The CRD Registration Deficiency Tracking Program in CRD monitors individuals that have applied to become a registered representative or investment adviser representative and have a Deficient registration status. A Deficient status represents an agent that is not approved to conduct securities business, and many deficiencies must be resolved within a specific timeframe. This guide provides information on how firms can monitor this process.

**IMPORTANT NOTE:**

All classic CRD features should now be accessed through FINRA Gateway, the new FINRA reporting and compliance platform. This new system is designed to focus on compliance functions, such as research, reporting and responding to requests, rather than focusing on the specific system you would access to fulfill your requirements.

If you have any questions or feedback regarding the transition to FINRA Gateway, please contact FeedbackFINRAGateway@finra.org.

Purged Registration Status

When a deficient registration request exceeds the time limit, the system will change the registration status to Purged. (See the following page for guidance on viewing Purged individual registrations.)

When the individual’s last registration request purges, the system will NOT immediately close the firm association. A firm will have up to 120 days to file a Form U4 Amendment to re-request the registration of an individual with a Purged registration status. The firm will be assessed appropriate fees for the registration(s) selected on the Form U4 Amendment.

- If, after 120 days, no Form U4 Amendment has been filed for the individual and the individual only has registration statuses of Purged, the firm association will be closed. The registration will change from a Purged status to a registration status of Termed Without Registration (T_NOREG).

- If the firm then wishes to reinstate the individual, a new Form U4 filing must be submitted for the individual.

Individuals that have a Purged registration status and at least one Approved registration status will not have a firm association closed, unless the firm submits a Form U5 for the individual.

- In instances such as this, the firm may re-request previously Purged registration by submitting a Form U4 Amendment filing.

- Applicable registration fees will be assessed for registrations that are re-requested.

NOTE: Not all Deficient registration statuses will automatically be assigned a Purged status. The following deficiencies will NOT automatically be changed to a registration status of Purged.

- FINRA Deficiencies
- Disclosure Review Deficiencies
- Foreign Deficiencies
- Pending Firm Approval and Firm Suspended Deficiencies
