L = Matched by ComparisonL = Matched by Auto-Lock	
Prior Control	On a trade that has been canceled or corrected,	YYYY-MM-DD
Date	this is the date the original trade was submitted.	
Prior FINRA	On a trade that has been canceled or corrected,	Bigint
Control	this is the control number of the original	
Number	submission.	
Contra Party	MPID on the other side of the trade. A C in this	Varchar(6)
(CPID)	field indicates that the contra party is not a FINRA	
	Member firm.	
Contra	Displays the capacity of the contra party:	Values: P, A, R
Capacity	P = Principal	
	A = Agency	
	R = Riskless Principal	
	This field will not be visible by the party on the reporting side of the transaction, unless the	
	transaction is locked in, tape only, or audit trail	
	only.	
Execution Date	The date the trade was executed	YYYY-MM-DD
Contra Party	If a firm is being given up as the contra executing	Varchar(6)
Give Up	firm, this will be the MPID of the executing party	
(CPGU)	on the contra side.	
System	A Y in this field indicates that the trade was	Values: Y, N
Assigned	reported to the tape.	
Publish		
Indicator		
Publish	A Y in this field indicates that the reporting firm	Values: Y, N
Indicator	indicated the trade was for publication.	
Match Control	Identifier assigned by the system to trades that	Bigint
Number	have been matched. If the trade is locked in at	
	submission or otherwise not match-eligible, this field will be blank.	
Match	Indicates when the trades were matched. If the	YYYY-MM-DD
Timestamp	trade is locked in at submission or otherwise not	HH:MM:SS.mmm:nnnnn
intootamp	match-eligible, this field will be blank.	
Branch	Internal reference number assigned to the trade	Varchar(8)
Sequence	by the submitting firm. This field will not be visible	(-)
Number	by the party on the contra side of the transaction.	
Reversal	A Y in this field indicates that the trade has been	Values: Y, null
Indicator	reversed.	
Special	A Y in this field indicates that the transaction was	Values: Y, null
Processing	submitted for special processing (i.e., as a	
Flag	position transfer).	
Special	A value in this field indicates that there are special	Values: 0, 3, 7, 8
Instructions	instructions on the transaction:	
Indicator	0 = Regular 3 = Step Out Trade	
	7 = Special Trade	
	8 = Special and Step Out Trade	
	o - openial and otep Out Trade	

Clearing	A 0 in this field means the trade was sent to	Values: 0, 1
Indicator Control Date	clearing; a 1 means it was not. The date the transaction was received in the system	YYYY-MM-DD
FINRA Control Number	The unique identifier assigned to the trade by the system.	Bigint
Cancel Receipt Time	This will be populated on trades with a status of X, to reflect the time the trade was canceled in the system.	HH:MM:SS.mmm:nnnnnn
FINRA Trade Mod 3	Assigned and disseminated by the system if the trade meets one of these conditions: T = Trade was executed outside normal market hours Z = Trade was executed during normal market hours and reported late U = Trade was executed outside normal market hours and reported late If the trade is published, this will be the modifier disseminated on the trade message.	Values: T, Z, U, null
FINRA Trade Mod 4	Assigned and disseminated by the system if the trade meets one of these conditions: W = Weighted Average Price for trade disseminated to UTP SIP B = Weighted Average Price for trade disseminated to CTA SIP I = Odd Lot Trade	Values: W, B, I, null
Trade Mod 1	Settlement Modifier on the trade as submitted by reporting party: 0 = Regular C = Cash N = Next Day R = Seller's Option	Values: 0, C, N, R, null <u>Effective with change to T+1</u> <u>regular way settlement (date</u> <u>TBD), "Next Day" will no longer</u> <u>be a valid Settlement Modifier.</u>
Trade Mod 2	Trade through exempt modifier: 2 = FINRA Self Help Indicator 3 = Intermarket Sweep Outbound 4 = Derivatively Priced 6 = Intermarket Sweep Inbound 7 = FINRA Contingent Indicator 8 = FINRA Subpenny Indicator E = Error Correction P = Print Protection	Values: 2, 3, 4, 6, 7, 8, E, P, null
Trade Mod 2 Time	Time associated with intermarket sweep order. May be provided by the reporting party or populated by the system with trade execution	HH:MM:SS.mmm:nnnnnn
Trade Mod 3	time. Submitted by the reporting firm if the trade meets one of the following conditions: T = Trade was executed outside normal market hours Z = Trade was executed during normal market hours and reported late U = Trade was executed outside normal market hours and reported late	Values: T, Z, U, null

