Form 19b-4 Information *

Add Remove View

The self-regulatory organization must provide all required information, presented in a clear and comprehensible manner, to enable the public to provide meaningful comment on the proposal and for the Commission to determine whether the proposal is consistent with the Act and applicable rules and regulations under the Act.

Exhibit 1 - Notice of Proposed Rule Change *

Add Remove View

The Notice section of this Form 19b-4 must comply with the guidelines for publication in the Federal Register as well as any requirements for electronic filing as published by the Commission (if applicable). The Office of the Federal Register (OFR) offers guidance on Federal Register publication requirements in the Federal Register Document Drafting Handbook, October 1998 Revision. For example, all references to the federal securities laws must include the corresponding cite to the United States Code in a footnote. All references to SEC rules must include the corresponding cite to the Code of Federal Regulations in a footnote. All references to Securities Exchange Act Releases must include the release number, release date, Federal Register cite, Federal Register date, and corresponding file number (e.g., SR-[SRO]-xx-xx). A material failure to comply with these guidelines will result in the proposed rule change being deemed not properly filed. See also Rule 0-3 under the Act (17 CFR 240.0-3)

Exhibit 1A- Notice of Proposed Rule Change, Security-Based Swap Submission, or Advance Notice by Clearing Agencies *

The Notice section of this Form 19b-4 must comply with the guidelines for publication in the Federal Register as well as any requirements for electronic filing as published by the Commission (if applicable). The Office of the Federal Register (OFR) offers guidance on Federal Register publication requirements in the Federal Register Document Drafting Handbook, October 1998 Revision. For example, all references to the federal securities laws must include the corresponding cite to the United States Code in a footnote. All references to SEC rules must include the corresponding cite to the Code of Federal Regulations in a footnote. All references to Securities Exchange Act Releases must include the release number, release date, Federal Register cite, Federal Register date, and corresponding file number (e.g., SR-[SRO]-xx-xx). A material failure to comply with these guidelines will result in the proposed rule change, security-based swap submission, or advance notice being deemed not properly filed. See also Rule 0-3 under the Act (17 CFR 240.0-3)

Exhibit 2 - Notices, Written Comments, Transcripts, Other Communications

Add Remove View

Exhibit Sent As Paper Document

☐

Copies of notices, written comments, transcripts, other communications. If such documents cannot be filed electronically in accordance with Instruction F, they shall be filed in accordance with Instruction G.

Exhibit 3 - Form, Report, or Questionnaire

Add Remove View

Exhibit Sent As Paper Document

☐

Copies of any form, report, or questionnaire that the self-regulatory organization proposes to use to help implement or operate the proposed rule change, or that is referred to by the proposed rule change.

Exhibit 4 - Marked Copies

Add Remove View

The full text shall be marked, in any convenient manner, to indicate additions to and deletions from the immediately preceding filing. The purpose of Exhibit 4 is to permit the staff to identify immediately the changes made from the text of the rule with which it has been working.

Exhibit 5 - Proposed Rule Text

Add Remove View

The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change.

Partial Amendment

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act” or “SEA”),¹ Financial Industry Regulatory Authority, Inc. (“FINRA”) is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposed rule change to amend FINRA Rules 7410 and 7440 to require FINRA members to identify on their Order Audit Trail System (“OATS”) reports the identity of certain broker-dealers that are not FINRA members when the member has received an order from such a broker-dealer.

Below is the text of the proposed rule change. Proposed new language is underlined; proposed deletions are in brackets.

7410. Definitions

(a) through (o) No Change.

(p) “SRO-assigned identifier” shall mean a unique identifier assigned to a broker or dealer by a national securities exchange or national securities association for use by such broker or dealer when accessing the exchange or a facility of the association.

* * * * *

¹ 15 U.S.C. 78s(b)(1).

7440. Recording of Order Information

(a) No Change.

(b) Order Origination and Receipt

Unless otherwise indicated, the following order information must be recorded under this Rule when an order is received or originated. For purposes of this Rule, the order origination or receipt time is the time the order is received from the customer.

(1) through (17) No Change.

(18) the type of account, i.e., retail, wholesale, employee, proprietary, or any other type of account designated by FINRA, for which the order is submitted; [and]

(19) when the Reporting Member receives an order from a U.S.-registered broker-dealer that is not a member, or from a non-U.S.-registered broker-dealer that is not a member but has received an SRO-assigned identifier for purposes of accessing a FINRA facility pursuant to Rule 7220A or 7320, identification of such broker-dealer by providing an SRO-assigned identifier assigned to the broker-dealer or the number assigned to the broker-dealer in the Central Registration Depository system; and

(20) if the member is relying on the exception provided in Rule 5320.02 with respect to the order, the unique identification of any appropriate information barriers in place at the department within the member where the order was received or originated.

(c) through (d) No Change.

* * * * *

(b) Not applicable.

(c) Not applicable.

2. Procedures of the Self-Regulatory Organization

At its meeting on September 19, 2014, the FINRA Board of Governors authorized the filing of the proposed rule change with the SEC. No other action by FINRA is necessary for the filing of the proposed rule change.

If the Commission approves the proposed rule change, FINRA will announce the effective date of the proposed rule change no later than 60 days following Commission approval. The effective date will be no later than 120 days following Commission approval.

3. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

FINRA is proposing an amendment to Rule 7440 of the OATS rules to require FINRA members subject to the OATS rules ("Reporting Members") to specifically identify two types of non-FINRA-member broker-dealers ("Non-Member Firms") as part of the OATS report when they receive orders from these firms.² Under the proposed rule change, Reporting Members receiving an order from either a U.S.-registered broker-dealer that is not a FINRA member or a broker-dealer that is not registered in the U.S. but has received an SRO-assigned identifier³ in order to access certain FINRA trade reporting

² FINRA Rule 7410(o) defines a Reporting Member as "a member that receives or originates an order and has an obligation to report information under Rules 7440 and 7450." The rule also contains exceptions from the rule. See FINRA Rule 7410(o)(1) and (2).

³ FINRA is proposing to define an "SRO-assigned identifier" in Rule 7410 as "a unique identifier assigned to a broker or dealer by a national securities exchange

facilities (each a “Reportable Non-Member”) must identify the broker-dealer when reporting receipt of the order to OATS.⁴ Pursuant to the proposed rule change, and as described below, Reporting Members receiving an order from or routing an order to a Non-Member Firm would therefore report one of the following: the Non-Member Firm’s Central Registration Depository (“CRD[®]”) number; an SRO-assigned identifier assigned to the Non-Member Firm; or, for a Non-Member Firm that does not have a CRD number or SRO-assigned identifier (e.g., a foreign broker-dealer), a value indicating that the Non-Member Firm has no CRD number or SRO-assigned identifier. Reporting this information will allow FINRA to obtain the identity of Reportable Non-Members directly from the OATS report.

A Reporting Member receiving an order from a Reportable Non-Member would include on its OATS report either the SRO-assigned identifier (e.g., a market participant identifier (“MPID”) assigned by a national securities exchange) or the Reportable Non-Member’s CRD number.⁵ The proposed rule change does not mandate which identifier Reporting Members must use; thus, Reporting Members may use either an existing SRO-assigned identifier or a CRD number on their OATS reports to identify the Reportable

or national securities association for use by such broker or dealer when accessing the exchange or a facility of the association.” For purposes of the definition, the identifier is “unique” provided the identifier assigned by the exchange or association is used to identify only a single broker-dealer.

⁴ Certain broker-dealers registered in Canada, but not in the U.S., have SRO-assigned identifiers so that they can access FINRA trade reporting facilities pursuant to FINRA Rule 7220A or 7320.

⁵ To register as a broker-dealer and have a CRD number, firms are required to file a Form BD with CRD. See 17 CFR 240.15b1-1(b). Consequently, all U.S.-registered broker-dealers have a CRD number. Currently, all U.S.-registered broker-dealers also have at least one SRO-assigned identifier that is available to FINRA.

Non-Member. If a Reportable Non-Member does not have an SRO-assigned identifier that is available to FINRA, the Reporting Member receiving the order would be required to report the CRD number of the Reportable Non-Member.⁶ Similarly, for a non-U.S.-registered broker-dealer that has an SRO-assigned identifier in order to access a FINRA trade reporting facility pursuant to Rule 7220A or 7320 but does not have a CRD number, the Reporting Member receiving the order would be required to report the SRO-assigned identifier for the broker-dealer.

FINRA is filing the proposed rule change to enhance its market surveillance efforts, both under its own SRO license and pursuant to its Regulatory Service Agreements (“RSAs”) with multiple national securities exchanges, by being able to identify more Non-Member Firm trading activity across exchanges and in the over-the-counter market through trades that are reported to a FINRA trade reporting facility.⁷ Through OATS, FINRA is currently able to identify in detail the order and trading activity of FINRA member broker-dealers across market centers. Using data provided by the exchanges as well as CRD numbers, FINRA is also able to identify in detail the trading activities of Non-Member Firms and aggregate these firms’ activities across RSA

⁶ Because non-U.S. broker-dealers generally do not have SRO-assigned identifiers or CRD numbers, the proposed rule change would not require specific identification of non-U.S. broker-dealers when those firms do not have SRO-assigned identifiers or CRD numbers. In these cases, FINRA intends to permit a value whereby the Reporting Member would indicate the order was received from a non-U.S. broker-dealer without a CRD number or SRO-assigned identifier.

