KEY TOPICS

- SOES Maximum Order Sizes

Executive Summary

Effective January 10, 2000, the maximum Small Order Execution SystemSM (SOESSM) order sizes for 534 Nasdaq National Market[®] (NNM) securities will be revised in accordance with National Association of Securities Dealers, Inc. (NASD[®]) Rule 4710(g).

In previous quarters, Nasdaq[®] has implemented the reclassification on the first trading day of the quarter; because Nasdaq Market Operations is planning to suspend the processing of data changes from December 27, 1999, through January 3, 2000—as part of the transition to the Year 2000 (Y2K)—Nasdaq is implementing the instant reclassification on January 10, 2000, instead of January 3, 2000.

For more information, please contact Nasdaq Market Operations at (203) 378-0284.

Description

Under Rule 4710, the maximum SOES order size for an NNM security is 1,000, 500, or 200 shares, depending on the trading characteristics of the security. The Nasdaq Workstation II[®] (NWII) indicates the maximum SOES order size for each NNM security. The indicator "NM10," "NM5," or "NM2" displayed in NWII corresponds to a maximum SOES order size of 1,000, 500, or 200 shares, respectively.

The criteria for establishing maximum SOES order sizes are as follows:

- (1) a 1,000-share maximum order size shall apply to NNM securities on SOES with an average daily non-block volume of 3,000 shares or more a day, a bid price of less than or equal to \$100, and three or more Market Makers;

(2) a 500-share maximum order size shall apply to NNM securities on SOES with an average daily non-block volume of 1,000 shares or more a day, a bid price of less than or equal to \$150, and two or more Market Makers; and

- (3) a 200-share maximum order size shall apply to NNM securities with an average daily non-block volume of less than 1,000 shares a day, a bid price of less than or equal to \$250, and two or more Market Makers.

In accordance with Rule 4710, Nasdaq periodically reviews the maximum SOES order size applicable to each NNM security to determine if the trading characteristics of the issue have changed so as to warrant an adjustment. Such a review was conducted using data as of October 31, 1999, pursuant to the aforementioned standards. The maximum SOES order-size changes called for by this review are being implemented with three exceptions.

- First, issues were not permitted to move more than one size level. For example, if an issue was previously categorized in the 1,000-share level, it would not be permitted to move to the 200-share level, even if the formula calculated that such a move was warranted. The issue could move only one level to the 500-share level as a result of any single review.
- Second, for securities priced below \$1 where the reranking called for a reduction in the level, the maximum SOES order size was not reduced.
- Third, for the top 50 Nasdaq securities based on market capitalization, the maximum SOES order sizes were not reduced, regardless of whether the reranking called for a reduction.

NASD Notice to Members 99-104

In addition, with respect to initial public offerings (IPOs), the SOES order-size reranking procedures provide that a security must first be traded on Nasdaq for at least 45 days before it is eligible to be reclassified.

Thus, IPOs listed on Nasdaq within the 45 days prior to October 31, 1999, were not subject to SOES order-size reranking procedures.

maximum SOES order size changed on January 10, 2000.