Trade Mod 4	Submitted by the reporting firm if the trade meets one of the following conditions: W = Weighted Average Price S = Stopped Stock P = Prior Reference Price X = Trade Related to Options Exercises R = Trade Price Unrelated to the Current Market	Values: W, S, P, X, R, null
Trade Mod 4 Time	This is the time associated with Prior Reference Price or Stopped Stock trades.	HH:MM:SS.mmm:nnnnn
Seller Days	If Trade Modifier 1 is Sellers Option, this field shall contain the days to settlement.	Values: 02-60, null Note: 02-will no longer be a valid value effective September 2017 Effective with change to T+1 regular way settlement (date TBD), 02 will again be a valid
Trade Thru Exempt	A 0 in this field indicates that there is no trade through exemption on the trade. A 1 in this field indicates that the submitter indicated the trade is trade through exempt.	<u>seller's option value.</u> Values: 0, 1
Related Market Indicator	Represents the market center for the trade: Q = NQ Exchange Trade for NQ securities N = NYSE trade A = AMEX trade B = BSE trade C = NSX trade I = ISE trade M = Chicago Stock Exchange trade P = PSE trade W = CBOE trade X = Phil Stock Exchange trade O = unknown market center U = unspecified multi market trades 0 = ADF/ORF 1 = NQ TRF 3 = NYSE TRF F = Foreign Market H = BATS Exchange trade G = BATS Y Exchange trade J = DirectEdge A Ex trade K = DirectEdge X Ex trade V=IEX Exchange L = LTSE (Long Term Stock Exchange) E = Members Exchange Y = Miami International Exchange	Values: A, B, C, F, G, H, I, J, K, M, N, O, P, Q, U, W, X, 0, 1, 3
Contra Branch Sequence Number	Internal reference number assigned to the trade by the contra firm. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(8)

Product	Indicates the product of the security	Values: CTS, UTP
Sub-Product	Indicates the sub-product of the security	Values: NYSE, ARCA, AMEX, BATS, NSDQ
Security Description	Description of the security being traded	This field will be null.
Reporting Party Clearing Number	Identifier for the clearing firm associated with the reporting party.	Varchar(4)
Contra Clearing Number	Identifier for the clearing firm associated with the contra party.	Varchar(4)
Locked-In Indicator	A value in this field indicates that the trade was locked in at submission: $A = AGU$ , $Q = QSR$	Values: A, Q, null
Reporting Obligation	A Y in this field indicates that the trade report is the submission from the member with the trade reporting obligation.	Values: Y, N
Settlement Date	The date the trade is reported to settle	YYYY-MM-DD
Trade Reference Number	Reference Number used to tie a Tape eligible trade to one or more non-Tape eligible trades	Varchar(20)
OATS Reference Number	Order audit trail reference number associated with the transaction. This field will not be visible by the party on the contra side of the transaction.	Varchar(20)
OATS Contra Reference Number	Order audit trail reference number for the contra party associated with the transaction. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(20)
Memo	Used for firm internal memo purposes. This field will not be visible by the party on the contra side of the transaction.	Varchar(10)
Contra Memo	Used for firm internal memo purposes by the contra firm. This field will not be visible by the party on the contra side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(10)
Client Trade ID	The trade reporting party internal user reference number for the trade report. This field will not be visible by the party on the contra side of the transaction.	Varchar(20)
Contra Client Trade ID	The contra party internal user reference number for the trade report. This field will not be visible by the party on the reporting side of the transaction, unless the transaction is locked in, tape only, or audit trail only.	Varchar(20)
Reference Reporting Facility	Populated only on reversals, to indicate on what facility the original transaction being reversed was entered: Q = FINRA/NASDAQ TRF N = FINRA/NYSE TRF O = ORF (OTC Reporting Facility)	Values: Q, N, O

Submitter	The Web User ID, if the source is W, or the I1I2 address, if the source is C or F, of the person or terminal that entered the trade. This field will only be visible to the firm that submitted the trade.	Varchar(20)
-----------	---	-------------

## **ADF Rejects File**

The **ADF Rejects** file contains all transaction reports for the date requested where the selected MPID was the submitting firm. The last row in the file will contain a count of the number of reject records included in the file. Note: data type is not included below as non-conforming information may be the cause of the reject. The following fields are provided in the file:

The time the transaction was rejected
The time the transaction was rejected         The reject code associated with the transaction         Code       Description         4       SECURITY NOT FOUND         5       INVALID CONTROL DATE         6       INVALID CONTROL ID         7       INVALID FORMAT         8       UNKNOWN FUNCTION         9       TYPE IS MISSING         10       INVALID TYPE         11       INVALID TRFMC         17       INVALID RPID         18       INVALID PRICE         20       INVALID PRICE OVERRIDE         21       ADF ENTRY SUSPENDED         22       INVALID STATUS         23       INVALID SIDE         24       NOT WITHIN ALLOWABLE TIME         25       PRICE OUT OF RANGE         26       PRICE OUT OF OVERRIDE RANGE         27       TERMINAL NOT AUTHORIZED         28       INVALID TME         30       INVALID TRADE MODIFIER 2 TIME         31       RPID REQUIRED         32       INVALID TRADE MODIFIER 2 TIME         33       INVALID TRADE MODIFIER 2 TIME         34       INVALID TRADE MODIFIER 2 TIME         35       144A FLAG MUST BE Y         36

Reject Control Number	The system-assigned identifier for the reject	
Reject Status	The current state of the reject: J = Rejected P = Repaired F = Repair Failed Z = Closed	
Entry Type	Indicates the status of the rejected transaction: TRIT = Trade Entry TRIX = Cancel TRIR = Correction TRIY = Historical Cancel	
Client Trade Identifier	The trade reporting party internal user reference number for the trade report	
Side	Indicates whether the rejected transaction was reported as a Buy (B), Sell (S) or Cross (X)	
Symbol	The ticker symbol of the security reported	
Suffix	The suffix assigned to the security symbol in the rejected transaction, if applicable	
Quantity	Trade volume as number of shares	
Price	Trade price. Can be decimal unit price or contract amount price. Price type field identifies the type of price entered.	
Reporting Party (RPID)	The identifier of the party reporting the trade	
Reporting Party Give Up (RPGU)	If a firm is being given up as the reporting executing firm, this will be the MPID of the executing party on the reporting side.	
Contra Party (CPID)	MPID on the other side of the trade. A C in this field indicates that the contra party is not a FINRA member firm.	
Contra Party Give Up (CPGU)	If a firm is being given up as the contra executing firm, this will be the MPID of the executing party on the contra side.	
Execution Date	The date the trade was executed	
Execution Time	The execution time reported on the transaction by the reporting party.	
Method of Entry	Indicates whether the rejected transaction was submitted via the TRAQS Website (W), CTCI (C), FIX (F), or Batch File (B).	
Market Center	Represents the market center for the trade.	
Locked-In Indicator	A value in this field indicates that the transaction was locked in at submission: A = AGU, $Q = QSR$	