⁷ FINRA obtains exchange data pursuant to RSAs it has signed with certain client exchanges. Under the current RSAs with national securities exchanges, FINRA conducts comprehensive surveillance across more than 99% of the market for U.S. listed equities by share and trade volume.

client exchanges.⁸ Although Reporting Members report orders they receive from, or route to, Non-Member Firms, these reports do not always contain the identity of the Non-Member Firm from whom the order was received, or to whom it was routed.⁹ FINRA cannot, therefore, currently identify in detail Non-Member Firm activity in the over-the-counter market, or Non-Member Firm sponsored access activity, since Reporting Members are not required to report to OATS the identity of Non-Member Firms. Consequently, FINRA is not able to consistently identify Non-Member Firm activity and does not have a complete view of such activities across all exchanges and over-the-counter market centers. As the Commission recently noted when it proposed amendments to SEA Rule 15b9-1,¹⁰ “FINRA’s ability to perform comprehensive market surveillance, especially for violations of Commission rules, as well as its ability to understand and reconstruct activity in the off-exchange market generally, is limited

⁸ This is accomplished by using exchange-assigned identifiers that are mapped to the firm’s CRD number. FINRA has access to all SRO-assigned equity identifiers with the exception of those assigned by the Chicago Stock Exchange. Under the proposed rule change, FINRA would thus be able to use any of these SRO-assigned identifiers or a CRD number to obtain the identity of the Non-Member Firm on OATS reports. A FINRA member that provides sponsored access to a Non-Member Firm has an OATS reporting obligation for each order sent to a national securities exchange pursuant to any such agreement. In this scenario, the FINRA member must report a New Order and a Route Report to the applicable exchange reflecting that the order was received from a Non-Member Firm. See OATS FAQ C77.

⁹ Although some Reporting Members voluntarily provide the MPID of a Non-Member Firm if one exists, the OATS rules do not require that the identity of the Non-Member Firm be reported.

¹⁰ 17 CFR 240.15b9-1.

because [Non-Member Firms] are not consistently identified in trade reports to the TRFs or the ADF, and their order activity is not captured by OATS.”¹¹

In addition to amending Rule 7440 to require the identification of Reportable Non-Members from which an order is received, FINRA is also planning to update the OATS Reporting Technical Specifications to require that OATS reports specifically identify a Reportable Non-Member to which an order is routed. Rule 7440(c)(6)(I) requires that, for orders routed from a member to a non-FINRA-member, including both non-FINRA-member broker-dealers and national securities exchanges, the identity of the non-FINRA member to which the order was routed be reported. Although the OATS Reporting Technical Specifications currently require that OATS reports include a specific identifier for each national securities exchange to which an order is routed, only a generic identifier for Non-Member Firms is required.¹² Consequently, the identity of the specific Non-Member Firm to which an order is routed is not required under the current OATS Reporting Technical Specifications. To address this gap and to conform the reporting of orders received from and orders routed to Non-Member Firms, in addition to the proposed rule change, FINRA intends to update the OATS Reporting Technical Specifications to require that Reporting Members provide either an SRO-assigned identifier or CRD number when routing an order to a Reportable Non-Member.¹³

¹¹ See Securities Exchange Act Release No. 74581 (March 25, 2015), 80 FR 18036, 18043 (April 2, 2015).

¹² See OATS Reporting Technical Specifications, at 4-4, and A-4 to A-5 (October 12, 2015 ed.).

¹³ As noted above, in the case of a non-U.S. broker-dealer that does not have a CRD number or an SRO-assigned identifier, FINRA will provide an indicator for “non-U.S. broker-dealer” for use in the destination code field (for routes to a non-

The proposed rule change, along with the changes to the OATS Reporting Technical Specifications, will significantly improve FINRA's ability to support cross-market surveillance and monitor over-the-counter trading activity. Reporting Members receive a substantial amount of order flow from Non-Member Firms, particularly in connection with alternative trading system ("ATS") activity, and this proposed rule change will enable FINRA to identify the activities of Reportable Non-Members, thereby increasing its cross-market surveillance capabilities.¹⁴

FINRA notes that although the data required by the proposed rule change may ultimately be captured as part of the Consolidated Audit Trail ("CAT"), the implementation of the CAT is likely several years away, as the national market system plan filed by the SROs still must be published by the Commission for public notice and comment, approved by the SEC, and, if approved, ultimately implemented pursuant to a multi-year timeline.¹⁵ FINRA strongly believes that gaps in OATS data must be addressed in the near-term, after weighing the burdens to firms and the necessity of the

member broker-dealer) and as a member type code (for orders received from a non-member broker-dealer).

¹⁴ For example, in the fourth quarter of 2014, over 33% of orders reported to OATS were reported as being received from a Non-Member Firm. Of particular note, over 45% of ATS orders were received from a Non-Member Firm. In addition, during that quarter approximately 13% of sponsored access orders were received from a Non-Member Firm.

¹⁵ SEC Rule 613, which sets forth the requirements for the CAT, does not require all broker-dealers to report order information to the CAT until three years after the CAT plan is approved. See 17 CFR 242.613(a)(vi). The SROs charged with submitting the CAT plan filed an initial plan with the Commission on September 30, 2014, an amended and restated plan on February 27, 2015, and further amendments on December 23, 2015; however, the Commission has not yet published the CAT plan in the Federal Register for public comment. Pursuant to the plan submitted by the SROs, once the CAT is fully implemented, FINRA intends to sunset the OATS rules.

change, to ensure an effective audit trail. FINRA believes the specific identification of Reportable Non-Members is critical to enhance FINRA's cross-market surveillance and monitoring of the over-the-counter market and believes these changes to the OATS requirements should not be delayed due to the potential future implementation of the CAT.¹⁶

In addition to the CAT, the proposed rule change could also be affected by any amendments to SEA Rule 15b9-1.¹⁷ Section 15(b)(8) of the Act requires that a registered broker-dealer be a member of a national securities association unless the broker-dealer effects transactions in securities solely on a national securities exchange of which it is a member.¹⁸ SEA Rule 15b9-1 provides an exemption to the membership requirement in Section 15(b)(8) if a broker-dealer (i) is a member of a national securities exchange, (ii) carries no customer accounts, and (iii) has annual gross income derived from purchases and sales of securities otherwise than on a national securities exchange of which it is a member in an amount no greater than \$1,000.¹⁹

¹⁶ FINRA notes that, under SEC Rule 613, all U.S.-registered broker-dealers are subject to the CAT reporting requirements. See 17 CFR 242.613(c)(2). Consequently, if the CAT plan submitted by the SROs is approved, firms will need to specifically identify each broker-dealer from which an order is received or to which an order is routed.

¹⁷ 17 CFR 240.15b9-1.

¹⁸ 15 U.S.C. 78o(b)(8). FINRA is currently the only registered national securities association.

¹⁹ 17 CFR 240.15b9-1. The \$1,000 gross income limitation does not apply to income derived from transactions for the dealer's own account with or through another registered broker or dealer. Thus, for example, income derived from over-the-counter trades through an alternative trading system does not count toward the \$1,000 threshold.

On March 25, 2015, the SEC proposed amendments to SEA Rule 15b9-1 that would significantly narrow the exemption from association membership by replacing the \$1,000 gross income provision in the rule with a provision that exempts from association membership exchange member broker-dealers that operate on the floor of an exchange to the extent they effect transactions off-exchange solely for the purpose of hedging the risks of their floor-based activities.²⁰ If adopted, the amendments generally would require a proprietary trading firm (i.e., a firm that carries no customer accounts and, instead, trades solely for its own account(s)) relying on the current exemption to become a FINRA member if the firm continues to engage in over-the-counter trading or trading on an exchange of which it is not a member.

If this, or a substantially similar, amendment to SEA Rule 15b9-1 were adopted by the SEC, it is likely that many firms that are not currently FINRA members would become FINRA members and, as a result, would be identified on OATS reports in addition to submitting OATS reports themselves. Even if amendments to SEA Rule 15b9-1 are adopted, there would likely still be some firms that do not become FINRA members, and the timeline for compliance with any potential amendments to SEA Rule 15b9-1, could be substantial. Consequently, FINRA believes that the proposed rule change is necessary regardless of the pending proposed amendments to SEA Rule 15b9-1 and would remain necessary even if amendments are subsequently adopted by the SEC.

Although this proposed rule change will require Reporting Members to submit an additional data field when submitting an OATS report for an order received from a Reportable Non-Member, FINRA does not believe that the proposed rule change will

²⁰ See Securities Exchange Act Release No. 74581 (March 25, 2015), 80 FR 18036, 18045-46 (April 2, 2015).

have a significant operational impact on Reporting Members or their reporting practices.²¹ Because identifiers already have been assigned to Reportable Non-Members, are generally readily ascertainable by Reporting Members, and OATS will accept submission of any of these identifiers already in use, FINRA anticipates that the expense associated with reporting this additional data will be minimal. FINRA also notes that some Reporting Members already provide identifiers on their OATS reports for orders received from Non-Member Firms.²² Finally, if a Reportable Non-Member is a member of multiple SROs or has multiple SRO-assigned identifiers, the Reporting Member could use any of those identifiers to fulfill its reporting obligation in addition to a CRD number. As noted below, FINRA also intends to provide a list of Reportable Non-Members' CRD numbers for Reporting Members to use to aid in implementing the proposed rule change.

As noted in Item 2 of this filing, if the Commission approves the proposed rule change, FINRA will announce the effective date of the proposed rule no later than 60 days following Commission approval. The effective date will be no later than 120 days following Commission approval.

