Hello,

To keep this short and simple, I'll get to it right away.

- There isn't ANY transparency within the US financial market. This needs to be adjusted. Reports need to be frequent and transparent.
- Dark pools need to be GONE as they are often abused and taken advantage of by White Collar Criminals and Retail Trades should ***NOT*** be dark pooled ***EVER***.
- SSR needs to be enforced ***STRICTLY***.
- FTDs ***must*** be enforced without delay.
- FINRA & SEC needs to do their job.

Hedgefunds and Market Makers might be losing a lot of money based on bad bets right now. However, with the way things are in the US market right now, the US will be losing infinite amounts of money as investors keep losing faith in the market with each passing day.

I, alongside most people I know abroad, have withdrawn most of our money from the US market and will continue doing so if we see no change. And we're not the only ones.

BR,
TN
