EXTERNAL: Verify sender before opening attachments or links.

Ticker symbol AMC has been on the NYSE Threshold Securities list for FTD's in excess of 0.5% of the free float aka 2.5 million shares since June 25th. Today's price action indicates AMC will again remain on this list for the 12th day straight.

Tomorrow will be day 13 straight of over 2.5 million daily FTD's which I STRONGLY believe is a red flag pointing to illegal naked shorting.

Please let the proper regulatory bodies know about this so the hedge funds or market makers can be forced to find and purchase these over 32 million manufactured shares!!