²¹ FINRA also does not anticipate that the change to the OATS Reporting Technical Specifications to require that Reporting Members report a unique identifier when routing an order to a Non-Member Firm will significantly impact Reporting Members' reporting practices, as only a relatively small amount of order flow is typically routed from members to Non-Member Firms. In the fourth quarter of 2014, only 1.16% of all routes reported to OATS were reported as being routed to a Non-Member Firm.

²² In the fourth quarter of 2014, ATSS reported the SRO-assigned identifiers of seventeen Non-Member Firms that submitted approximately 12.45 billion orders to those ATSS.

(b) Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,²³ which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes that the proposed rule change will enable FINRA to better identify a Reportable Non-Member's trading activity across exchanges and in the over-the-counter market through trades that are reported to a FINRA facility, which will significantly enhance FINRA's cross-market surveillance efforts pursuant to its RSAs with multiple national securities exchanges and carry out its surveillance obligations for the over-the-counter market under its own SRO license. As noted above, FINRA members receive a substantial amount of order flow from Non-Member Firms, particularly in connection with ATS and sponsored access activity, and the proposed rule change will enable FINRA to identify the activities of Reportable Non-Members, thereby increasing its cross-market surveillance capabilities. Improved surveillance capabilities help detect and deter fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest.

4. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

²³ 15 U.S.C. 78o-3(b)(6).

Economic Impact Assessment

A. Regulatory Need

As discussed above, under the current rules, Reporting Members report orders they receive from, or route to, Non-Member Firms but these reports do not always contain the identity of the Non-Member Firm. As a result, FINRA cannot consistently identify Non-Member Firm activity and cannot see a complete view of such activities across all exchanges and over-the-counter market centers. The proposed rule change will address these current gaps in order reporting by requiring Reporting Members to identify Reportable Non-Members in their OATS reports. Reporting this information will allow FINRA to obtain the identity of the Reportable Non-Member directly from the OATS data, thereby improving FINRA's ability to perform comprehensive market surveillance and increasing investor protection.

B. Economic Impacts

The proposed rule change would impact Reporting Members that report orders received from, or routed to, Reportable Non-Members. As a baseline, FINRA estimates that, in the fourth quarter of 2014, approximately 175 Reporting Members received orders from Non-Member Firms and approximately 215 Reporting Members routed orders to Non-Member Firms. As discussed above, FINRA estimates that over 33% of the total OATS orders in the fourth quarter of 2014 were reported as being received from a Non-Member Firm. Non-Member Firm orders accounted for a higher proportion (over 45%) of ATS orders. In addition, during that quarter approximately 13% of sponsored access orders were received from a Non-Member Firm. Reporting Members currently report orders received from or routed to Non-Member Firms but are not required to

specifically identify these firms in their OATS reports. The proposed rule change would require the Reporting Members to identify Reportable Non-Members and submit an SRO-assigned identifier or the CRD number of these firms.

(i) Anticipated Benefits

The proposed rule change would enhance FINRA's cross-market and over-the-counter surveillance efforts by allowing FINRA to identify more Non-Member Firm trading activity across exchanges and the over-the-counter market. As discussed above, FINRA members receive a substantial amount of order flow from Non-Member Firms, particularly in connection with ATS activity. The proposed rule change will enable FINRA to identify these activities from Reportable Non-Members, thereby significantly improving FINRA's ability to support cross-market surveillance and monitor over-the-counter trading activity.

(ii) Anticipated Costs

As a result of the proposed rule change, Reporting Members that are not already identifying Reportable Non-Members in their OATS reports will incur certain implementation costs and on-going compliance costs associated with identifying Reportable Non-Members and submitting identifiers on their OATS reports.

FINRA anticipates that the costs associated with identifying Reportable Non-Members will likely be minimal because identifiers have already been assigned to Reportable Non-Members and these identifiers are generally readily available to the Reporting Member that is receiving orders from or routing orders to Reportable Non-Members. In addition, the proposed rule change would provide Reporting Members with the option to report either the CRD number or the SRO assigned identifier, thereby

allowing them to submit the identifiers that are already in use.²⁴ Moreover, FINRA intends to provide a list of CRD numbers to assist further in implementing the new requirements for those firms that are not already identifying Reportable Non-Members on their OATS reports, thereby further reducing the burden to ascertain appropriate identifiers for Reportable Non-Members.

FINRA recognizes that some Reporting Members may need to update their reporting systems and would incur certain costs associated with system analysis, coding, and testing in order to submit the required identifiers on their OATS reports. However, based on the provision of the list of identifiers by FINRA, the current volume of OATS Reports already submitted with Non-Member Firm information, and the Staff's experience with previous changes to the OATS requirements requiring similar modification to OATS reporting (i.e., modifications requiring new values for existing fields), FINRA believes that significant coding and development would not be required and that the costs referenced above would likely be minimal. Based on OATS data for the fourth quarter of 2014, FINRA estimates that approximately 23% of Reporting Members that receive orders from Non-Member Firms already identify these firms on their OATS reports and approximately 12% of Reporting Members that route orders to Non-Member Firms identify these firms on their OATS reports.²⁵

²⁴ Reporting Members would, therefore, have flexibility in determining which identifiers to submit, which is intended to reduce costs for these firms by allowing them to choose the most cost effective option.

²⁵ FINRA notes that a number of these Reporting Members identify Non-Member Firms on some, but not all, orders whereas others do so on all orders. For example, in the fourth quarter of 2014, of the 39 Reporting Members that receive orders from Non-Member Firms and identify them on their OATS report, 28 identify Non-Member Firms on some and 11 identify them on all orders.

C. Alternatives

In considering the best way to meet its regulatory objectives, FINRA considered certain alternatives to particular features of this proposal, including alternative identifiers that could be used to identify Reportable Non-Members. For example, one FINRA committee member suggested that FINRA consider leveraging use of a Legal Entity Identifier (“LEI”) for identifying Reportable Non-Members. FINRA does not believe that use of a LEI would be feasible at this time considering that the LEI is not universally in use. As a result, FINRA did not propose the use of LEI in the OATS reports for identifying Reportable Non-Members.

5. **Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others**

The proposed rule change, in addition to another proposal involving ATS order reporting, was published for comment in Regulatory Notice 14-51 (November 2014).²⁶ Five comments were received in response to the Regulatory Notice;²⁷ however, only four of the comment letters addressed the proposed rule change.²⁸ A copy of Regulatory

²⁶ The ATS order reporting proposal described in Regulatory Notice 14-51 is not reflected in the current proposed rule change; consequently, comments on that proposal are not addressed.

²⁷ See Letter from Manisha Kimmel, Managing Director, Financial Information Forum, to Marcia E. Asquith, Secretary, FINRA, dated February 20, 2015 (“FIF”); Letter from John A. McCarthy, General Counsel, KCG Holdings, Inc., to Marcia E. Asquith, Secretary, FINRA, dated February 20, 2015 (“KCG”); Letter from Howard Meyerson, General Counsel, Liquidnet Inc., to Marcia E. Asquith, Secretary, FINRA, dated February 20, 2015 (“Liquidnet”); Letter from Theodore R. Lazo, Managing Director and Associate General Counsel, Securities Industry and Financial Markets Association, to Marcia E. Asquith, Secretary, FINRA, dated February 24, 2015 (“SIFMA”); and Letter from Mark Holder, Managing Director, UBS Securities LLC, to Marcia E. Asquith, Secretary, FINRA, dated February 26, 2015 (“UBS”).

Notice 14-51 is attached as Exhibit 2a. A list of comment letters received in response to Regulatory Notice 14-51 is attached as Exhibit 2b, and copies of the four comment letters that addressed the proposed rule change are attached as Exhibit 2c. Of the four comment letters received that addressed the proposed rule change, KCG and SIFMA were in favor of the proposed rule change, Liquidnet did not support or oppose the proposed rule change but asked for interpretive guidance on the application of the proposed rule change to non-U.S. broker-dealers, and FIF was generally opposed.

Liquidnet and SIFMA requested that FINRA provide guidance on the application of the proposed rule change to non-U.S. broker-dealers that do not have either SRO-assigned identifiers or CRD numbers.

As noted above, FINRA has amended the proposed rule language from that in Regulatory Notice 14-51 to clarify that the specific identification of Non-Member Firms applies only to U.S.-registered broker-dealers that have SRO-assigned identifiers or CRD numbers as well as Canadian broker-dealers who have been assigned SRO identifiers for purposes of accessing a FINRA trade reporting facility pursuant to Rule 7220A or 7320. FINRA will provide an indicator for “non-U.S. broker-dealer” for use in the destination code field (for routes to a non-member broker-dealer) and as a member type code (for orders received from a non-member broker-dealer) so that Reporting Members can reflect routes to or from a non-U.S. broker-dealer that does not have a CRD number or an SRO-assigned identifier.

FIF noted that using SRO-assigned identifiers would be preferable to using CRD numbers and suggested that FINRA provide a list of allowable identifiers. KCG

²⁸ UBS addressed only the ATS order reporting proposal in the Regulatory Notice and did not address the proposed rule change.

requested that FINRA develop a list of identifiers that OATS reporting firms could rely upon to identify non-member broker-dealers and suggested that only those identifiers appearing on the list be required to be reported when dealing with non-member broker-dealers.

