Yvonne and Racquel,

Hope you're well.

The request is simple: prison time and permanent ban from trading US securities for naked shorting, for employers and employees of market makers, hedge funds, and any individuals conspiring in the already illegal practice. Fines are simply the cost of doing business to those practicing naked shorting, even if the fines reach \$1B+.

This practice helped cause the '08 crash and will soon cause the '21 crash. I think the world would be grateful if we avoided that. You have the power to make that happen.

Thank you.
