Please investigate the price movement of \$AMC the last month. It is being manipulated and shorted to oblivion. Isn't AMC Theaters(an American company) allowed to recover? How can this happen if the ppl that make the market and set the prices can just borrow unlimited shares to short and NEVER have to repay them. Further more why do the ppl borrowing the shares report the shares borrowed and only every 15 days for 15 days ago. Make short positions be reported daily and real numbers! In fact ANYONE with big short OR long positions should have to disclose them. EVERYONES positions should be public record ESPECIALLY if that someone has a MEDIA platform to promote or denounce said stock. ALL \$AMC shares should be accounted for which is not being done currently due to naked shorts and synthetic shares. Make the playing field even. Right now retail is mad cuz hedge funds are cheating and YOU won't intervene.