In response to these comments, FINRA intends to develop and publish on its website a list of acceptable CRD numbers for Reporting Members to use to meet their OATS reporting obligations. FINRA does not, however, intend that only those identifiers appearing on the list would be acceptable values. For example, Canadian broker-dealers that have been issued MPIDs to access FINRA trade reporting facilities pursuant to Rule 7220A or Rule 7320 do not have CRD numbers; thus, Reporting Members receiving orders from or routing orders to such firms would be required to use the Canadian firm's MPID on their OATS reports. Finally, FIF noted that the issue of identifying Non-Member Firms will be addressed upon the implementation of the CAT and suggested that FINRA not take interim measures to improve OATS but "work diligently with the other SROs towards driving CAT forward."

FINRA does not view these undertakings as mutually exclusive. While FINRA is working diligently with other SROs to develop and implement the CAT, FINRA also believes that reasonable changes to OATS should still be made to ensure existing audit trails can be enhanced. As noted above, the full implementation of the CAT is likely still years away. FINRA strongly believes that gaps in OATS data must be addressed in the near-term, after weighing the burdens to firms and the necessity of the change, to ensure an effective audit trail. As set forth above, FINRA has concluded that the identification of Reportable Non-Members is important to enhance FINRA's cross-market surveillance

and believes these modest changes to the OATS requirements should not be delayed due to the potential future implementation of the CAT. Although this proposed rule change will require some Reporting Members to submit more specific data when submitting an OATS report for an order received from a Reportable Non-Member, FINRA does not believe that this change will have a significant operational impact on Reporting Members or their reporting practices because identifiers already have been assigned to the Reportable Non-Members, are generally readily ascertainable by the Reporting Member that is receiving orders from or routing orders to the Reportable Non-Member, and OATS will accept submission of any of these identifiers already in use. As noted above, FINRA intends to provide a list of CRD numbers to assist further in implementing the new requirements for those Reporting Members that are not already identifying Reportable Non-Members on their OATS reports.

6. Extension of Time Period for Commission Action

FINRA does not consent at this time to an extension of the time period for Commission action specified in Section 19(b)(2) of the Act.²⁹

SECURITIES AND EXCHANGE COMMISSION
(Release No. 34- ; File No. SR-FINRA-2016-006)

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of a Proposed Rule Change to Amend FINRA Rules 7410 (Definitions) and 7440 (Recording of Order Information)

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² notice is hereby given that on , Financial Industry Regulatory Authority, Inc. (“FINRA”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rules 7410 and 7440 to require FINRA members to identify on their Order Audit Trail System (“OATS”) reports the identity of certain broker-dealers that are not FINRA members when the member has received an order from such a broker-dealer.

Below is the text of the proposed rule change. Proposed new language is in italics; proposed deletions are in brackets.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA is proposing an amendment to Rule 7440 of the OATS rules to require FINRA members subject to the OATS rules ("Reporting Members") to specifically identify two types of non-FINRA-member broker-dealers ("Non-Member Firms") as part

of the OATS report when they receive orders from these firms.³ Under the proposed rule change, Reporting Members receiving an order from either a U.S.-registered broker-dealer that is not a FINRA member or a broker-dealer that is not registered in the U.S. but has received an SRO-assigned identifier⁴ in order to access certain FINRA trade reporting facilities (each a “Reportable Non-Member”) must identify the broker-dealer when reporting receipt of the order to OATS.⁵ Pursuant to the proposed rule change, and as described below, Reporting Members receiving an order from or routing an order to a Non-Member Firm would therefore report one of the following: the Non-Member Firm’s Central Registration Depository (“CRD[®]”) number; an SRO-assigned identifier assigned to the Non-Member Firm; or, for a Non-Member Firm that does not have a CRD number or SRO-assigned identifier (e.g., a foreign broker-dealer), a value indicating that the Non-Member Firm has no CRD number or SRO-assigned identifier. Reporting this information will allow FINRA to obtain the identity of Reportable Non-Members directly from the OATS report.

³ FINRA Rule 7410(o) defines a Reporting Member as “a member that receives or originates an order and has an obligation to report information under Rules 7440 and 7450.” The rule also contains exceptions from the rule. See FINRA Rule 7410(o)(1) and (2).

⁴ FINRA is proposing to define an “SRO-assigned identifier” in Rule 7410 as “a unique identifier assigned to a broker or dealer by a national securities exchange or national securities association for use by such broker or dealer when accessing the exchange or a facility of the association.” For purposes of the definition, the identifier is “unique” provided the identifier assigned by the exchange or association is used to identify only a single broker-dealer.

⁵ Certain broker-dealers registered in Canada, but not in the U.S., have SRO-assigned identifiers so that they can access FINRA trade reporting facilities pursuant to FINRA Rule 7220A or 7320.

A Reporting Member receiving an order from a Reportable Non-Member would include on its OATS report either the SRO-assigned identifier (e.g., a market participant identifier (“MPID”) assigned by a national securities exchange) or the Reportable Non-Member’s CRD number.⁶ The proposed rule change does not mandate which identifier Reporting Members must use; thus, Reporting Members may use either an existing SRO-assigned identifier or a CRD number on their OATS reports to identify the Reportable Non-Member. If a Reportable Non-Member does not have an SRO-assigned identifier that is available to FINRA, the Reporting Member receiving the order would be required to report the CRD number of the Reportable Non-Member.⁷ Similarly, for a non-U.S.-registered broker-dealer that has an SRO-assigned identifier in order to access a FINRA trade reporting facility pursuant to Rule 7220A or 7320 but does not have a CRD number, the Reporting Member receiving the order would be required to report the SRO-assigned identifier for the broker-dealer.

FINRA is filing the proposed rule change to enhance its market surveillance efforts, both under its own SRO license and pursuant to its Regulatory Service Agreements (“RSAs”) with multiple national securities exchanges, by being able to identify more Non-Member Firm trading activity across exchanges and in the over-the-

⁶ To register as a broker-dealer and have a CRD number, firms are required to file a Form BD with CRD. See 17 CFR 240.15b1-1(b). Consequently, all U.S.-registered broker-dealers have a CRD number. Currently, all U.S.-registered broker-dealers also have at least one SRO-assigned identifier that is available to FINRA.

⁷ Because non-U.S. broker-dealers generally do not have SRO-assigned identifiers or CRD numbers, the proposed rule change would not require specific identification of non-U.S. broker-dealers when those firms do not have SRO-assigned identifiers or CRD numbers. In these cases, FINRA intends to permit a value whereby the Reporting Member would indicate the order was received from a non-U.S. broker-dealer without a CRD number or SRO-assigned identifier.

counter market through trades that are reported to a FINRA trade reporting facility.⁸

Through OATS, FINRA is currently able to identify in detail the order and trading activity of FINRA member broker-dealers across market centers. Using data provided by the exchanges as well as CRD numbers, FINRA is also able to identify in detail the trading activities of Non-Member Firms and aggregate these firms' activities across RSA client exchanges.⁹ Although Reporting Members report orders they receive from, or route to, Non-Member Firms, these reports do not always contain the identity of the Non-Member Firm from whom the order was received, or to whom it was routed.¹⁰ FINRA cannot, therefore, currently identify in detail Non-Member Firm activity in the over-the-counter market, or Non-Member Firm sponsored access activity, since Reporting Members are not required to report to OATS the identity of Non-Member Firms. Consequently, FINRA is not able to consistently identify Non-Member Firm activity and does not have a complete view of such activities across all exchanges and over-the-

⁸ FINRA obtains exchange data pursuant to RSAs it has signed with certain client exchanges. Under the current RSAs with national securities exchanges, FINRA conducts comprehensive surveillance across more than 99% of the market for U.S. listed equities by share and trade volume.

⁹ This is accomplished by using exchange-assigned identifiers that are mapped to the firm's CRD number. FINRA has access to all SRO-assigned equity identifiers with the exception of those assigned by the Chicago Stock Exchange. Under the proposed rule change, FINRA would thus be able to use any of these SRO-assigned identifiers or a CRD number to obtain the identity of the Non-Member Firm on OATS reports. A FINRA member that provides sponsored access to a Non-Member Firm has an OATS reporting obligation for each order sent to a national securities exchange pursuant to any such agreement. In this scenario, the FINRA member must report a New Order and a Route Report to the applicable exchange reflecting that the order was received from a Non-Member Firm. See OATS FAQ C77.

¹⁰ Although some Reporting Members voluntarily provide the MPID of a Non-Member Firm if one exists, the OATS rules do not require that the identity of the Non-Member Firm be reported.

counter market centers. As the Commission recently noted when it proposed amendments to SEA Rule 15b9-1,¹¹ “FINRA’s ability to perform comprehensive market surveillance, especially for violations of Commission rules, as well as its ability to understand and reconstruct activity in the off-exchange market generally, is limited because [Non-Member Firms] are not consistently identified in trade reports to the TRFs or the ADF, and their order activity is not captured by OATS.”¹²

In addition to amending Rule 7440 to require the identification of Reportable Non-Members from which an order is received, FINRA is also planning to update the OATS Reporting Technical Specifications to require that OATS reports specifically identify a Reportable Non-Member to which an order is routed. Rule 7440(c)(6)(I) requires that, for orders routed from a member to a non-FINRA-member, including both non-FINRA-member broker-dealers and national securities exchanges, the identity of the non-FINRA member to which the order was routed be reported. Although the OATS Reporting Technical Specifications currently require that OATS reports include a specific identifier for each national securities exchange to which an order is routed, only a generic identifier for Non-Member Firms is required.¹³ Consequently, the identity of the specific Non-Member Firm to which an order is routed is not required under the current OATS Reporting Technical Specifications. To address this gap and to conform the reporting of orders received from and orders routed to Non-Member Firms, in addition to the

¹¹ 17 CFR 240.15b9-1.

