## **1** Overview

#### 1.1 Introduction

The TRACE System (TRACE) is a service of FINRA that performs two major functions: on-line trade reporting and dissemination. FINRA members (or their designated third parties) are provided with the capability of submitting trade report information on over the counter corporate bond and agency debt securities. As stated in Regulatory Notice 10-23 (April 2010) and later modified to become effective May 16, 2011, member firms will be required to report trades in asset-backed securities, mortgage-backed securities and other similar securities, collectively defined hereinafter as Securitized Products (SP), to TRACE. As part of this implementation, TRACE will support interactive messaging via FIX protocol. This document describes the formats of the FIX inbound and outbound messages for SP trade reporting to TRACE.

Participants will be able to enter and correct TRACE trades through their FIX interfaces during the TRACE Securitized Products reconciliation cycle that consists of T-Day through T-20 (business days) entries. Trades that were submitted greater than T-20 are not retained in the TRACE system for trade management purposes. Such trades may be reversed using Reversals (formerly known as Historical Cancels) or corrected using a combination of a Reversal and new As-of Trade Capture Report.

The Eastern Time operating hours of the TRACE system are as follows:

Market/System open :	8:00 A.M.
Market Close:	5:15 P.M.
System Close:	6:30 P.M.

When a trade is entered into TRACE, a control date and number will be assigned to identify the trade throughout its TRACE processing and a status will be assigned to reflect its processing state. As trades are entered into the system, TRACE will validate trade information, forward proper acknowledgment messages to the Reporting Parties (RP) and Allege messages to the Contra Parties (CP) of the trades. Acknowledgment and Allege messages will contain the terms of the trade, the TRACE assigned status, control date and control number which uniquely identifies each trade. Participants will utilize the combination of TRACE assigned control date and control number to communicate with the TRACE system for subsequent trade report correction processing. Participants may also modify trades using their own assigned reference numbers (Client Trade Identifier) in combination with the TRACE Control Date. Trade reports of Securitized Products will be retained in the TRACE system on a rolling 20 business day period (T-20) and available for subsequent trade management processing (Cancel or Correction). A Cancel or Correction of a previously reported trade submitted prior to the T-20 period is allowed via submission of a Reversal or a combination Reversal/new As-of trade report.

TRACE will forward proper Notification messages to the trading parties as trades are corrected. Each Notification message will contain the control date, control number and the updated status of the corrected trade.

The TRACE SP FIX specifications are applicable to both the T-day and As-of (T+n) trade reporting process. Any trade executed during or off market hours, which has not been reported during T-day, may be reported to TRACE on T+1 or later on an As-of basis (please note trades of Securitized Products with an execution date prior to May 16, 2011 will not be accepted).

For questions concerning FIX connectivity, please contact NASDAQ Technical Support at (212) 231-5180 or via email to: <u>tradingservices@nasdaqomx.com</u>. For questions concerning SP trade reporting and TRACE, please contact FINRA Product Management at (866) 899-2107 or via email to: FINRAProductManagement@finra.org.

## 2 FIX Protocol

The messaging described in this specification adheres to the standard FIX 4.4 protocol. Please refer to <u>http://fixprotocol.org/specifications/FIX.4.4</u> for further details.

The interface follows the FIX specifications as far as possible. In the majority of cases the structure and semantics of the messages are identical to the standard.

In some cases, the protocol has been extended to cover functions not considered by the standard. These extensions are clearly detailed in the document. In other cases, the standard is ambiguous or indicates that the details should be bilaterally agreed between the parties. In these cases this manual provides a detailed description to avoid any possible ambiguity.

#### 2.1 Supported Messages

#### 2.1.1 Administrative messages

Logon (in/out) Logout (in/out) Sequence Reset (in/out) Resend Request (in/out) Reject (out) Heartbeat (in/out) Test Request (in/out)

#### 2.1.2 Application Messages

Trade Capture Report (in) Trade Capture Report (out) Trade Capture Report Ack (out)

## 3 The FIX Session

The session layer conforms to the standard FIX session. Please see the standard FIX specification for additional details.

## 3.1 ComplDs

The Sender- and TargetCompID uniquely define the FIX session. A session can only be active (established) between two hosts simultaneously. Any attempts to establish a second FIX session using the same CompIDs (for instance to a backup gateway) in parallel will be rejected.

- The TargetCompID (56) on all *inbound* transactions must be set to "FNRA".
- The SenderCompID (49) on all *outbound* transactions will always be set to "FNRA".

The Sender- and TargetCompID used by the client are defined in a separate agreement.

## 3.2 SubIDs

For inbound transactrions:

- The TargetSubID (57) must be set to "SP".
- The SenderSubID (50) must be set to the user ID defined in a separate agreement.

For *outbound* transactions:

- The TargetSubID (57) will be set to the user ID (same as inbound SenderSubID).
- The SenderSubID (50) will be set to "SP".

#### 3.3 Logon and authentication

At Logon, clients are identified by:

- CompIDs (SenderCompID and TargetCompID)
- IP Address

When the client is authenticated, the system responds with a Logon message to the client.

#### 3.4 Heartbeat intervals

Heartbeat intervals are negotiated at Logon using the HeartBtInt (108) field. The system accepts a heartbeat interval set to 30 s

#### 3.5 Encryption

The system does not support encryption.

#### 3.6 Datatypes and required fields

This specification does not change the data type on any fields defined in the standard FIX specification. There may be places where this specification restricts the value range of a field further than specified in standard FIX. This will be clearly marked in the spec.

All fields listed in this specification that are marked as required in the standard specification, are required also in this specification. This document specifies additional fields as required by FINRA. These fields are marked with an 'F' in the required column of the message listings.

#### 3.7 Character encoding

Standard FIX 7-bit US-ASCII character encoding is used.

## 3.8 FIX Timestamps

In FIX all timestamps are expressed in GMT/UTC. Please refer to the standard FIX specification for additional details.

#### 3.9 Session lifetime

The FIX session lifetime is restricted to one trading day. The session lifetime is not ended at connectivity loss or even Logouts. The sequence numbers are reset to one each morning.

#### 3.10 Failover and message recovery

At reconnect and Logon standard FIX message recovery is performed. All FIX sessions have at least one primary and one secondary gateway to which the session states are fully replicated. This means that regardless to which gateway a client connects, full message recovery is provided.

A client cannot have the same FIX session active towards multiple gateway instances simultaneously.

