I am sending in this comment cause i can't believe what I have been witnessing in the stock market as a retail investor I will try to keep this brief cause how upset i am and i want someone to help stop the manipulation I want a free and fair market I do recognize that a few rules were changed recently but that was not enough i have seen stock go down with high inflow which should make price rise but the opposite it is going down naked shorts ladder attacks if someone would just do something the world is watching while our markets are getting attacked buy greedy people when they get caught they get 10 grand fine it like a speeding ticket while someone like me is getting wiped out if i can see it i know you can please help stop it and even the playing field doing away with dark pools put all transactions on light exchanges put fraudsters in jail thanks,William Roberts for free and fair makets for all the above comments is about AMC ent Holdg and all others being grossly manipulated