¹² See Securities Exchange Act Release No. 74581 (March 25, 2015), 80 FR 18036, 18043 (April 2, 2015).

¹³ See OATS Reporting Technical Specifications, at 4-4, and A-4 to A-5 (October 12, 2015 ed.).

proposed rule change, FINRA intends to update the OATS Reporting Technical Specifications to require that Reporting Members provide either an SRO-assigned identifier or CRD number when routing an order to a Reportable Non-Member.¹⁴

The proposed rule change, along with the changes to the OATS Reporting Technical Specifications, will significantly improve FINRA's ability to support cross-market surveillance and monitor over-the-counter trading activity. Reporting Members receive a substantial amount of order flow from Non-Member Firms, particularly in connection with alternative trading system ("ATS") activity, and this proposed rule change will enable FINRA to identify the activities of Reportable Non-Members, thereby increasing its cross-market surveillance capabilities.¹⁵

FINRA notes that although the data required by the proposed rule change may ultimately be captured as part of the Consolidated Audit Trail ("CAT"), the implementation of the CAT is likely several years away, as the national market system plan filed by the SROs still must be published by the Commission for public notice and comment, approved by the SEC, and, if approved, ultimately implemented pursuant to a multi-year timeline.¹⁶ FINRA strongly believes that gaps in OATS data must be

¹⁴ As noted above, in the case of a non-U.S. broker-dealer that does not have a CRD number or an SRO-assigned identifier, FINRA will provide an indicator for "non-U.S. broker-dealer" for use in the destination code field (for routes to a non-member broker-dealer) and as a member type code (for orders received from a non-member broker-dealer).

¹⁵ For example, in the fourth quarter of 2014, over 33% of orders reported to OATS were reported as being received from a Non-Member Firm. Of particular note, over 45% of ATS orders were received from a Non-Member Firm. In addition, during that quarter approximately 13% of sponsored access orders were received from a Non-Member Firm.

¹⁶ SEC Rule 613, which sets forth the requirements for the CAT, does not require all broker-dealers to report order information to the CAT until three years after the

addressed in the near-term, after weighing the burdens to firms and the necessity of the change, to ensure an effective audit trail. FINRA believes the specific identification of Reportable Non-Members is critical to enhance FINRA's cross-market surveillance and monitoring of the over-the-counter market and believes these changes to the OATS requirements should not be delayed due to the potential future implementation of the CAT.¹⁷

In addition to the CAT, the proposed rule change could also be affected by any amendments to SEA Rule 15b9-1.¹⁸ Section 15(b)(8) of the Act requires that a registered broker-dealer be a member of a national securities association unless the broker-dealer effects transactions in securities solely on a national securities exchange of which it is a member.¹⁹ SEA Rule 15b9-1 provides an exemption to the membership requirement in Section 15(b)(8) if a broker-dealer (i) is a member of a national securities exchange, (ii) carries no customer accounts, and (iii) has annual gross income derived from purchases

CAT plan is approved. See 17 CFR 242.613(a)(vi). The SROs charged with submitting the CAT plan filed an initial plan with the Commission on September 30, 2014, an amended and restated plan on February 27, 2015, and further amendments on December 23, 2015; however, the Commission has not yet published the CAT plan in the Federal Register for public comment. Pursuant to the plan submitted by the SROs, once the CAT is fully implemented, FINRA intends to sunset the OATS rules.

¹⁷ FINRA notes that, under SEC Rule 613, all U.S.-registered broker-dealers are subject to the CAT reporting requirements. See 17 CFR 242.613(c)(2). Consequently, if the CAT plan submitted by the SROs is approved, firms will need to specifically identify each broker-dealer from which an order is received or to which an order is routed.

¹⁸ 17 CFR 240.15b9-1.

¹⁹ 15 U.S.C. 78o(b)(8). FINRA is currently the only registered national securities association.

and sales of securities otherwise than on a national securities exchange of which it is a member in an amount no greater than \$1,000.²⁰

On March 25, 2015, the SEC proposed amendments to SEA Rule 15b9-1 that would significantly narrow the exemption from association membership by replacing the \$1,000 gross income provision in the rule with a provision that exempts from association membership exchange member broker-dealers that operate on the floor of an exchange to the extent they effect transactions off-exchange solely for the purpose of hedging the risks of their floor-based activities.²¹ If adopted, the amendments generally would require a proprietary trading firm (i.e., a firm that carries no customer accounts and, instead, trades solely for its own account(s)) relying on the current exemption to become a FINRA member if the firm continues to engage in over-the-counter trading or trading on an exchange of which it is not a member.

If this, or a substantially similar, amendment to SEA Rule 15b9-1 were adopted by the SEC, it is likely that many firms that are not currently FINRA members would become FINRA members and, as a result, would be identified on OATS reports in addition to submitting OATS reports themselves. Even if amendments to SEA Rule 15b9-1 are adopted, there would likely still be some firms that do not become FINRA members, and the timeline for compliance with any potential amendments to SEA Rule 15b9-1, could be substantial. Consequently, FINRA believes that the proposed rule

²⁰ 17 CFR 240.15b9-1. The \$1,000 gross income limitation does not apply to income derived from transactions for the dealer's own account with or through another registered broker or dealer. Thus, for example, income derived from over-the-counter trades through an alternative trading system does not count toward the \$1,000 threshold.

²¹ See Securities Exchange Act Release No. 74581 (March 25, 2015), 80 FR 18036, 18045-46 (April 2, 2015).

change is necessary regardless of the pending proposed amendments to SEA Rule 15b9-1 and would remain necessary even if amendments are subsequently adopted by the SEC.

Although this proposed rule change will require Reporting Members to submit an additional data field when submitting an OATS report for an order received from a Reportable Non-Member, FINRA does not believe that the proposed rule change will have a significant operational impact on Reporting Members or their reporting practices.²² Because identifiers already have been assigned to Reportable Non-Members, are generally readily ascertainable by Reporting Members, and OATS will accept submission of any of these identifiers already in use, FINRA anticipates that the expense associated with reporting this additional data will be minimal. FINRA also notes that some Reporting Members already provide identifiers on their OATS reports for orders received from Non-Member Firms.²³ Finally, if a Reportable Non-Member is a member of multiple SROs or has multiple SRO-assigned identifiers, the Reporting Member could use any of those identifiers to fulfill its reporting obligation in addition to a CRD number. As noted below, FINRA also intends to provide a list of Reportable Non-Members' CRD numbers for Reporting Members to use to aid in implementing the proposed rule change.

²² FINRA also does not anticipate that the change to the OATS Reporting Technical Specifications to require that Reporting Members report a unique identifier when routing an order to a Non-Member Firm will significantly impact Reporting Members' reporting practices, as only a relatively small amount of order flow is typically routed from members to Non-Member Firms. In the fourth quarter of 2014, only 1.16% of all routes reported to OATS were reported as being routed to a Non-Member Firm.

²³ In the fourth quarter of 2014, ATSS reported the SRO-assigned identifiers of seventeen Non-Member Firms that submitted approximately 12.45 billion orders to those ATSS.

As noted in Item 2 of this filing, if the Commission approves the proposed rule change, FINRA will announce the effective date of the proposed rule no later than 60 days following Commission approval. The effective date will be no later than 120 days following Commission approval.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,²⁴ which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes that the proposed rule change will enable FINRA to better identify a Reportable Non-Member's trading activity across exchanges and in the over-the-counter market through trades that are reported to a FINRA facility, which will significantly enhance FINRA's cross-market surveillance efforts pursuant to its RSAs with multiple national securities exchanges and carry out its surveillance obligations for the over-the-counter market under its own SRO license. As noted above, FINRA members receive a substantial amount of order flow from Non-Member Firms, particularly in connection with ATS and sponsored access activity, and the proposed rule change will enable FINRA to identify the activities of Reportable Non-Members, thereby increasing its cross-market surveillance capabilities. Improved surveillance capabilities help detect and deter fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest.

²⁴ 15 U.S.C. 78o-3(b)(6).

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Economic Impact Assessment

1. Regulatory Need

As discussed above, under the current rules, Reporting Members report orders they receive from, or route to, Non-Member Firms but these reports do not always contain the identity of the Non-Member Firm. As a result, FINRA cannot consistently identify Non-Member Firm activity and cannot see a complete view of such activities across all exchanges and over-the-counter market centers. The proposed rule change will address these current gaps in order reporting by requiring Reporting Members to identify Reportable Non-Members in their OATS reports. Reporting this information will allow FINRA to obtain the identity of the Reportable Non-Member directly from the OATS data, thereby improving FINRA's ability to perform comprehensive market surveillance and increasing investor protection.

2. Economic Impacts

The proposed rule change would impact Reporting Members that report orders received from, or routed to, Reportable Non-Members. As a baseline, FINRA estimates that, in the fourth quarter of 2014, approximately 175 Reporting Members received orders from Non-Member Firms and approximately 215 Reporting Members routed orders to Non-Member Firms. As discussed above, FINRA estimates that over 33% of the total OATS orders in the fourth quarter of 2014 were reported as being received from

a Non-Member Firm. Non-Member Firm orders accounted for a higher proportion (over 45%) of ATS orders. In addition, during that quarter approximately 13% of sponsored access orders were received from a Non-Member Firm. Reporting Members currently report orders received from or routed to Non-Member Firms but are not required to specifically identify these firms in their OATS reports. The proposed rule change would require the Reporting Members to identify Reportable Non-Members and submit an SRO-assigned identifier or the CRD number of these firms.