#### 3.11 FIX Session Level Test Cases

This implementation is fully compliant with the session-level test cases specified in the standard FIX 4.4 Specification, Volume 2, section "FIX Session-level Test Cases and Expected Behaviors". The only exception is the encryption test cases.

## 3.12 Drop Copy Sessions

Drop Copy Sessions, or Drops, can be set up to mirror outbound traffic on one or more FIX sessions. All outbound Quote Status Reports will be seen on the Drop.

Drop Copy Sessions are separate FIX sessions from the sessions which it replicates. This means the Drop session will have its own CompIDs, so the copied messages will differ slightly from the originals. All copied messages will have the CopyMsgIndicator (797) tag set to "Y".

Note that this is an extension to standard FIX where only Execution Reports and Trade Capture Reports can be copied to a drop.

#### 3.13 The Standard Header

All FIX messages contain a Standard Header. The header contains important information such as session identifiers (CompIDs), sequence numbers and message type and length etc.

Tag	FIX Field name	Req'd	Comment
8	BeginString	Y	
9	BodyLength	Y	
35	MsgType	Y	
49	SenderCompID	Y	As specified in separate agreement
50	SenderSubID	F	Your User ID as defined in separate agreement.
56	TargetCompID	Y	Valid values: "FNRA"
57	TargetSubID	F	Valid values: "SP"
34	MsgSeqNum	Y	
43	PossDupFlag		Always required for retransmitted messages
97	PossResend		
52	SendingTime	Y	Time of message transmission (always expressed in UTC (Universal Time Coordinated, also known as "GMT"))

3.13.1 Inbound Header

|--|

#### 3.13.2 Outbound Header

Tag	FIX Field name	Req'd	Comment
8	BeginString	Y	
9	BodyLength	Y	
35	MsgType	Y	
49	SenderCompID	Y	Set to "FNRA"
50	SenderSubID	F	Set to "SP"
56	TargetCompID	Y	As specified in separate agreement
57	TargetSubID	F	Your User ID as defined in separate agreement.
34	MsgSeqNum	Y	
43	PossDupFlag		Always required for retransmitted messages
97	PossResend		
			Time of message transmission (always expressed in UTC
52	SendingTime	Y	(Universal Time Coordinated, also known as "GMT"))
122	OrigSendingTime		

#### 3.14 The Standard Trailer

All FIX messages end with a Standard Trailer. The trailer only includes a simple checksum field. The details on how to calculate the checksum can be found in the standard FIX specification.

Tag	FIX Field name	Req'd	Comment
10	CheckSum	Y	

#### 3.15 Message Details

#### 3.15.1 How to interpret the Required (Req'd) column

A 'Y' marks the field as required in standard FIX (and of course also in this implementation). An 'F' means that the field is required in this implementation although it is not required in standard FIX. No entry at all means the field is optional.

#### 3.15.2 Default values

Fields which has enumerated values, where one is marked as "default value" need not be included in the message at all if the default value is used.

#### 3.15.3 Logon – inbound to FINRA

The response to a logon is either a Logon, which denotes a successful logon, or a Logout.

A client must be prepared to handle failure scenarios including (but not limited to):

A Logon attempt may fail or be rejected for several reasons. The FIX gateway will react differently depending on the kind of failure. The two different actions it may take are:

#### Silently ignore the Logon.

• If the wrong Sender or Target CompID is specified.

• For other reasons specified in the standard FIX specifications.

#### **Respond with a Logout.**

- If the FIX gateway has no connection with the back-end system.
- Logon failure for other reasons than authentication/security.

The Logout response to a Logon will always contain a note on why in the Text (58) field.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = A
98	EncryptMethod	Y	Encryption not supported. Valid values: 0 = None / Other
108	HeartBtInt	Y	Heartbeat interval. Valid value: 30 s
	Standard Trailer	Y	

#### 3.15.4 Logon – outbound from Marketplace

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = A
98	EncryptMethod	Y	Encryption not supported. Valid values: 0 = None / Other
108	HeartBtInt	Y	Heartbeat interval. Valid value: 30 s
	Standard Trailer	Y	

## 3.15.5 Logout (in/out)

The Logout message is used to gracefully disconnect a FIX session. When receiving a Logout, the counterparty should respond with a Logout. A Logout can also be the response to an unsuccessful Logon attempt.

Tag	FIX Field name	IX Field name Req'd Comment	
	Standard Header	Y	MsgType = 5
58	Text		Free text
	Standard Trailer	Y	

#### 3.15.6 Sequence Reset (in/out)

This message has two uses. The common usage is with GapFillFlag set to 'Y', which is used in a response to a Resend Request to indicate that a range of messages will not be resent. This is commonly used to avoid resending administrative messages like Heartbeats.

The other (very rare) usage is to reset the sequence numbers to a higher number to get out of a deadlock. This is only triggered by manual intervention.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = 4
123	GapFillFlag		Indicates that the Sequence Reset message is replacing administrative or application messages which will not be resent.
36	NewSeqNo	Y	New sequence number. The next Sequence Number to be expected after this message.
	Standard Trailer	Y	

## 3.15.7 Resend Request (in/out)

Resend Request is used to recover messages when a sequence number gap has been detected.

Tag	FIX Field name	Req'd	Comment
	Standard Header	Y	MsgType = 2
			Message sequence number of first message in range to be
7	BeginSeqNo	Y	resent
			Message sequence number of last message in range to be
			resent. If request is for a single message BeginSeqNo (7) =
16	EndSeqNo	Y	EndSeqNo. If request is for all messages subsequent to a

			particular message, EndSeqNo = "0" (representing infinity).
	Standard Trailer	Y	

## 3.15.8 Reject (out)

The Reject, or session-level reject, message is sent whenever the FIX gateway is able to at least partially parse the message, but the message does not adhere to the specification and cannot be delivered to the back-end system.

Tag	TagFIX Field nameReq'd		Comment
	Standard Header	Y	MsgType = 3
45	RefSeqNum	Y	MsgSeqNum of rejected message
371	RefTagID		The tag number of the FIX field being referenced.
372	RefMsgType		The MsgType of the FIX message being referenced.
373	SessionRejectReason	F	Valid values: 0 = Invalid Tag Number 1 = Required Tag Missing 2 = Tag Not Defined For This Message Type 3 = Undefined Tag 4 = Tag Specified Without a Value 5= Value Is Incorrect Out Of Range For This Tag 6 = Incorrect Data Format For Value 9 = CompID Problem 10 = Sending Time Accuracy Problem 11 = Invalid Msg Type 99 = Other
58	Text		Where possible, message to explain reason for rejection
	Standard Trailer	Y	

#### 3.15.9 Heartbeat (in/out)

A heartbeat message is sent at the interval set at Logon. It is also the response to a Test Request message.

