Good day!

I have heard there is proposals going around to adjust the pattern day trader requirement. I wanted to message to request this be done right away without delay.

Since I started trading stocks in 2015 this one rule has made me lose thousand of dollars by forcing me to hold positions that turn around on me because of simple things like tariff legislation that I could not know about. There are so many ways I've lost money and continue to lose money because of this rule. It's is unfair and unjust.

It needs to be changed immediately and without delay. It's wrong to dictate how someone invest and making them hold positions that are taking a fiscal turn unrelated to the investor.

It's the worst and most unfair rule that has ever been. It seems to benefit the stock market by making people lose money continuously.

Thank you for your time.