(i) Anticipated Benefits

The proposed rule change would enhance FINRA's cross-market and over-the-counter surveillance efforts by allowing FINRA to identify more Non-Member Firm trading activity across exchanges and the over-the-counter market. As discussed above, FINRA members receive a substantial amount of order flow from Non-Member Firms, particularly in connection with ATS activity. The proposed rule change will enable FINRA to identify these activities from Reportable Non-Members, thereby significantly improving FINRA's ability to support cross-market surveillance and monitor over-the-counter trading activity.

(ii) Anticipated Costs

As a result of the proposed rule change, Reporting Members that are not already identifying Reportable Non-Members in their OATS reports will incur certain implementation costs and on-going compliance costs associated with identifying Reportable Non-Members and submitting identifiers on their OATS reports.

FINRA anticipates that the costs associated with identifying Reportable Non-Members will likely be minimal because identifiers have already been assigned to

Reportable Non-Members and these identifiers are generally readily available to the Reporting Member that is receiving orders from or routing orders to Reportable Non-Members. In addition, the proposed rule change would provide Reporting Members with the option to report either the CRD number or the SRO assigned identifier, thereby allowing them to submit the identifiers that are already in use.²⁵ Moreover, FINRA intends to provide a list of CRD numbers to assist further in implementing the new requirements for those firms that are not already identifying Reportable Non-Members on their OATS reports, thereby further reducing the burden to ascertain appropriate identifiers for Reportable Non-Members.

FINRA recognizes that some Reporting Members may need to update their reporting systems and would incur certain costs associated with system analysis, coding, and testing in order to submit the required identifiers on their OATS reports. However, based on the provision of the list of identifiers by FINRA, the current volume of OATS Reports already submitted with Non-Member Firm information, and the Staff's experience with previous changes to the OATS requirements requiring similar modification to OATS reporting (i.e., modifications requiring new values for existing fields), FINRA believes that significant coding and development would not be required and that the costs referenced above would likely be minimal. Based on OATS data for the fourth quarter of 2014, FINRA estimates that approximately 23% of Reporting Members that receive orders from Non-Member Firms already identify these firms on their OATS

²⁵ Reporting Members would, therefore, have flexibility in determining which identifiers to submit, which is intended to reduce costs for these firms by allowing them to choose the most cost effective option.

reports and approximately 12% of Reporting Members that route orders to Non-Member Firms identify these firms on their OATS reports.²⁶

3. Alternatives

In considering the best way to meet its regulatory objectives, FINRA considered certain alternatives to particular features of this proposal, including alternative identifiers that could be used to identify Reportable Non-Members. For example, one FINRA committee member suggested that FINRA consider leveraging use of a Legal Entity Identifier (“LEI”) for identifying Reportable Non-Members. FINRA does not believe that use of a LEI would be feasible at this time considering that the LEI is not universally in use. As a result, FINRA did not propose the use of LEI in the OATS reports for identifying Reportable Non-Members.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The proposed rule change, in addition to another proposal involving ATS order reporting, was published for comment in Regulatory Notice 14-51 (November 2014).²⁷ Five comments were received in response to the Regulatory Notice;²⁸ however, only four

²⁶ FINRA notes that a number of these Reporting Members identify Non-Member Firms on some, but not all, orders whereas others do so on all orders. For example, in the fourth quarter of 2014, of the 39 Reporting Members that receive orders from Non-Member Firms and identify them on their OATS report, 28 identify Non-Member Firms on some and 11 identify them on all orders.

²⁷ The ATS order reporting proposal described in Regulatory Notice 14-51 is not reflected in the current proposed rule change; consequently, comments on that proposal are not addressed.

²⁸ See Letter from Manisha Kimmel, Managing Director, Financial Information Forum, to Marcia E. Asquith, Secretary, FINRA, dated February 20, 2015 (“FIF”); Letter from John A. McCarthy, General Counsel, KCG Holdings, Inc., to Marcia E. Asquith, Secretary, FINRA, dated February 20, 2015 (“KCG”); Letter from Howard Meyerson, General Counsel, Liquidnet Inc., to Marcia E. Asquith,

of the comment letters addressed the proposed rule change.²⁹ A copy of Regulatory Notice 14-51 is attached as Exhibit 2a. A list of comment letters received in response to Regulatory Notice 14-51 is attached as Exhibit 2b, and copies of the four comment letters that addressed the proposed rule change are attached as Exhibit 2c. Of the four comment letters received that addressed the proposed rule change, KCG and SIFMA were in favor of the proposed rule change, Liquidnet did not support or oppose the proposed rule change but asked for interpretive guidance on the application of the proposed rule change to non-U.S. broker-dealers, and FIF was generally opposed.

Liquidnet and SIFMA requested that FINRA provide guidance on the application of the proposed rule change to non-U.S. broker-dealers that do not have either SRO-assigned identifiers or CRD numbers.

As noted above, FINRA has amended the proposed rule language from that in Regulatory Notice 14-51 to clarify that the specific identification of Non-Member Firms applies only to U.S.-registered broker-dealers that have SRO-assigned identifiers or CRD numbers as well as Canadian broker-dealers who have been assigned SRO identifiers for purposes of accessing a FINRA trade reporting facility pursuant to Rule 7220A or 7320. FINRA will provide an indicator for “non-U.S. broker-dealer” for use in the destination code field (for routes to a non-member broker-dealer) and as a member type code (for

Secretary, FINRA, dated February 20, 2015 (“Liquidnet”); Letter from Theodore R. Lazo, Managing Director and Associate General Counsel, Securities Industry and Financial Markets Association, to Marcia E. Asquith, Secretary, FINRA, dated February 24, 2015 (“SIFMA”); and Letter from Mark Holder, Managing Director, UBS Securities LLC, to Marcia E. Asquith, Secretary, FINRA, dated February 26, 2015 (“UBS”).

²⁹ The UBS Letter addressed only the ATS order reporting proposal in the Regulatory Notice and did not address the proposed rule change.

orders received from a non-member broker-dealer) so that Reporting Members can reflect routes to or from a non-U.S. broker-dealer that does not have a CRD number or an SRO-assigned identifier.

FIF noted that using SRO-assigned identifiers would be preferable to using CRD numbers and suggested that FINRA provide a list of allowable identifiers. KCG requested that FINRA develop a list of identifiers that OATS reporting firms could rely upon to identify non-member broker-dealers and suggested that only those identifiers appearing on the list be required to be reported when dealing with non-member broker-dealers.

In response to these comments, FINRA intends to develop and publish on its website a list of acceptable CRD numbers for Reporting Members to use to meet their OATS reporting obligations. FINRA does not, however, intend that only those identifiers appearing on the list would be acceptable values. For example, Canadian broker-dealers that have been issued MPIDs to access FINRA trade reporting facilities pursuant to Rule 7220A or Rule 7320 do not have CRD numbers; thus, Reporting Members receiving orders from or routing orders to such firms would be required to use the Canadian firm's MPID on their OATS reports. Finally, FIF noted that the issue of identifying Non-Member Firms will be addressed upon the implementation of the CAT and suggested that FINRA not take interim measures to improve OATS but "work diligently with the other SROs towards driving CAT forward."

FINRA does not view these undertakings as mutually exclusive. While FINRA is working diligently with other SROs to develop and implement the CAT, FINRA also believes that reasonable changes to OATS should still be made to ensure existing audit

trails can be enhanced. As noted above, the full implementation of the CAT is likely still years away. FINRA strongly believes that gaps in OATS data must be addressed in the near-term, after weighing the burdens to firms and the necessity of the change, to ensure an effective audit trail. As set forth above, FINRA has concluded that the identification of Reportable Non-Members is important to enhance FINRA's cross-market surveillance and believes these modest changes to the OATS requirements should not be delayed due to the potential future implementation of the CAT. Although this proposed rule change will require some Reporting Members to submit more specific data when submitting an OATS report for an order received from a Reportable Non-Member, FINRA does not believe that this change will have a significant operational impact on Reporting Members or their reporting practices because identifiers already have been assigned to the Reportable Non-Members, are generally readily ascertainable by the Reporting Member that is receiving orders from or routing orders to the Reportable Non-Member, and OATS will accept submission of any of these identifiers already in use. As noted above, FINRA intends to provide a list of CRD numbers to assist further in implementing the new requirements for those Reporting Members that are not already identifying Reportable Non-Members on their OATS reports.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-FINRA-2016-006 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Robert W. Errett, Deputy Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-FINRA-2016-006. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld

from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-FINRA-2016-006 and should be submitted on or before [insert date 21 days from publication in the Federal Register].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³⁰

Robert W. Errett
Deputy Secretary

³⁰ 17 CFR 200.30-3(a)(12).

Regulatory Notice

14-51

Equity Trading Initiatives: OATS and ATS Reporting Requirements

FINRA Requests Comment on Proposed FINRA Rules Requiring the Identification of Non-Member Broker-Dealers in Order Audit Trail System (OATS) Reports and the Reporting of Additional Order Information by Alternative Trading Systems (ATS)

Comment Period Expires: January 13, 2015

Executive Summary

FINRA is requesting comment on proposed amendments to the OATS rules that would require member firms to report additional information to OATS. Specifically, FINRA is proposing to amend the OATS rules to require members to identify non-member broker-dealers when reporting orders received from such entities. FINRA is also proposing to require ATSs to provide FINRA with additional order book information using existing OATS interfaces.

The text of the proposed rules is set forth in Attachment A.

