In regards to Regulatory Notice 25-04

We would like to note that, in our opinion, the Net Capital Requirement using FASB 606 improperly penalizes firms for invoicing clients. Issuing an invoice in advance of receiving payment creates a corresponding dollar-for-dollar negative impact on Net Capital.

FASB 606 became effective for private companies in 2019. Under this standard, revenue must be recognized when the entity satisfies the performance obligation. For our retainers, this means recognizing revenue on a straight-line basis over the life of the engagement.

Key Points:

- During the month an invoice is issued:
 - Accounts Receivable increases by the invoice amount.
 - Unearned Revenue is recorded at the full invoice amount.
 - Retained Earnings Impact is \$0.

• Net Capital Calculation:

- Accounts Receivable is considered a Non-Allowable Asset.
- Therefore, when an invoice is issued:
 - Retained Earnings does not increase.
 - Non-Allowable Assets increase.
 - This results in a temporary reduction in Net Capital.

Financial Impact:

• The company is financially better off before the invoice is issued and after the invoice is paid.

Net Capital - Impact of 606 Demonstration

When Colonnade issues an invoice and it is paid later in the month, but still in the same month, the adjustment for "Accounts Receivable" has a double negative impact on the compact on the compact on the compact in accounting standards.

This demonstrates that Colonnade is worse off by issuing an inovice prior to the date of payment

Assumptions

 Retainer
 \$100,000

 Term
 18 months

 Invoice Date
 2/5/24

 Payment Date
 2/10/24

	With the Impact of FASB 606					Before FASB 606 Passing and Applied in 2019