Tag	FIX Field name	Req'd	Comment			
	Standard Header	Y	MsgType = 0			
			Required when the heartbeat is the result of a Test			
112	112 TestReqID		Request message.			
	Standard Trailer					

## 3.15.10 Test Request (in/out)

Test Request is used to "ping" the counterparty whenever a heartbeat has not arrived at the negotiated heartbeat interval.

Tag	FIX Field name	Req'd	Comment	
	Standard Header	Y	MsgType = 1	
			Identifier included in Test Request message to be returned	
112	TestReqID	Y	in resulting Heartbeat	
	Standard Trailer	Y		

## 4 General Trade Reporting in FIX

## 4.1 Introduction

Trades may, subject to regulations or bilateral agreement, be reported to the marketplace in the following cases:

- Trades negotiated between market participants without using execution mechanisms provided by the Marketplace
- Trades formed at other execution venues but reported to the marketplace for regulatory or publication reasons. Such execution venues may include (systematic) internalizers, ECN's, ATS's, and others regulated markets. (*Not supported in this solution*)

## 4.2 Trade Capture Report Processing

For exchanges, Trade Capture Reports (TCR) have two related purposes; to confirm trades and reporting of privately negotiated trades. Usage of tags differ slightly depending on the purpose of the message:

The confirmed Trade:Identifier:TradeIDAction:TradeReportType

The process of confirming a trade:

Identifier: **TradeReportID**. Each actor issues their own id for every message sent (excluding TCR Ack messages). To reference a previous message, the **TradeReportRefID** tag is used.

- An initiator always uses TradeReportRefID when referring to a previous report.
- The marketplace uses TradeReportRefID in confirmed trades to reference external actors previous TradeReportIDs.
- The counterparty uses TradeReportRefID in Accept/Decline messages to reference TradeReportIDs set by the marketplace in Alleged transactions.

Action: TradeReportTransType

#### 4.3 As-Of Trades

In FIX, an As-Of Trade is submitted by setting the TradeDate field to the date when the trade occurred and setting the AsOfIndicator (1015) to 1. An original T Date Trade is reported by setting TradeDate to the current date and setting the AsOf Indicator to 0 or omitting the tag.

## 4.4 Reversals

A deletion of a previously reported trade submitted on a prior day is allowed via submission of a *Reversal*. This message is used to cancel a TRACE trade entry which was originally reported prior to the rolling T-20 day period. A Reversal must contain all the values submitted in the original Trade. The exception is the original trade identifier (in field TradeReportRefID), which is not required, and will not be used as a basis to look up the original trade. See section 5.1.3 for message details. Firms wishing to correct a TRACE trade entry which was originally reported prior to the rolling T-20 day period are required to submit a Reversal, followed by an As-Of Trade with the correct trade details.

## 4.5 Identifiers

#### 4.5.1 Trade Report ID

The TradeReportID (571) is similar to the ClOrdID used for orders and executions. A unique Trade Report ID must be set on all reported trades (TCR) inbound to the marketplace. If a client wants to cancel a

previous Trade Report, he can use the TradeReportRefID to refer to the original TraderReportID. There is one important exception to the analogy of ClOrdIDs. The marketplace sets its own TradeReportIDs on outbound TCRs (like confirmed trades).

This is the equivalent of the CTCI Client Trade Identifier.

## 4.5.2 Trade Report Reference ID

The TradeReportRefID (572) is used to refer to a previous TCR. A submitter of a reported trade can use TradeReportRefID in subsequent cancellations (with the exception of Reversals) to the reported trade. The marketplace, which sets its own TradeReportIDs on outbound trade confirmations, uses the TradeReportRefID to reference *the submitters TradeReportID* from the original trade report, for example on confirmations to reported trades.

#### 4.5.3 Trade ID

*TradeID* (1003) is a FINRA extension to FIX 4.4. TradeID carries the ten digit Control Number which the TRACE System had assigned to the TRACE trade when it was accepted by the TRACE System.

#### 4.5.4 Original Trade ID

*OrigTradeID* (1126) *is a FINRA extension to FIX 4.4*. OrigTradeID carries the ten digit control number which the TRACE System had assigned to the TRACE trade when it was originally accepted by the TRACE System.

This is the equivalent of the CTCI Original Control Number.

#### 4.5.5 Secondary Firm Trade ID

SecondaryFirmTradeID (1042) is a FINRA Extension to FIX 4.4. It contains the internal ID assigned to a trade by the contra side (Contra Client Trade Identifier). This field can only be submitted on Locked-In trades.

#### 4.5.6 Party Identifiers

There may be many parties involved in a trade. In FIX, the identifiers and roles of each party is defined in the Parties block. The Parties block is a repeating group of identifiers which can carry an unlimited number of parties and their roles. The Parties block consists of the following fields:

Tag	FIX Field name	Comment			
453	NoPartyIDs	Number of parties included in the message			
		The actual identifier of the party. In this case always the 4			
		character MPID on interdealer trades. On Customer trades,			
448	PartyID	the contra party must be submitted with the value C.			
		Defines the type of the identifier used as PartyID. In this			
		solution always C = Generally accepted market participant			
447	PartyIDSource	identifier (e.g. FINRA mnemonic)			
452	PartyRole	Defines the role of the current party.			

The last three fields listed above are required for each party.

Party Role	Comment
	MPID of the Giveup Firm, when applicable. A TRACE Service
	Bureau/Executing Broker Supplement (Attachment B of the TRACE
	Participation Agreement) must be in place in order for firms to submit
	trade reports on behalf of their give ups. Can be set for the Contra party
Giveup Firm	only if the reporting firm submits the trade as a Locked-in trade.
Executing Firm	MPID of Reporting party (owner of the trade).
Entering Firm	MPID of the party (Service Bureau) sending the trade on behalf of a

The following party roles are supported:

	client. A TRACE Service Bureau/Executing Broker Supplement (Attachment B of the TRACE Participation Agreement) must be in place in order for firms to submit trade reports on behalf of their correspondents.
Clearing Firm	Clearing Firm Number. Not really a party but treated as such in FIX.
	MPID of Contra party or "C" to denote the contra is a non-FINRA
Contra Firm	member (Customer trade).