Questions concerning this *Notice* should be directed to:

- ▶ Shelly Bohlin, Vice President, Market Analysis and Audit Trail Group, Market Regulation, at (240) 386-5029; or
- ▶ Andrew Madar, Associate General Counsel, Office of General Counsel (OGC), at (202) 728-8056.

November 2014

Action Requested

FINRA encourages all interested parties to comment on the proposal. Comments must be received by January 13, 2015.

Comments must be submitted through one of the following methods:

- ▶ Emailing comments to pubcom@finra.org; or
- ▶ Mailing comments in hard copy to:
Marcia E. Asquith
Office of the Corporate Secretary
FINRA
1735 K Street, NW
Washington, DC 20006-1506

To help FINRA process comments more efficiently, persons should use only one method to comment on the proposal.

Important Notes: All comments received in response to this *Notice* will be made available to the public on the FINRA website. In general, FINRA will post comments as they are received.¹

Before becoming effective, a proposed rule change must be authorized for filing with the Securities and Exchange Commission (SEC) by the FINRA Board of Governors, and then must be filed with the SEC pursuant to Section 19(b) of the Securities Exchange Act of 1934 (SEA or Exchange Act).²

Background and Discussion

The proposals set forth in this *Notice* are two of seven FINRA initiatives relating to equity market structure and automated trading activities including high frequency trading (HFT).³ These initiatives are designed to increase the scope of trading information FINRA receives, provide more transparency into trading activities to market participants and investors and require firms engaged in electronic trading and their employees to be trained, educated and accountable for their role in equity trading. The first proposal would require FINRA members (Reporting Members) that are reporting an order received from a broker-dealer that is not a FINRA member (non-member broker-dealer) to identify the non-member broker-dealer as part of their OATS report. The second proposal would require ATSs to report additional information related to orders received by the ATS using existing OATS interfaces.

Identification of Non-Member Broker-Dealers to OATS

FINRA is proposing to require a Reporting Member that is reporting an order received from a non-member broker-dealer to identify the non-member broker-dealer as part of their OATS report. Currently, through the use of OATS and data provided to FINRA by exchanges, FINRA is able to identify with specificity the activity of FINRA member broker-dealers across market centers. However, FINRA cannot identify with specificity non-member broker-dealer activity in the over-the-counter market (OTC), or non-member broker-dealer sponsored access activity, since Reporting Members are not required to report non-member broker-dealers' identities to OATS.⁴ Consequently, FINRA is not able to consistently identify non-member broker-dealer activity and therefore cannot see a complete view of such activities conducted through FINRA members.

Although Reporting Members report orders they receive from non-member broker-dealers, these reports do not contain the identity of the non-member broker-dealer from which the order was received. Under the proposal, FINRA members receiving orders from non-member broker-dealers would be required to identify the non-member broker-dealer in their OATS reports.⁵ Members would identify the non-member broker-dealer by including a unique non-member identifier on the OATS report that will allow FINRA to obtain the identity of the non-member broker-dealer. This identifier would either be an existing SRO-assigned identifier such as a market participant identifier (MPID), or if a non-member broker-dealer does not have an SRO-assigned identifier that is available to FINRA, the Central Registration Depository (CRD) number of the non-member broker-dealer.⁶

FINRA believes that this proposal will significantly improve its ability to support cross-market surveillance and monitor OTC trading by specifically identifying broker-dealers responsible for order activity. FINRA members receive a substantial amount of order flow from non-member broker-dealers, particularly in connection with ATS and sponsored access activity,⁷ and this proposal will enable FINRA to identify and aggregate on an automated basis when a FINRA member's activities involve non-member broker-dealer activities.⁸ In addition, this additional information will allow FINRA to more readily detect potentially violative trading activity by those entities for potential enforcement action or referral to appropriate regulatory authorities as well as enable FINRA to more effectively determine whether members are complying with their regulatory obligations, including, for example, the implementation of effective risk management controls under SEA Rule 15c3-5.⁹ This requirement may also reduce the number of false alerts generated by surveillance patterns when non-member broker-dealer activity is included in surveillance information by permitting surveillance patterns to more accurately account for the specific broker-dealer that is responsible for the activity.

FINRA recognizes that this proposal will require firms to obtain and submit a unique identifier when submitting an OATS report for an order received from a non-member broker-dealer. FINRA notes, however, that unique identifiers currently exist for non-member broker-dealers, and are generally readily obtainable by the member firm trading with the non-member broker-dealer. FINRA also notes that some members already provide non-member broker-dealer identifiers for orders received from non-member broker-dealers.¹⁰ For these reasons, FINRA preliminarily believes that this proposal will not have a significant impact on Reporting Members or their reporting practices, but is soliciting comment on the impact of this proposal on Reporting Members.

Reporting of Additional Order Information by ATSs

ATSs currently submit order information relating to activity occurring on or through the ATS to FINRA through OATS.¹¹ However, there are several data elements that are not required to be reported to OATS, such as order re-pricing events (*e.g.*, an order that is pegged to the National Best Bid or Offer) and order display and reserve size. Because these components of, or changes to, an ATS's order book are not reported, FINRA is not able to use existing OATS data to fully reconstruct an ATS order book for surveillance purposes. Obtaining this additional information from ATSs would allow FINRA to use information in automated surveillance of ATSs, including trading manipulation surveillance.¹²

To enhance its ability to surveil ATS activity on an automated basis, FINRA is proposing to require ATSs that exceed a certain volume threshold to report additional order information in a manner that will supplement and link to the information currently reported by an ATS to OATS. Rather than requiring ATSs to establish a separate reporting structure for this new data, it would be reported to FINRA using existing OATS interfaces, which FINRA believes will minimize any potential duplicative reporting.¹³

The order reporting requirements would apply to any ATS (whether considered a "lit" ATS or a "dark pool")¹⁴ that accounts for more than 0.25 percent of consolidated market share in any security over a one-month period.¹⁵ Once an ATS has exceeded the threshold for one security, it would be required to report order information for all securities for which the ATS receives an order. An ATS that has triggered the reporting requirement would have to fall under the 0.25 percent threshold and remain there for six months before being relieved of its reporting obligation.

Under the proposal, ATSs exceeding the volume requirement would be required to report all events and order attributes that would change the ATS's system quantity (the number of shares of an order, whether displayed or undisplayed, that can currently execute within the ATS), the displayed quantity, the highest (buy orders) or lowest (sell orders) price at which the order can currently execute within the ATS, and the displayed price for an order. An ATS also would provide, for every order, the ATS book sequence identifier and the associated OATS identifier, which will link information about that order to the related information and full lifecycle reported to OATS.¹⁶

FINRA believes that this proposal will greatly enhance its ability to surveil activity occurring within an ATS, and by extension HFT and algorithmic trading activity more generally across markets. Among other things, the additional information provided under the proposal will enable FINRA to more effectively conduct automated surveillance involving ATSs, and to detect market-specific and cross-market manipulative activities. Given the significant role of ATSs in the current market structure, FINRA believes the proposed additional information will greatly enhance its ability to monitor and reconstruct trading activities occurring on or through an ATS.¹⁷

FINRA recognizes that the proposal may create or increase costs related to technological capabilities or system enhancements for reporting and compliance for members that are ATSs or that operate ATSs that exceed the volume thresholds noted above. These members will have to transmit additional order information to FINRA on a daily basis. Consequently, FINRA is soliciting comment on the impact of this proposal on members as well as on whether other approaches to obtaining ATS order book information exist, and the benefits and economic impact of such approaches.

Request for Comments

FINRA seeks comments on the proposals outlined above. In addition to general comments, FINRA specifically requests comments on the following questions:

Identification of Non-Member Broker-Dealers to OATS

- ▶ What kinds of costs would Reporting Members incur in complying with the proposed requirement to report the identity of non-member broker-dealers when receiving orders from such entities? Would these costs differ based on the member's business model? Please provide any estimates of these costs and associated assumptions underlying the estimates.
- ▶ Are there alternative methods or approaches that would provide FINRA with this same type of information? What are the economic impacts associated with these alternatives?
- ▶ What is the process by which a member firm obtains the identifier of a non-member broker-dealer? Would FINRA need to provide additional tools or information to Reporting Members in order for them to comply with the requirement?
- ▶ What other impacts would this proposal have on Reporting Members?

Reporting of Additional Order Information by ATSS

- ▶ What are the potential impacts on members of the proposal to require the reporting of ATS order book information? What kinds of costs would members incur in connection with this proposal? Do these costs differ depending on the member's business model? Please provide any estimates of these costs and associated assumptions underlying the estimates.
- ▶ In reporting ATS order book information, would members be required to generate new order information? To the extent that members will be required to code and transmit ATS order book information pursuant to FINRA OATS specifications, what impact will this have on members?
- ▶ Should the proposal require the reporting of all ATS order book information, or is there a benefit to excluding lower-volume ATSS from the reporting requirement? Is the proposed volume threshold an appropriate measure or should the volume threshold be higher or lower? Are there alternative threshold measures that FINRA should consider? What are the economic impacts associated with different volume thresholds?
- ▶ Would other approaches to reporting ATS order book information provide FINRA with comparable information? To the extent that other alternatives exist, what are the benefits, shortcomings and economic impacts of such approaches?
- ▶ Instead of submitting ATS order book information through the existing OATS gateway, are there other approaches that should be considered? What are the benefits, shortcomings and economic impacts of such approaches?

FINRA requests that commenters provide empirical data or other factual support for their comments wherever possible.

