To whom it may concern,

All we ask for is transparency and a free and open market.

Frequent monitoring and reporting of naked shorting. Start enforcing rules and convicting offenders. Fines aren't enough because they're paying said fines with money stolen from retailers. Live up to your sworn duty to protect and promote a market free of manipulation. Hold hedges like Citadel accountable by enforcing the rules in place and ensure they're covering their short positions. Many institutions have robbed hardworking retailers for decades due to greed with no real consequences. Please understand, this is a manifestation of your negligence as well. Simply put, please do yourself job.

Thank you