**TRACE Security Activity Report** The **TRACE Security Activity Report (TSAR)** is a monthly report that provides aggregated statistics for each traded TRACE-Eligible Corporate and Agency ("CA") security. The report contains basic descriptive

security elements, aggregate par value volume information, number of transactions, number of unique market participant identifiers ("MPIDs"), and top 5 statistics for disseminated transactions in CA bonds. The following fields are provided in the file:

Field Name	Description
Security	For CUSIP version, Security Identifier assigned by Standard & Poors
Symbol	TRACE Symbol as defined by FINRA
BB Symbl	Bloomberg Identifier
Issuer Name	Issuer Name
Coupon Rate	Coupon Rate of the security
Maturity Date	Maturity Date of the security
TRACE Grade	Indicates whether the security is Investment Grade ("I") or High Yield ("H")
Industry/Sector	The description of the industry subsector code assigned to the security
Total Number of Trades	The number of trades reported to TRACE during the report period
Customer Buy Trades	The number of trades reported to TRACE during the report period where the FINRA member is selling to a non-FINRA member
Customer Sell Trades	The number of trades reported to TRACE during the report period where the FINRA member is buying from a non-FINRA member
Interdealer Trades	The number of trades reported to TRACE during the report period where a FINRA member is selling to another FINRA member
Number of Capped Trades	The number of trades reported to TRACE during the report period where the entered volume of the trade is less than or equal to the cap limit applicable to the security
# of Trades 0 to Cap Size	The number of trades reported to TRACE during the report period where the entered volume of the trade is greater than the cap limit applicable to the security
# of Trades Cap to 10MM	The number of trades reported to TRACE during the report period where the entered volume of the trade is between the cap and 10 million.
# of Trades > 10MM	The number of trades reported to TRACE during the report period where the entered volume of the trade is greater than 10 million.
Displaying Only Capped Volume	Indicator to signal whether the volume calculations for each security include the actual size of the trade (N) or the cap limit, for trades above the cap limit applicable to the security (Y)
Total Par Value Traded	The sum of all entered quantities of trades reported to TRACE during the report period
Customer Buy Par Value	The sum of all entered quantities of trades reported to TRACE during the report period where the FINRA member is selling to a non-FINRA member
Customer Sell Par Value	The sum of all entered quantities of trades reported to TRACE during the report period where the FINRA member is buying from a non-FINRA member
Interdealer Par Value	The sum of all entered quantities of trades reported to TRACE during the report period where the FINRA member is selling to another FINRA member
Par Value 0 – Cap	The sum of entered quantities of trades reported to TRACE during the report period where the entered volume of the trade is less than or equal to the cap limit applicable to the security
Par Value Cap – 10MM	The sum of entered quantities of trades reported to TRACE during the report period where the entered volume of the trade is greater than the cap limit applicable to the security and less than or equal to 10 million
Par Value > 10MM	The sum of entered quantities of trades reported to TRACE during the report period where the entered volume of the trade is greater than 10 million
# of Unique Dealers	The number of distinct MPIDs that reported at least one valid trade in the report period, including both sides of interdealer trades.

# of Unique Capped Dealers	The number of distinct MPIDs that reported at least one valid capped trade in the report period, including both sides of interdealer trades.
Top 5 Firms % of Trades	The percentage of the security's total trades represented by the top 5 reporting MPIDs, ranked by number of trades reported to TRACE during the report period. The calculation includes both sides of interdealer trades.
Top 5 Firms % of Par	The percentage of the security's total par value traded represented by the top 5 reporting MPIDs, ranked by total par value reported to TRACE during the report period. The calculation includes both sides of interdealer trades.
Herfindahl-Hirschman Index	The sum of the squared market share of each MPID reporting in a security. Range is between 0 and 10,000

#### **End-of-Day TRACE Transaction Files**

The **End-of-Day TRACE Transaction Files** are daily files including all transaction data disseminated as part of Real-Time TRACE transaction data for that date. The files are produced after the TRACE system closes. Files are available for each Real-Time TRACE transaction data set: Corporate Bond data set (BTDS), Agency data set (ATDS), Securitized Products data set (SPDS), and the two Rule 144A data sets (BTDS 144A and SPDS 144A). The following fields are provided in the file:

Field Name	Description
MESSAGE_CATEGORY	This field, along with Message Type, identifies the type of message. Values are: T – Trade A – Administrative
MESSAGE_TYPE	This field further identifies the type of information included in the message: M – Trade Report (with Trade message category) N – Trade Cancel (with Trade message category) O – Trade Correction (with Trade message category) P – Trade Report – MBS (with Trade message category) Q – Trade Cancel – MBS (with Trade message category) R – Trade Correction – MBS (with Trade message category) E – Daily Trade Summary (Closing Recap) (with Administrative message category) F – Daily Trade Summary – MBS (with Administrative message) H – Trading Halt (with Administrative message category) 1 – 7 – Market Aggregates (with Administrative message category)
MESSAGE_SEQUENCE_NUMBER	Identifies each message. At the beginning of each operational cycle this number will begin with 0000000 as the first message, and will be incremented by 1 each time a new message is transmitted.
MARKET_CENTER	The Market Center that originated the message. Valid value for these files is: $O - Over$ the Counter
DATE_TIME	A timestamp placed on the disseminated message. The date/time is the calendar date and time that the record has entered into FINRA's trade reporting system.
SYMBOL	Bond symbol as assigned by FINRA for TRACE trade reporting purposes
CUSIP	For CUSIP version, the universal identifier for the specific bond as assigned by Standard & Poor's CUSIP Service Bureau
BSYM	The Bloomberg identifier for the specific bond
SUB_PRODUCT_TYPE	The type of security traded. Values are: CORP – Corporate Bond

	ELNL Equite Links of Nata
	ELN – Equity-Linked Note CHRC – Church Bond
	SOVN – Foreign Sovereign (Effective 11/6/2023)
	AGCY - Agency
	TBA – Agency Pass-Through and SBA-Backed Securities
	traded To Be Announced
	MBS – Agency Pass-Through and SBA-Backed Securities
	traded in specified pool transactions
	ABS – ABS securities that are backed by a variety of consumer,
	student and commercial credits
	CMO – Collateralized Mortgage Obligations, i.e., Mortgage
	Loans, Certificates by project or construction loans, other type
	of assets derivatives of MBS
ORIGINAL_DISSEMINATION_DATE	Format: YYYYMMDD. On Trade Report messages, this field
	will be populated on Reversals (As/Of Indicator = R) only, to
	indicate the date the original trade was disseminated. On non
	Reversals, the field will be blank. On Trade Cancel and Trade
	Correction messages, the field will be populated with the date
	the original trade was disseminated, including same day
	Cancels and Corrections.
QUANTITY_INDICATOR	Indicates whether the quantity is actual or estimated. Valid
	values are: A – Actual and E – Estimated
QUANTITY	The field is right-justified, zero-filled unused positions with a
	decimal in the twelfth position on actual amounts and left-
	justified, space-filled unused positions on amounts with special limits applied (capped) as defined below. This field represents
	the par value volume of the transaction.
	For equity-linked notes (which trade in shares as units), the field
	will represent the number of shares traded multiplied by the
	price per share. For example, a trade of 250 shares at a price of
	\$10.50 per share will be disseminated as a quantity of
	0000002625.00.
	Please note that the following special limits apply to this field:
	For High Yield and Unrated bonds and equity-linked notes:
	<ul> <li>If the par value of the transaction is less than or equal to \$1</li> </ul>
	million, the quantity will state actual par value of the trade.
	If the par value of the transaction is greater than \$1 million, the
	quantity field will show 1MM+.
	For Investment Grade bonds and equity-linked notes:
	<ul> <li>If the par value of the transaction is less than or equal to \$5 million, the quantity will state the actual particulus of the trade</li> </ul>
	million, the quantity will state the actual par value of the trade.
	<ul> <li>If the par value of the transaction is greater than \$5 million, the quantity field will show 5MM+</li> </ul>
	quantity field will show 5MM+. For trades of TBA Good for Delivery (GD) securities:
	<ul> <li>If the reported volume of the transaction is less than or equal</li> </ul>
	to \$25 million, the Quantity
	will state the actual reported volume.
	• If the reported volume of the transaction is greater than \$25
	million, the Quantity will be
	stated as 25MM+.
	For trades of TBA Not Good for Delivery (NGD) securities:
	· If the reported volume of the transaction is less than or equal
	to \$10 million, the Quantity

	<ul> <li>will state the actual reported volume.</li> <li>If the reported volume of the transaction is greater than \$10 million, the Quantity will be</li> </ul>
	stated as 10MM+.
	For trades of MBS:
	<ul> <li>If the reported volume of the transaction is less than or equal to \$10 million, the Quantity</li> </ul>
	will state the actual reported volume.
	• If the reported volume of the transaction is greater than \$10
	million, the Quantity will be
	stated as 10MM+. For trades of ABS:
	<ul> <li>If the reported volume of the transaction is less than or equal</li> </ul>
	to \$10 million, the Quantity
	will state the actual reported volume.
	If the reported volume of the transaction is greater than \$10
	million, the Quantity will be
	stated as 10MM+.
	For trades of CMO:
	<ul> <li>Transactions with a reported volume less than \$1 million, the Quantity will state the actual reported volume. Transactions with</li> </ul>
	a reported volume equal to or greater than \$1 million will not be
	subject to dissemination.
PRICE	This field represents the bond price is inclusive of any
	commission, mark-ups, and/or mark-downs reported by the sell-
	side firm in the trade transaction. The Price will be stated in
	\$\$\$\$.dddddd format, where the first four bytes represents the
	dollar, the fifth byte is a decimal point, and the last six bytes
	represents the decimal amount of the trade price. If the Price is not reported for a bond, this field will be zero filled. For equity-
	linked notes (which trade in shares as units), the price will
	reflect the dollar price per share, rather than a percentage of
	par. For example, a trade price of \$28.50 per share will be
	disseminated as "0028.500000".
REMUNERATION	Identifies whether the reported trade price includes
	remuneration. Remuneration only applies on Customer and Affiliate trades. Valid values are:
	C - Commission is included in the price
	M - A Markup or Markdown is included in the price
	N - No Commission or Markup/Markdown is included in the
	price
	Space - No value assigned on Inter-Dealer trades
SPECIAL_PRICE_INDICATOR	A Y in this field indicates that a special trade condition exists that impacted the execution price, or the transaction is a
	"specified trade."
	Identifies the side (i.e., Buy or Sell) from the reporting party's
	perspective. Only one side of an Interdealer transaction is
	disseminated, which will be identified as the sell side from the
	reporting party's perspective. Associated values are as follows:
	B - Reporting party bought from contra party
SIDE	S - Reporting party sold to contra party This field will be populated if the transaction being reported is an
AS_OF_INDICATOR	As/Of trade, Reversal, Cancel or Correction from a prior
	so, et trado, novereal, eanor et contection nom a phor