In addition to the above three main party identifier fields, there is also a Parties Sub identifier group that may be added to certain parties. This group contains the following fields:

- NoPartySubIDs (802) Number of Party sub identifiers. In this solution always set to 1 if present.
- **PartySubID** (523) The actual Party Sub Identifier. In this solution only used for identifying a branch office of a reporting party or a contra party (Contra party branch office may only be submitted on Locked-In trades).
- **PartySubIDType** (803) Type of sub identifier. In this solution always set to 24 = Department.

The Parties sub identifiers are only allowed to be attached to the reporting party or to the contra party (on Locked-In trades).

In this solution the Trade Capture Reports contains one set of parties for each Side (Buy/Sell) of the trade. The parties are found in the repeating group called TrdCapRptSideGrp. This group will always contain two sides (NoSides = 2), one buy and one sell<sup>1</sup>. Each of these contains a Parties repeating group.

- The reporting side (buy or sell) *must* contain a PartyID with PartyRole = Executing Firm.
- The contra side (opposite of reporting side) *must* contain a PartyID with PartyRole = Contra Firm.

PartyIDs with other Party Roles may be added as necessary to both sides. See chapter 8 for examples on how to populate the Party identifier fields.

#### 4.5.7 Trades reported by a Service Bureau

A Service Bureau entering a trade on behalf of a client must add an extra party to the reporting side of a Trade Capture Report. The extra party must contain the following values:

PartyID must be set to the MPID of the Service Bureau

PartyRole must be set to 7, Entering Firm.

PartyIDSource must be set to C, FINRA mnemonic.

Transactions returned to the Service Bureau will have TargetCompID set to the bureau's CompID and DeliverToCompID (128) set to the bureau's clients CompID.

#### See section 8.7 for an example on how to populate the Service Bureau Party identifier fields.

#### 4.6 Timestamps and dates

Timestamps and dates can be represented in several was in FIX. The data types used in this solution are:

Data Type	Format	Comment
	YYYYMMDD	The most common data type in FIX. Used in standard FIX tags
	-HH:MM:SS	such as TransactTime (60), SendingTime (52) etc.
		NOTE 1: times are given in UTC (GMT).
		NOTE 2: FIX allows milliseconds as well, but that is not used
UTCTimestamp		in the solution.
	YYYYMMDD	Standard date. Notice that it is NOT in UTC. Used in standard
LocalMktDate		tags such as TradeDate (75).
	HH:MM:SS	Basically the time part of a UTCTimestamp.
UTCTimeOnly		NOTE: times are given in UTC (GMT).

<sup>&</sup>lt;sup>1</sup> The exception is Trade Cancels, which only contains one side (the reporting side).

#### 4.6.1 TransactTime

TransactTime (60) is a standard FIX tag that is set to the time the transaction it is contained in occurred. **Format:** UTCTimestamp

#### 4.6.2 SendingTime

SendingTime (52) is contained in the header of every FIX message and must contain the time of message transmission.

Format: UTCTimestamp

#### 4.6.3 TradeDate

TradeDate (75) is used to indicate the date the trade occurred. **Format:** LocalMktDate

#### 4.6.4 ExecutionTime

ExecutionTime (22007) is a field defined by FINRA. It denotes the time of execution. Outbound messages contain the value set in the inbound message. **Format:** UTCTimeOnly

#### 4.6.5 PreparationTime

PreparationTime (22009) is an optional field defined by FINRA. Denotes the time the submitter prepared the transaction for submission. Outbound messages contain the value set in the inbound message. It is a standard FIX UTCTimestamp formatted field containing both date and time in UTC formatted as described above.

Format: UTCTimeOnly

#### 4.6.6 ControlDate

ControlDate (22011) is a field defined by FINRA. When a trade is submitted to TRACE and accepted, the system will return a ControlDate with the trade acknowledgement. The ControlDate reflects the date when the system received and processed the trade entry. The ControlDate together with the Control Number (FIX TradeID) uniquely identifies a trade. Control Date is required in conjunction with Control Number (TradeID) or Trade Report ID (Client Trade Identifier) to subsequently cancel or correct a trade. **Format:** LocalMktDate

#### 4.6.7 OrigControlDate

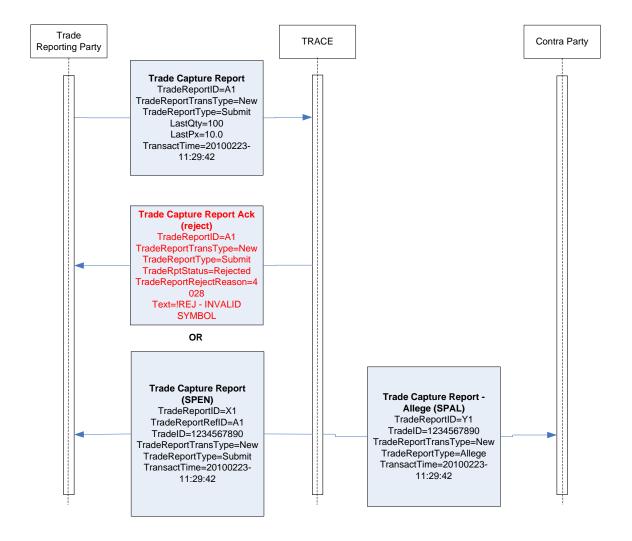

OrigControlDate (22012) is a field defined by FINRA. When a trade is submitted to TRACE and accepted, the system will return a ControlDate with the trade acknowledgement. The OrigControlDate reflects the date when the system received and processed the *original* trade entry. It is found on trade correction acknowledgements.

Format: LocalMktDate

## 4.7 Workflows

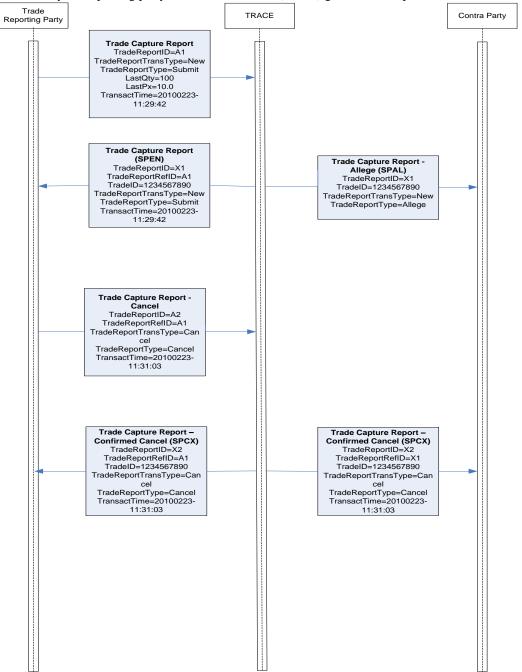

#### 4.7.1 Reporting a Trade

In this example the reporting party reports that the trade was executed at 5:29 PM (11:29 UTC), so it is marked as an After Market Hours Trade by TRACE. If the Trade is accepted by TRACE, the contra party will receive an Allege (SPAL) transaction.

