June 2008 Supplement to the Options Disclosure Document

On June 26, 2008, the SEC approved a supplement to the Options Disclosure Document (www.optionsclearing.com/publications/risks/riskstoc_jun08_sup.pdf) (ODD). The ODD contains general disclosures on the characteristics and risks of trading standardized options. The recently approved supplement provides additional disclosures regarding certain binary options on stock and broad-based indexes, range options and delayed start options. As with other supplements to the ODD, this should be read in conjunction with the current ODD entitled *Characteristics and Risks of Standardized Options* (www.optionsclearing.com/publications/risks/riskstoc.pdf). This supplement supersedes and replaces the April 2008 supplement to the ODD, which relates to binary options and delayed start options, as described in *Information Notice* 05/15/08.

Rule 9b-1 under the Securities Exchange Act requires broker-dealers to deliver the ODD and supplements to customers.¹ FINRA has similar requirements in NASD Rule 2860(b)(11)(A)(1), which requires that member firms deliver the current ODD to each customer at or prior to the time the customer is approved to trade options. In addition, NASD Rule 2860(b)(11)(A)(1) requires member firms to distribute a copy of each ODD supplement to customers who previously received the ODD. ODD supplements must be delivered no later than the time a customer receives confirmation of a transaction in the category of options to which the amendment pertains. NASD Rule 2860(b)(11)(A)(3) requires that FINRA advise member firms when revisions to the ODD are made.