	business day. Valid values are:
	A - As/Of Trade
	R - Reversal Space - Current Day Trade
EXECUTION_DATE_TIME	Numeric, Format: YYYYM MDDHHMMSS. The date and time that the FINRA member firm executed the trade transaction. If the transaction reported was an As/Of trade or a Reversal, this field will be populated with the date and time that the original trade was executed by the FINRA member firm.
SALE_CONDITION_3	Indicates whether there are special conditions or modifiers applicable to the trade transaction. Associated values are: Space - No Special Sale Condition Z - Trade Reported Late (Out of Sequence) T - Trade Reported After Market Hours U - Trade Reported Late After Market Hours
SALE_CONDITION_4	Used to describe a second sale condition that is applicable to the trade. Associated values are: W - Weighted Average Price O – Specified Pool Transaction (SP securities) N – Stipulation Transaction (SP securities) D – Dollar Roll w/o Stipulation (SP securities) L – Stipulated Dollar Roll (SP securities) Space - No Second Modifier Applicable
SETTLEMENT DATE	Format: YYYYMMDD. The reported settlement date of the trade
YIELD_DIRECTION Not included in SPDS files	Indicates the yield direction for the subsequent Yield field. Associated values for this field are as follows: - (minus sign) - Negative Yield Space - Positive or Zero Yield
YIELD Not included in SPDS files WHEN_ISSUED_INDICATOR Not included in SPDS files	Format: \$\$\$\$\$.dddddd, where the first six bytes represents the dollar, the seventh byte is a decimal point, and the last six characters represents the decimal amount of the trade price. Indicates the effective rate of return earned on a security as calculated by the system and is expressed as a percentage. FINRA will leave the field blank if no yield is available. A W in this field indicates that the issue is trading on a when issued basis.
FACTOR Not included in BTDS or ATDS files	Format: NN.NNNNNNNN, where the third byte will always be a decimal point. Indicates a reported factor on a trade that was not based on the latest published factor of that security. A Factor of 00.000000000 indicates the trade was executed and reported based on the latest published factor for that security.
REPORTING_PARTY_TYPE	Identifies the type of entity that reported the trade. Valid values are: D - Reporting party is a Broker/Dealer T - Reporting Party is an Alternative Trading System (ATS)
	Identifies the type of contra party which the reported trade was executed against - a Broker/Dealer, a Customer (non-FINRA member), an Affiliate (non-member affiliate) or an Alternative Trading System (ATS). Valid values are: D - Contra party is a Broker/Dealer C - Contra party is a Customer (non-FINRA member) A - Contra party is a non-member affiliate
CONTRA_PARTY_TYPE	T - Contra party is an Alternative Trading System (ATS)

LOW_PRICE	point, and the last six bytes represents the decimal amount of the trade price. If the Low Price is not available for a bond, this field will be zero filled. Indicates the yield direction for the Low Price Yield field. Associated values for this field are as follows:
	Represents the current low price for which the specified bond issue was traded for the day. Format: \$\$\$\$.dddddd, where the first four bytes represents the dollar, the fifth byte is a decimal
HIGH_YIELD Not included in SPDS files	Format: \$\$\$\$\$.dddddd, where the first six bytes represents the dollar, the seventh byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. This will represent the value calculated by the system for the yield associated with the high price of the day. FINRA will leave the field blank if no yield is available.
HIGH_YIELD_DIRECTION Not included in SPDS files	Associated values for this field are as follows: - (minus sign) - Negative Yield Space - Positive or Zero Yield
HIGH_PRICE	The High Price field contains the current highest price for which the specified bond issue was traded for the current day. Format: \$\$\$.ddddd, where the first four bytes represents the dollar, the fifth byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. If the High Price is not available for a bond, this field will be zero filled. Indicates the yield direction for the High Price Yield field.
FUNCTION	Indicates if the transaction being disseminated is being taken out because it either is being canceled or was done in error. Associated values are: C - Cancel E - Error N – Correction
ORIGINAL_MESSAGE_SEQUENCE _NUMBER	This message sequence number, located in the Label section of Trade Correction and Trade Cancel messages, will represent the message sequence number for the original trade report in the specified issue.
RDID Not included in BTDS or ATDS files	The reference data identifier for the transaction. The Reference Data Identifier (RDID) is included in specific messages in lieu of Symbol, CUSIP and BSYM identifiers.
CHANGE_INDICATOR	Describes the price change(s) that the transaction caused for the issue traded. 0 - No Price/Yield Changed 1 - Last Price/Yield Changed 2 - Low Price/Yield Changed 3 - Last Price/Yield and Low Price /Yield Changed 4 - High Price/Yield Changed 5 - Last Price/Yield and High Price/Yield Changed 6 - High Price/Yield and Low Price/Yield Changed 7 - All Prices/Yields Changed
ATS_INDICATOR	A Y in this field indicates that the transaction being reported is an ATS execution. An ATS execution can be either where an ATS reports the trade, is a contra party to the trade, or is neither but the trade is executed on an ATS's platform.