## 4.7.2 Cancelling a Trade

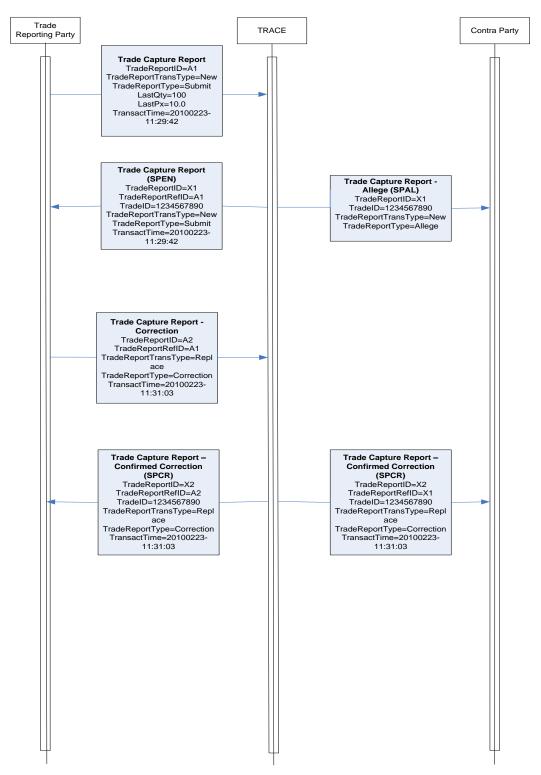

In this example a trade is reported and confirmation messages go out to both parties. The trade is then cancelled by the reporting party and the trade cancel (SPCX) go out to both parties.

Please note: Reversal inbound messages and their related outbound confirmations (SPHX) will follow the same flow as Trade Cancels.

#### 4.7.3 Correcting a Trade

In this example a trade is reported and confirmation messages go out to both parties. The trade is then corrected by the reporting party and the trade correction confirmations (SPCR) go out to both parties.

## **5** Message Formats

## 5.1.1 Trade Capture Report – Reporting a trade (in)

Tag	FIX tag name	Req'd	Comment
	Standard Header	Y	MsgType = AE
			Client-generated identifier, not to exceed 20
571	TradeReportID	Y	characters.
			FINRA Extension to FIX 4.4: The Contra Client
			Identifier assigned to a trade by the contra side.
1042	SecondaryFirmTradeID		Only used for Locked-in Trade Reports.

			price. Valid values:
			Y = Special price
22005	SpecialPriceIndicator		N = No special price (default)
22000	SpecialPriceIndicator		
0000-			Execution time of the original submission
22007	ExecutionTime	F	(in UTC/GMT). Format: HH:MM:SS
			Time of cancel trade submission (in
22009	PreparationTime		UTC/GMT). Format: HH:MM:SS
22000	•		
		F	Control Date of the original trade. Used

		Format: YYYYMMDD
Standard Trailer	Y	

Please note: in order to correct a trade report submitted prior to the T-20 period, firms must submit a Reversal, followed by a new As-Of Trade Capture Report (as outlined in section 5.1.1) containing the correct trade data. Separate confirmations (SPHX and SPEN) will be returned for each submission.

## 5.1.4 Trade Capture Report – Trade Correction (in)

To be used only for T Date through T-20 corrections. Unless otherwise noted, all fields follow rules/definitions as outlined in the Comments column of the Trade Capture Report inbound message (5.1.1).

**NOTE:** A successful Correction transaction will result in a new TradeID being generated. The acknowledgement (SPCR) will contain the original TRACE control number in OrigTradeID.

		<b>T</b> . ·			User Memo Only on the Reporting Party
$\rightarrow$	58	Text			side. Will not be displayed to Contra

	party.
	FINRA Extension to FIX 4.4. Special Price
	Memo. A fifty character alphanumeric
	subscriber MEMO field. Required when
	the field Special Price Indicator = Y.
	To describe the reason why the trade was
	executed at a special price. This field may
5149 Memo	be displayed to the Contra party.
	FINRA Extension to FIX 4.4.
	Valid values:
	Y = Yes
9854 OverrideFlag	N = No (default value)
	FINRA Extension to FIX 4.4.
	Indicates that the firm entering the trade is
	reporting for both sides of the trade. This
	occurs when two of its give-ups trade with
	each other or the firm trades with one of
	its own give-ups. Valid values:
	Y = Yes
22013 LockedInIndicator	N = No (default value)
	Optional field. Factor amount of the
	trade. Enter a value if the percentage
	other than the latest published Factor was
	used. 12 characters including the use of
228 Factor	a floating decimal.
	FINRA Extension to FIX 4.4. Reserved for
22001 TradeModifier1	future use.
	FINRA Extension to FIX 4.4. Required for
	ABS trades. This field must be used to
	identify if an ABS trade is executed in the
	Primary or Secondary market. Omit tag
	for all other SP trades.
	Valid Values:
	P = Trade was executed in the Primary
	market
	S = Trade was executed in the Secondary
	<u>market</u>
	FINRA Extension to FIX 4.4. Reserved for
22002 TradeModifier2	futuro uso.
	FINRA Extension to FIX 4.4. Required
	indicator if a trade falls under one of the
	following transaction types (otherwise the
	field must not be set):
	O = Specified Pool Transaction (MBS
	securities only)
	N = Stipulation Transaction (TBA
	securities only)
	L = Stipulated Dollar Roll (TBA securities
	only)
	D = Dollar Roll w/o Stipulation (TBA
	securities only)
	W = Weighted Average Price (all SP
22004 TradeModifier4	securities)

