---

I support any and all be rulemaking and regulation that creates greater transparency into the workings of hedge funds and corporations. I support more frequent short sale disclosures and position disclosure in general. I support increased enforcement on the ban of "virtual" stock shares being "created" through loopholes in unsecured options allowing for "losing" short sale positions to effectively "wash" these into new short positions.

I request that frequent FTDs on stocks that have particularly high short interest, or patterned short sale activities with low volumes indicating market manipulation be watched as a category of investment that is easy to abuse by large cap trading houses at the expense of retail traders.