LOW YIELD	Format: \$\$\$\$\$.dddddd, where the first six bytes represents the dollar, the seventh byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. This represents the value calculated by the system for the yield associated with the low price of the day. FINRA will leave the
Not included in SPDS files	field blank if no yield is available.
LAST_SALE_PRICE	The last sale price reported for the specific bond for the day. Format: \$\$\$\$.dddddd, where the first four bytes represents the dollar, the fifth byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. If the Last Sale Price is not available for a bond, this field will be zero filled.
	Indicates the yield direction for the Last_Sale_Yield_Direction
LAST_SALE_YIELD_DIRECTION Not included in SPDS files	field. Associated values for this field are as follows: - (minus sign) - Negative Yield Space - Positive or Zero Yield
LAST_SALE_YIELD	Format: \$\$\$\$\$.dddddd, where the first six bytes represents the dollar, the seventh byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. This represents the value calculated by the system for the yield associated with the last price of the day. FINRA will leave the
Not included in SPDS files	field blank if no yield is available.
ORIGINAL_QUANTITY_INDICATOR	For Trade Corrections, this is the quantity indicator disseminated on the original trade.
	For Trade Corrections, this is the quantity disseminated on the
ORIGINAL_QUANTITY	original trade.
ORIGINAL_PRICE	For Trade Corrections, this is the price disseminated on the original trade.
ORIGINAL_REMUNERATION	For Trade Corrections, this is the renumeration disseminated on the original trade.
	For Trade Corrections, this is the special price indicator
_INDICATOR	disseminated on the original trade. For Trade Corrections, this is the side disseminated on the
ORIGINAL_SIDE	original trade. For Trade Corrections, this is the as-of indicator disseminated
ORIGINAL_AS_OF_INDICATOR	on the original trade.
	For Trade Corrections, this is the execution date and time
ORIGINAL_EXECUTION_DATE_TIME	disseminated on the original trade. For Trade Corrections, this is the sale condition 3 disseminated
ORIGINAL_SALE_CONDITION_3	on the original trade.
ORIGINAL_SALE_CONDITION_4	For Trade Corrections, this is the sale condition 4 disseminated on the original trade.
	For Trade Corrections, this is the settlement date disseminated
ORIGINAL_SETTLEMENT_DATE	on the original trade.
ORIGINAL_YIELD_DIRECTION	For Trade Corrections, this is the yield direction disseminated
Not included in SPDS files	on the original trade.
ORIGINAL_YIELD Not included in SPDS files	For Trade Corrections, this is the yield disseminated on the original trade.
ORIGINAL_WHEN_ISSUED	onyinai itaue.
_INDICATOR	For Trade Corrections, this is the when issued indicator
Not included in SPDS files	disseminated on the original trade.
ORIGINAL_FACTOR	For Trade Corrections, this is the factor disseminated on the
Not included in BTDS or ATDS files	original trade.

ORIGINAL_REPORTING_PARTY TYPE	For Trade Corrections, this is the reporting party type disseminated on the original trade.
ORIGINAL_CONTRA_PARTY_TYPE	For Trade Corrections, this is the contra party type disseminated on the original trade.
	For Trade Corrections, this is the ATS Indicator disseminated on
ORIGINAL_ATS_INDICATOR	the original trade. This is the name of the corporation or agency that issued the
ISSUER	security. Please note that, due to character limitations, the
ISSUER	Issuer name may be truncated. This field describes what event is happening on the specific
	security. Valid values are: H - Trading Halt (Action Date/Time field represents date and
	time that the halt was instituted for the security)
ACTION	R - Trading Resumption (Action Date/Time field represents the date and time that trading is expected to resume in the security)
ACTION	In the format YYYYMMDDHHMMSS. This is the date and time
ACTION_DATE_TIME	that the trading halt was instituted or lifted for the specified security.
	This field describes the reason for the halt. Valid values are:
	T.1 - Halt – News Pending T.2 - Halt – News Released
	T.3 - Halt – News and resumption times
	T.12 - Halt – Additional Information Requested by FINRA H.10 - Halt – SEC Trading Suspension
HALT_REASON	H.11 - Halt - Regulatory Concerns
	The high price reported for the specific bond for the day. Daily Format: \$\$\$\$.dddddd, where the first four bytes represents the
	dollar, the fifth byte is a decimal point, and the last six bytes
DAILY_HIGH_PRICE	represents the decimal amount of the trade price. If the Daily High Price is not available for a bond, this field will be zero filled.
	Format: \$\$\$\$\$.dddddd, where the first six bytes represents the
	dollar, the seventh byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. This will
	represent the high yield associated with the Daily High Price for
DAILY_HIGH_YIELD Not included in SPDS files	the specific bond for the day. FINRA will leave the field blank if no yield is available.
	The low price reported for the specific bond for the day. Format:
	\$\$\$.dddddd, where the first four bytes represents the dollar, the fifth byte is a decimal point, and the last six bytes represents
	the decimal amount of the trade price. If the Daily Low Price is
DAILY_LOW_PRICE	not available for a bond, this field will be zero filled. Format: \$\$\$\$\$.dddddd, where the first six bytes represents the
	dollar, the seventh byte is a decimal point, and the last six bytes represents the decimal amount of the trade price. This will
	represent the low yield associated with the Daily Low Price for
DAILY_LOW_YIELD Not included in SPDS files	the specific bond for the day. FINRA will leave the field blank if no yield is available.
	The closing price reported for the specific bond for the day.
	Format: \$\$\$\$.dddddd, where the first four bytes represents the dollar, the fifth byte is a decimal point, and the last six bytes
DAILY_CLOSE_PRICE	represents the decimal amount of the trade price.
CLOSE_YIELD_DIRECTION Not included in SPDS files	The yield direction for the Daily Close Yield field. Valid values are:

	- (minus sign) - Negative Yield
	Space - Positive or Zero Yield
	Format: \$\$\$\$\$.dddddd, where the first six bytes represents the
	dollar, the seventh byte is a decimal point, and the last six bytes
	represents the decimal amount of the trade price. This will
	represent the closing yield associated with the Daily Close Price
DAILY_CLOSE_YIELD	for the specific bond for the day. FINRA will leave the field blank
Not included in SPDS files	if no yield is available.
Not included in Si DS mes	This free-form text field is used to relate general administrative
TEXT	or market information to subscribers.
	of market mormation to subscribers.
TOTAL_SECURITIES_TRADED	
_ALL_SECURITIES	The total number of issues traded on the day.
Not included in SPDS files	The total number of issues traded on the day.
_INVESTMENT_GRADE	
Not included in ATDS or SPDS files	The total number of Investment Grade issues traded on the day.
TOTAL_SECURITIES_TRADED	
_HIGH_YIELD	The total number of High Yield issues traded on the day.
Not included in ATDS or SPDS files	
TOTAL_SECURITIES_TRADED	
_CONVERTIBLES	The total number of Convertible issues traded on the day.
Not included in ATDS or SPDS files	
TOTAL_SECURITIES_TRADED	
_FREDDIE_MAC	The total number of Freddie Mac issues traded on the day.
Not included in BTDS or SPDS files	
TOTAL_SECURITIES_TRADED	
_FANNIE_MAE	The total number of Fannie Mae issues traded on the day.
Not included in BTDS or SPDS files	
TOTAL_SECURITIES_TRADED	
_FHLB	The total number of FHLB issues traded on the day.
Not included in BTDS or SPDS files	
	The total number of issues where the closing price for the day is
ADVANCES_ALL_SECURITIES	higher than the prior closing price.
Not included in SPDS files	
ADVANCES_INVESTMENT_GRADE	The total number of Investment Grade issues where the closing
Not included in ATDS or SPDS files	price for the day is higher than the prior closing price.
ADVANCES_HIGH_YIELD	The total number of High Yield issues where the closing price
Not included in ATDS or SPDS files	for the day is higher than the prior closing price.
ADVANCES_CONVERTIBLES	The total number of Convertible issues where the closing price
Not included in ATDS or SPDS files	for the day is higher than the prior closing price.
ADVANCES_FREDDIE_MAC	The total number of Freddie Mac issues where the closing price
Not included in BTDS or SPDS files	for the day is higher than the prior closing price.
ADVANCES_FANNIE_MAE	The total number of Fannie Mae issues where the closing price
Not included in BTDS or SPDS files	for the day is higher than the prior closing price.
ADVANCES FHLB	The total number of FHLB issues where the closing price for the
Not included in BTDS or SPDS files	day is higher than the prior closing price.
DECLINES_ALL_SECURITIES	The total number of issues where the closing price for the day is
Not included in SPDS files	lower than the prior closing price.
DECLINES_INVESTMENT_GRADE	The total number of Investment Grade issues where the closing
Not included in ATDS or SPDS files	price for the day is lower than the prior closing price.
DECLINES_HIGH_YIELD	The total number of High Yield issues where the closing price
Not included in ATDS or SPDS files	for the day is lower than the prior closing price.
	for the day is lower than the phot closing phoe.

DECLINES_CONVERTIBLES	The total number of Convertible issues where the closing price
Not included in ATDS or SPDS files	01
	for the day is lower than the prior closing price.
DECLINES_FREDDIE_MAC	The total number of Freddie Mac issues where the closing price
Not included in BTDS or SPDS files	for the day is lower than the prior closing price.
DECLINES_FANNIE_MAE	The total number of Fannie Mae issues where the closing price
Not included in BTDS or SPDS files	for the day is lower than the prior closing price.
DECLINES_FHLB	The total number of FHLB issues where the closing price for the
Not included in BTDS or SPDS files	day is lower than the prior closing price.
UNCHANGED_ALL_SECURITIES	The total number of issues where the closing price for the day
Not included in SPDS files	remains the same as the prior closing price.