22005	Special	ProcessingFlag		This field allows a trade to be marked for special processing-(e.g., position- transfers). Position Transfers_MUST be authorized by FINRA Operations prior to submission of trades. Valid values: N = No Special Processing (default) Y = Position Transfer_(auth required)
22006	Special	PriceIndicator		Special Price Indicator. Valid values: Y = Special price N = No special price (default)
22011	Control	Date	F	Control Date of the original trade. Used together with TradeID to identify a trade. Format: YYYYMMDD
20453	Original	NoPartyIDs		Number of original Party IDs. The OriginalParties group is required when TradeReportRefID is used to identify the original transaction. Will be set to 1 in this case.
$\rightarrow$	· · ·	OriginalPartyID		Original Reporting Party MPID.
$\rightarrow$		OriginalPartyIDSource		Valid values : C = Generally accepted market participant identifier (e.g. FINRA mnemonic)
$\rightarrow$	20452	OriginalPartyRole		Valid values: 1 = Executing Firm
22007	22007 Execution Time			Execution time (in <b>UTC/GMT</b> ). Format: HH:MM:SS

## 6 Custom values and user defined fields

This chapter details how this solution deviates from standard FIX 4.4. While great care has been taken to conform to the standard, a number of deviations are unavoidable to support all mechanisms provided by the host. Wherever later versions of FIX (up to version 5.0 SP2) provide the missing functionality, we have chosen to use that.

The deviations come in two forms, added fields and added values to existing fields.

#### 6.1 Fields added

A number of fields had to be added to standard FIX 4.4 to cover all the requirements in this solution. Wherever possible, fields from later versions of FIX (5.0 SP2) has been used. Custom fields have been added in two ranges:

- In the 22XXX-range custom fields with no representation in standard FIX has been added.
- The 20001-21XXX range is primarily used for the historical transactions (trades submitted prior to the T-20 period), where certain fields need to appear twice; once with the original values, and once with the new values. Since the same FIX tag can't appear twice in the same message outside a repeating group, copies of the original FIX tags had to be added. They have the same data type as the "real" FIX tags, the names are prefixed with "Original", and the tag number prefixed with 20.

		FIX	
Tag	FIX tag name	5.0	Comment
1003	TradeID	Yes	
1015	AsOfIndicator	Yes	
1042	SecondaryFirmTradeID	Yes	
5149	Memo	No	
9854	OverrideFlag	No	
1126	OrigTradeID	Yes	
22001	TradeModifier1	No	
22002	TradeModifier2	No	
22003	TradeModifier3	No	
22004	TradeModifier4	No	
22005	SpecialProcessingFlag	No	
22006	SpecialPriceIndicator	No	
22007	ExecutionTime	No	
22009	PreparationTime	No	
22011	ControlDate	No	
22012	OrigControlDate	No	
22013	LockedInIndicator	No	
22015	BranchOfficeCodeSequenceNumber	No	
20453	OriginalNoPartyIDs	No	
20448	OriginalPartyID	No	
20447	OriginalPartyIDSource	No	
20452	OriginalPartyRole	No	

The following fields have been added to FIX 4.4:

### 6.2 Enumerations added

Enum	Enum description	Tag	Comment
83	Clearing Account	452	PartyRole
4001-		751	
4071	Different reject reasons		TradeReportRejectReason

# 7 Limitations

### 7.1 Field lengths and data types

All fields in this specification adhere to the standard FIX 4.4 field definitions. Please refer to http://fixprotocol.org/specifications/FIX.4.4 for details. In addition, this solution imposes the following restrictions on fields:

Tag	FIX tag name	Comment
448	PartyID	PartyID. Max valid 4 character MPIDs.
571	TradeReportID	Limited to 20 characters
572	TradeReportRefID	Limited to 20 characters
1042	SecondaryFirmTradeID	Limited to 20 characters
32	LastQty	Format: nnnnnnnnnnnn
31	LastPx	Format: nnnn.nnnnn
12	Commission	Format: nnnnn.nn
1003	TradeID	Max ten digits.
1126	OrigTradeID	Max ten digits.
455	SecurityAltID	Max 14 characters.
48	SecurityID	9 character CUSIP code.
5149	Memo	Max 50 characters.
523	PartySubID	Max 8 characters
22013	LockedInIndicator	FIX Data type: Boolean
		Decimal number. Max 12 characters including
228	Factor	decimal point. FIX Data type: float
22015	BranchOfficeCodeSequenceNumber	FIX Data type: String

# 8 Trade Report Examples

**NOTE:** The following examples are meant to highlight how important fields (in particular the party identifier fields) are intended to be populated in different scenarios. *To improve clarity, only the most important fields have been included in the listings.* 

#### 8.1 Example 1: Simple trade between 2 parties (Interdealer trade)

Broker Dealer A (ABCD) is the Reporting Party selling to Broker Dealer B (EFGH) as the Contra Party

	TAG		TAG Name	Value	Comment
552			Number of Sides	2	Report contains information on both sides of the trade.
$\rightarrow$	54		Side	2	Indicates the following repeating group represents the sell side of the trade.
$\rightarrow$	453		Number of parties on the Reporting side	2	Reporting party (who is the executing firm) and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A's MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	1	Executing firm (reporting on his own behalf).
$\rightarrow$	$\rightarrow$	448	Party ID	0123	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Executing firm.
$\rightarrow$	528		Order Capacity	Р	Principal.
$\rightarrow$	54		Side	1	Indicates the following repeating group represents the buy side of the trade.
$\rightarrow$	453		Number of parties on the Contra side	1	Only the Contra firm.
	$\rightarrow$	448	Party ID	EFGH	Broker Dealer B's MPID.
	$\rightarrow$	452	Party Role	17	Contra Firm.

• Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.

• The Locked-In Indicator (Tag 22013) is not submitted therefore only Contra Party ID/role can be submitted for the contra portion of the report.

• Order Capacity (Tag 528), Commission (Tag 12), Party Sub ID *aka* Contra Branch Sequence (Tag 523), Secondary Firm Trade ID *aka* Contra Client Trade Identifier (Tag 1042) and any other related contra Tags cannot be repeated or submitted since the trade was not submitted as a Locked-In trade (Tag 22013). If any of these Tags are repeated/submitted, the trade will be rejected.

# 8.2 Example 2: Simple trade between a broker-dealer and its customer (Customer trade)

	TAG		TAG Name	Value	Comment
552			Number of Sides	2	Report contains information on both sides of the trade.
$\rightarrow$	54		Side	1	Indicates the following repeating group represents the buy side of the trade.
$\rightarrow$	453		Number of parties on the Reporting side	2	Reporting party (who is the executing firm) and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A's MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	1	Executing firm (reporting on his own behalf).
$\rightarrow$	$\rightarrow$	448	Party ID	0123	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Executing firm.
$\rightarrow$	528		Order Capacity	А	Agent.
$\rightarrow$	12		Commission	500.00	Determined to be Buyer's commission based on Tag 54 value of 1.
$\rightarrow$	54		Side	2	Indicates the following repeating group represents the sell side of the trade.
$\rightarrow$	453		Number of parties on the Contra side	1	Only the Contra firm.
$\rightarrow$	$\rightarrow$	448	Party ID	С	Customer MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	17	Contra Firm.

