Subject: FINRA

Please be advised that as a tax paying US citizen, I am vehemently opposed to any expansion of FINRA into non-securities related insurance & investment products. We have more & more government intrusion into the private sector that is counter productive to the growth of the nation's economy.

We need proper regulation & implementation of regs already on the books, not more federal government regulation. We need a smaller federal government budget, not larger.

Thank you,

Hugh Taylor