## Fees

Firms that choose to subscribe to one or more SFTP services for Trade Journals will be assessed monthly charges for each MPID or clearing number they enroll in the services. Firms that subscribe to TRACE Security Activity Reports and/or End-of-Day TRACE Transaction files will also be charged monthly for the services to which they subscribe. Charges will appear on each facility's bill (e.g., TRACE charges will be included in the firm's monthly TRACE bills, ADF charges will be assessed in an ADF bill, and ORF and Clearing charges will be included in the firm's ORF bill.) The fees are outlined below.

# **TRACE Data Delivery SFTP**

Firms that subscribe to TRACE Data Delivery SFTP pay a one-time set-up fee of \$250, and a \$200 monthly fee. FINRA ADDS fees will be included in your firm's TRACE bill each month. For more information on the fees, see <u>FINRA Rule 7730</u>.

## **ORF Data Delivery SFTP**

Firms that enroll in ORF Data Delivery SFTP can establish an automated interface to retrieve the prior day's trade journal files on a daily basis. Firms that subscribe an MPID to access ORF trade journal files via Secure File Transfer Protocol (SFTP) will be billed a one-time set-up fee of \$250 per MPID subscribed, as well as a monthly fee of \$200 per MPID.

## **Clearing Data Delivery SFTP**

Firms that enroll in ORF Clearing Data Delivery SFTP can establish an automated interface to retrieve the prior day's trade journal files on a daily basis. Firms that subscribe a clearing number to access ORF clearing trade journal files via Secure File Transfer Protocol (SFTP) will be billed a one-time set-up fee of \$250 per clearing number subscribed, as well as a monthly fee of \$300 per clearing number. Please see <u>FINRA Rule 7710</u> for more information.

## **ADF Data Delivery SFTP**

Firms that subscribe to ADF Data Delivery SFTP pay a one-time set-up fee of \$250, and a \$200 monthly fee. FINRA ADDS fees for ADF will be sent in a separate bill each month. For more information on the fees, see <u>FINRA Rule 7510</u>.

## **TRACE Security Activity Report**

Firms subscribed to receive the TRACE Security Activity Report will be billed \$750 per month, unless the subscriber is a qualifying tax-exempt organization, in which case FINRA would charge \$250 per month.

## **End-of-Day TRACE Transaction Files**

Firms that subscribe to receive the End-of-Day TRACE Transaction files will be billed \$750 per month, per data set, unless the subscriber is a qualifying tax-exempt organization, in which case FINRA would charge \$250 per month per data set. Subscribers to the Vendor Real-Time Data Feed(s) will not be charged a fee to receive the End-of-Day TRACE Transaction File(s) for the data sets to which they subscribe.

# **Expected File Delivery and Support**

FINRA reserves the right to make changes to the file delivery schedule outlined below as necessary. FINRA will provide advance notification to subscribers via the email address associated with their FINRA Entitlement account, in the event the delivery schedule will be changed permanently.

Scheduled maintenance occurs between the hours of 9 p.m. ET Friday until 6 a.m. ET Monday. It is possible that users may not be able to access the site at that time. While FINRA will make a concerted effort to deliver files on their stated schedule, maintenance may occasionally interrupt the schedule. Whenever possible, FINRA will notify firms in advance of any expected service interruptions.

## **Availability of Trade Journal Files**

Trade Journal Files for a trade report date are made available to SFTP and/or web subscribers on the next business day following the date the trade reports were submitted, as long as that calendar day is not a FINRA holiday. Trades reported on a Friday will usually be available on Saturday morning; however, Monday by 5am is the expected delivery time.

Files are not delivered on FINRA holidays. Under normal circumstances, daily files are available via SFTP and/or the website by 5 AM ET. There may be circumstances, however, when the data is delayed. If that occurs, FINRA will make its best efforts to deliver the files by 7 AM ET the following business day.

## **Availability of TRACE Security Activity Reports**

The TSAR files are available on a monthly basis for the month three months prior, and will be posted on the first business day of the month.

## Availability of End-of-Day TRACE Transaction Files

The EOD TRACE Transaction files are available each trading day by 7:30 p.m.

## Support

If you are unable to access the site or the expected data is not available, you may contact FINRA by phone or email.

Contact Information	Hours of Availability
240-386-4020	24 hours a day, Monday through Friday

datadelivery@finra.org	08:00 AM ET to 5 PM ET, Monday through Friday
datadenvery@nna.org	00.00 AW ET to 51 W ET, Worlday through thirday

When contacting FINRA to report an issue, please provide your firm's Market Participant Identifier (MPID) or CRD number and name, your name, and a contact phone number or email address. **Please note: cases raised outside of normal business hours will be addressed during normal business hours.** If you have contacted FINRA outside of normal business hours to report an issue, you should expect an update on the status of your case by 10 AM ET the next business day.

## Troubleshooting

### **Access Denied Message**

Files will have a status of Access Denied if the MPID is no longer associated with your user account. To determine what MPIDs are listed on your account, click the **My Account** link on the top right corner of the FINRA ADDS website. If you have questions about the MPIDs on your account, please contact your firm's Super Account Administrator for more information.

## **Unable to Connect via SFTP**

If your firm's Gateway IP address changes, this will affect your ability to connect to FINRA via SFTP. If you are unable to connect via SFTP, send an email to <u>datadelivery@finra.org</u> for assistance.

## **Contact FINRA**

Questions about how to use the FINRA ADDS site or about the data provided may be submitted via email to <u>datadelivery@finra.org</u>.