Broker Dealer A (ABCD) is the Reporting Party buying from a customer (C) as the Contra Party

• Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.

• The Locked-In Indicator (Tag 22013) is not submitted therefore only Contra Party ID/role can be submitted for the contra portion of the report.

• Order Capacity (Tag 528), Commission (Tag 12), Party Sub ID *aka* Contra Branch Sequence (Tag 523), Secondary Firm Trade ID *aka* Contra Client Trade Identifier (Tag 1042) and any other related contra Tags cannot be repeated or submitted since the trade was not submitted as a Locked-In trade (Tag 22013). If any of these Tags are repeated/submitted, the trade will be rejected.

#### 8.3 Example 3: Simple Give-Up trade between 2 parties

Broker Dealer A (ABCD) is the Reporting Party Giving Up Broker Dealer C (MNOP) who is buying from Broker Dealer B (EFGH)

	TAG		TAG Name	Value	Comment
552			Number of Sides	2	Report contains information on both sides of the trade.
$\rightarrow$	54		Side	1	Indicates the following repeating group represents the buy side of the trade.
$\rightarrow$	453		Number of parties on the Reporting side	3	Reporting party, the Give-up firm and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	1	Executing Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	MNOP	Broker Dealer C MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	14	Giveup Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0123	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Giveup firm.
$\rightarrow$	528		Order Capacity	А	Agent.
$\rightarrow$	12		Commission	500.00	Determined to be Buyer's commission based on Tag 54 value of 1.
$\rightarrow$	54		Side	2	Indicates the following repeating group represents the sell side of the trade.
$\rightarrow$	453		Number of parties on the Contra side	1	Only the Contra firm.
$\rightarrow$	$\rightarrow$	448	Party ID	EFGH	Broker Dealer B MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	17	Contra Firm.

• Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.

- The Locked-In Indicator (Tag 22013) is not submitted therefore only Contra Party ID/role can be submitted for the contra portion of the report.
- Order Capacity (Tag 528), Commission (Tag 12), , Party Sub ID *aka Contra Branch Sequence* (Tag 523), Secondary Firm Trade ID *aka Contra Client Trade Identifier* (Tag 1042) and any other related contra Tags cannot be repeated or submitted since the trade was not submitted as a Locked-In trade (Tag 22013). If any of these Tags are repeated/submitted, the trade will be rejected.

#### 8.4 Example 4: One-Sided Locked-In Trade

Broker Dealer A (ABCD) is the Reporting Party Giving Up Broker Dealer C (MNOP), who he trade	ed
with. ABCD bought from MNOP.	

	TAG		TAG Name	Value	Comment
552			Number of Sides	2	Report contains information on both sides of the trade.
$\rightarrow$	54		Side	2	Indicates the following repeating group represents the sell side of the trade.
$\rightarrow$	453		Number of parties on the Reporting side	3	Reporting party, the Give-up firm and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	1	Executing Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	MNOP	Broker Dealer C MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	14	Giveup Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0123	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Giveup firm.
$\rightarrow$	528		Order Capacity	Р	MNOP acting as Principal.
$\rightarrow$	54		Side	1	Indicates the following repeating group represents the buy side of the trade.
$\rightarrow$	453		Number of parties on the Contra side	2	Contra firm and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	17	Contra Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0456	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Contra firm.
$\rightarrow$	528		Order Capacity	А	ABCD acting as Agent.
$\rightarrow$	12		Commission	500.00	Determined to be Buyer's commission based on Tag 54 value of 1.
22013			Locked-In Indicator	Y	Locked-In trade.

- TRACE rules require that all Locked-In trades must be submitted from the sell-side perspective. Since ABCD reports for MNOP, and ABCD bought from MNOP, ABCD reports the trade from MNOP's perspective (as the sell-side), therefore the Giveup role is contained within the Sell group of the message and ABCD is listed as the Contra under the Buy group.
- Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.
- The Locked-In Indicator (Tag 22013) is submitted therefore any Contra Party related tags can be submitted for the contra portion of the report.
- Order Capacity (Tag 528) must be repeated on Locked-In trades.
- Clearing Firm (83) must be repeated in Party Role (Tag 452) under both sides on Locked-in trades.
- Commission (Tag 12) may be omitted, submitted for one of the sides, or repeated under each side on Locked-In trades.

TRACE SP FIX Specification ver 1.5a

- Trade Report ID *aka Client Trade Identifier* (Tag 571) corresponds to the Reporting Party side and may be submitted. Secondary Firm Trade ID *aka Contra Client Trade Identifier* (Tag 1042) corresponds to the Contra Party side and may be submitted on a Locked-In trade.
- Party Sub ID *aka Branch Sequence* (Tag 523) may be omitted, submitted for one of the sides, or repeated under each side on Locked-In trades.
- All other Tags correspond to the reporting side of the trade.

#### 8.5 Example 5: One-Sided Locked-In Trade

Broker Dealer A (ABCD) is the Reporting Party Giving Up Broker Dealer C (MNOP), who he traded with. ABCD sold to MNOP.

	TAG		TAG Name	Value	Comment
552			Number of Sides	2	Report contains information on both sides of the trade.
$\rightarrow$	54		Side	2	Indicates the following repeating group represents the sell side of the trade.
$\rightarrow$	453		Number of parties on the Reporting side	2	Reporting/executing party and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	1	Executing Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0123	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Executing firm.
$\rightarrow$	528		Order Capacity	A	ABCD acting as Agent.
$\rightarrow$	12		Commission	500.00	Determined to be Seller's commission based on Tag 54 value
					of 2.
$\rightarrow$	54		Side	1	Indicates the following repeating group represents the buy side of the trade.
$\rightarrow$	453		Number of parties on the Contra side	3	Reporting party, the Give-up firm and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	17	Contra Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	MNOP	Broker Dealer C MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	14	Giveup Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0456	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Contra firm.
$\rightarrow$	528		Order Capacity	Р	MNOP acting as Principal.
00040					
22013			Locked-In Indicator	Υ	Locked-In trade.

- TRACE rules require that all Locked-In trades must be submitted from the sell-side perspective. Since ABCD reports for MNOP, and ABCD sold to MNOP, ABCD reports the trade from ABCD's perspective (as the sell-side), therefore the Giveup role is contained within the Buy (Contra) group of the message and ABCD is listed as the Executing firm under the Sell group.
- Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.
- The Locked-In Indicator (Tag 22013) is submitted therefore any Contra Party related tags can be submitted for the contra portion of the report.
- Order Capacity (Tag 528) must be repeated on Locked-In trades.
- Clearing Firm (83) must be repeated in Party Role (Tag 452) under both sides on Locked-in trades.
- Commission (Tag 12) may be omitted, submitted for one of the sides, or repeated under each side on Locked-In trades.

- Trade Report ID *aka Client Trade Identifier* (Tag 571) corresponds to the Reporting Party side and may be submitted. Secondary Firm Trade ID *aka Contra Client Trade Identifier* (Tag 1042) corresponds to the Contra Party side and may be submitted on a Locked-In trade.
- Party Sub ID *aka Branch Sequence* (Tag 523) may be omitted, submitted for one of the sides, or repeated under each side on Locked-In trades.
- All other Tags correspond to the reporting side of the trade.

#### 8.6 Example 6: Two-Sided Locked-In Trade

Broker Dealer A (ABCD) is the Reporting Party Giving Up both Broker Dealer C (MNOP) and Broker Dealer B (EFGH), who traded with one another. MNOP sold to EFGH. ABCD is not a part of the trade, merely entering the trade on behalf of both of its correspondents (MNOP and EFGH).

	TAG		TAG Name	Value	Comment
552			Number of Sides	2	Report contains information on both sides of the trade.
$\rightarrow$	54		Side	2	Indicates the following repeating
					group represents the sell side of the
	450		Number of portion on	2	trade.
$\rightarrow$	453		Number of parties on the Reporting side	3	Reporting party, the Give up firm (on the reporting side) and his clearing
					firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	1	Executing Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	MNOP	Broker Dealer C MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	14	Giveup Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0123	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Reporting Giveup
					firm.
$\rightarrow$	528		Order Capacity	A	MNOP acting as Agent.
$\rightarrow$	12		Commission	500.00	Determined to be Seller's
					commission based on Tag 54 value
	5.4		0.1	4	of 2.
$\rightarrow$	54		Side	1	Indicates the following repeating
					group represents the buy side of the trade.
$\rightarrow$	453		Number of parties on	3	Reporting party, the Give-up firm (on
,	-00		the Contra side	0	the contra side) and his clearing firm.
$\rightarrow$	$\rightarrow$	448	Party ID	ABCD	Broker Dealer A MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	17	Contra Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	EFGH	Broker Dealer B MPID.
$\rightarrow$	$\rightarrow$	452	Party Role	14	Giveup Firm.
$\rightarrow$	$\rightarrow$	448	Party ID	0456	Clearing firm number.
$\rightarrow$	$\rightarrow$	452	Party Role	83	Clearing firm of the Contra Giveup
					firm.
$\rightarrow$	528		Order Capacity	A	EFGH acting as Agent.
$\rightarrow$	12		Commission	500.00	Determined to be Buyer's
					commission based on Tag 54 value
22013			Locked-In Indicator	Y	of 1. Locked-In trade.
22013				I	

- TRACE rules require that all Locked-In trades must be submitted from the sell-side perspective. Since ABCD reports for both MNOP and EFGH, and MNOP sold to EFGH, ABCD reports the trade from MNOP's perspective (as the sell-side Giveup Firm), and EFGH is the contra Giveup Firm within the Buy group of the message. ABCD is listed as the Executing Firm under the reporting side and as the Contra Firm on the contra side.
- Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.

- The Locked-In Indicator (Tag 22013) is submitted therefore any Contra Party related tags can be submitted for the contra portion of the report.
- Order Capacity (Tag 528) must be repeated on Locked-In trades.
- Clearing Firm (83) must be repeated in Party Role (Tag 452) under both sides on Locked-in trades.
- Commission (Tag 12) may be omitted, submitted for one of the sides, or repeated under each side on Locked-In trades.
- Trade Report ID *aka Client Trade Identifier* (Tag 571) corresponds to the Reporting Party side and may be submitted. Secondary Firm Trade ID *aka Contra Client Trade Identifier* (Tag 1042) corresponds to the Contra Party side and may be submitted on a Locked-In trade.
- Party Sub ID *aka Branch Sequence* (Tag 523) may be omitted, submitted for one of the sides, or repeated under each side on Locked-In trades.
- All other Tags correspond to the reporting side of the trade.

# 8.7 Example 7: Trade between 2 parties reported by a Service Bureau on behalf of the reporting party

Service Bureau SB01 reports the trade on behalf of Broker Dealer A (ABCD), who is selling to				
Broker Dealer B (I	Broker Dealer B (EFGH), the Contra Party.			
		0		

DIONE	TAC TAC Nome Velue Comment					
	TAG		TAG Name	Value	Comment	
552			Number of Sides	2	Report contains information on both sides of the trade.	
$\rightarrow$	54		Side	2	Indicates the following repeating group represents the sell side of the trade.	
$\rightarrow$	453		Number of parties on the Reporting side	3	Entering Party (Service Bureau), Reporting party (who is the executing firm) and his clearing firm.	
$\rightarrow$	$\rightarrow$	448	Party ID	SB01	Service Bureau MPID.

	$\rightarrow$	448	Party ID	EFGH	Broker Dealer B MPID.	
	$\rightarrow$	452	Party Role	17	Contra Firm.	

• Number of sides (Tag 552) must always be submitted as "2" to allow identification of the Contra Party.

- The Locked-In Indicator (Tag 22013) is not submitted therefore only Contra Party ID/role can be submitted for the contra portion of the report.
- Order Capacity (Tag 528), Commission (Tag 12), Party Sub ID *aka* Contra Branch Sequence (Tag 523), Secondary Firm Trade ID *aka* Contra Client Trade Identifier (Tag 1042) and any other related contra Tags cannot be repeated or submitted since the trade was not submitted as a Locked-In trade (Tag 22013). If any of these Tags are repeated/submitted, the trade will be rejected.
- The Service Bureau adds it's MPID on the reporting side, with the Party Role set to Entering Firm.

# **Revision History**

Revision	Comment
1.5.	• Removed all references to Affiliates, No Remuneration Indicator and "A" for Special Processing. Production rollout will be determined for a future point in time and will no longer coincide with ABS reporting of Primary/Secondary market