Endnotes

1. FINRA will not edit personal identifying information, such as names or email addresses, from submissions. Persons should submit only information that they wish to make publicly available. *See Notice to Members 03-73* (November 2003) (NASD Announces Online Availability of Comments) for more information.
2. *See* SEA Section 19 and rules thereunder. After a proposed rule change is filed with the SEC, the proposed rule change generally is published for public comment in the Federal Register. Certain limited types of proposed rule changes, however, take effect upon filing with the SEC. *See* SEA Section 19(b)(3) and SEA Rule 19b-4.
3. *See* FINRA September 19, 2014 news release [*"FINRA Board Approves Series of Equity Trading and Fixed Income Rulemaking Items."*](#)
4. A FINRA member that provides sponsored access to a non-member broker-dealer has an OATS reporting obligation for each order sent to a national securities exchange pursuant to any such agreement. In this scenario, the FINRA member must report a New Order and a Route Report to the applicable exchange reflecting that the order was received from a non-member broker-dealer. *See* OATS FAQ C77.
5. FINRA Rule 7440(c)(6) requires that, for orders routed from a member to a non-member broker-dealer, the identity of that non-member broker-dealer be reported. Currently, the OATS Technical Reporting Specifications require a specific identifier for each national securities exchange to which an order is routed be reported to OATS. However, only a generic identifier for non-members other than a national securities exchange is required. Consequently, the identity of the specific non-member broker-dealer to which an order is routed is not captured. The OATS Reporting Technical Specifications will be updated to require a member to provide either an SRO-assigned identifier or CRD number when routing an order to a non-member broker-dealer.
6. Currently, all SEC-registered broker-dealers have an SRO-assigned identifier that is available to FINRA.
7. For example, in the second quarter of 2014, more than 39 percent of new orders reported to OATS were reported as being received from a non-member broker-dealer. Of particular note, more than 49 percent of ATS orders and more than 63 percent of sponsored access orders were received from a non-member broker-dealer.
8. For example, FINRA would be able to identify potential wash trades of a non-member broker-dealer, even if executed through two separate members.
9. *See* 17 CFR 240.15c3-5.
10. In the second quarter of 2014, ATSS reported the MPIDs of 19 non-FINRA member broker-dealers that submitted approximately 10.1 billion orders to those ATSS.
11. An ATS is a system that meets the statutory definition of a national securities exchange, which includes a system that brings together buyers and sellers of securities, but that elects to register as a broker-dealer and be subject to the requirements set forth in Regulation ATS.
12. FINRA already receives these data elements in the order book information provided to FINRA by its exchange clients under Regulatory Services Agreements, and this additional information would allow FINRA to have comparable information for both ATSS and exchanges.

13. Similarly, an ATS that is registered as an Alternative Display Facility (ADF) Trading Center and displays quotations on the ADF, of which there currently is only one such ATS, is subject to separate order reporting requirements under Rule 6250, which require that the ADF Trading Center report order information that will link an order to a quote that is displayed on the ADF. For such ATSs, the proposed rule would incorporate certain reporting requirements of Rule 6250, but would not require duplicative reporting for an ADF Trading Center.
14. A “lit” ATS displays subscriber orders and, if that ATS meets the applicable volume thresholds, makes its best bid and best offer available for publication in the consolidated quotation data. A “dark” ATS does not make such quotation information available within the ATS or for publication in the consolidated quotation data. *See* 17 CFR 242.301(b)(3).
15. This is the same threshold that was proposed, although never adopted, by the SEC in its proposed rulemaking to lower the trading volume threshold in Regulation ATS that triggers the obligation for ATSs to display their best-priced orders in the consolidated quotation data. *See* Securities Exchange Release No. 60997 (November 13, 2009), 74 FR 61208 (November 23 2009).
16. For an ATS that displays quotations on the ADF, the rule will incorporate certain reporting requirements from Rule 6250, which require that the ADF Trading Center report order information that will link an order to a quote that is displayed on the ADF.
17. FINRA notes that, for the period between May 12, 2014, through June 23, 2014, ATSs accounted for 16 percent of the volume of NMS stocks by shares traded.

ATTACHMENT A

Below is the text of the proposed rule change. Proposed new language is underlined; proposed deletions are in brackets.

FINRA Rules

4554. Alternative Trading Systems - Recording and Reporting Requirements of Order and Execution Information for NMS Stocks

(a) Subject to the terms and conditions contained herein, each Qualifying ATS must record each item of information described below for each order it receives in an NMS stock, as defined in Rule 600(b)(47) of SEC Regulation NMS, from a subscriber or from another broker-dealer. For purposes of this Rule, the term "order" includes a broker-dealer's proprietary quotes that are transmitted to an ATS. All Qualifying ATSs must report this information to FINRA as specified below.

(1) Order Receipt:

All orders received by a Qualifying ATS must be recorded and reported to OATS pursuant to FINRA Rules 7440 and 7450. The following additional fields must also be recorded and reported to FINRA by the Qualifying ATS when reporting receipt of the order to OATS:

(A) unique identifier assigned to the order by the ATS, as applicable;

(B) the time the order was communicated to the ATS matching engine if different than the time of receipt reported pursuant to FINRA Rule 7440(b)(16), and the time when the order was placed on the book for execution, with such information reported in the finest increment (e.g., milliseconds) that is captured in the system of such ATS;

(C) ATS book sequence id for the event;

(D) whether the order was marketable upon arrival;

(E) whether the order was not marketable and was placed on the book;

(F) display quantity;

(G) total quantity available for execution at the ATS at the time the order was received by the ATS;

(H) price at which the order was displayed and/or price at which order was placed on the ATS book (e.g., if not displayed);

(I) specific pricing instructions such as pegging, including specific benchmarks;

(J) highest (buy orders) or lowest (sell orders) price at which the order can currently execute within the ATS;

(K) order display instructions and limits, such as the maximum number of shares for the order that can be displayed at any given time, display range, etc.; and

(L) any other information as specified by FINRA or the SEC.

(2) ATS book sequence ID, when the Qualifying ATS reports any of the following events to OATS pursuant to FINRA Rules 7440 and 7450:

(A) order executions at the ATS;

(B) order cancellations;

(C) order modifications; and

(D) order transmittal to another market center.

(3) ATS Book Price and Size Changes

(A) whether price and/or size of shares available for execution changed (e.g., price change or size change);

(B) the order receiving firm order ID, as that term is described in Rule 7440(b)(1) and the OATS Reporting Technical Specifications;

(C) unique identifier assigned to the order by the ATS, as applicable;

(D) price or size change timestamp;

(E) reason for price and/or size change;

(F) ATS book sequence id for the event;

(G) new display quantity and total quantity of the order executable at ATS resulting from the order event update;

(H) new limit and displayed price and the new highest (lowest) price of the buy (sell) order resulting from the order update event;

(I) new order display limits, such as a new display range resulting from the order update event; and

(J) any other information as specified by FINRA.

The information described in subparagraphs (1) through (3) must be reported to FINRA by no later than 8:00 a.m. Eastern Time on the calendar day following of receipt of the order in an electronic form as prescribed by FINRA.

(b) Qualifying ATSs that are also registered as ADF Trading Centers, as defined in Rule 6220, must also record and report to FINRA, as specified below, the following information for each bid or offer displayed on the ADF:

- (1) symbol;
- (2) quote identifier provided to the ADF Facility;
- (3) quote generation timestamp;
- (4) the Order Receiving Firm Order ID, as that term is described in Rule 7440(b)(1) and the OATS Reporting Technical Specifications for each order that is part of the displayed bid or offer;
- (5) unique identifier assigned to the order by the ATS, as applicable, for each order that is part of the displayed bid or offer; and
- (6) any other information as specified by FINRA or the SEC.

The information described in paragraph (b) shall be reported to FINRA no later than 8:00 a.m. Eastern Time on the calendar day following receipt of the order in an electronic form as prescribed by FINRA; provided, however, that an ATS that is also registered as an ADF Trading Center must report any information described in this paragraph (b) to FINRA immediately upon request. Any information related to time must be reported in the finest increment (e.g., milliseconds) that is captured in the system of such ATS.

(c) "Qualifying ATS" means any ATS, as defined in Rule 300 of SEC Regulation ATS, that accounts for more than 0.25% of consolidated market share in any NMS stock over a one-month period. Once an ATS has exceeded the threshold for one NMS stock, it will be required to report order information for all NMS stocks for which the ATS receives an order. Once an ATS is deemed a Qualifying ATS, it must fall under the 0.25% market share threshold, and remain below that threshold for six months, to no longer be considered a Qualifying ATS and be relieved of its reporting obligation.

(d) Members shall transmit this information in such form as prescribed by FINRA.

* * * * *

6250. Quote and Order Access Requirements

(a) through (b) No Change

(c) An ADF Trading Center that is an ATS must report the information required in Rule 4554. For each bid or offer displayed by [an ADF Trading Center] a Registered Reporting ADF Market Maker on the ADF, the [ADF Trading Center] Registered Reporting ADF Market Maker must record and report to FINRA the following information in such form as prescribed by FINRA.

(1) All [ADF Trading Centers] Registered Reporting ADF Market Makers must record and report the following information for each order that is part of a displayed bid or offer, including:

(A) through (M) No Change

(2) All [ADF Trading Centers] Registered Reporting ADF Market Makers must also record and report the execution details, if any, of each order that is part of a displayed bid or offer, including:

(A) through (L) No Change

The information described in paragraphs (1) and (2) shall be reported to FINRA in “next day” file submission, with such information reported to FINRA no later than 8:00 a.m. Eastern Time on the day following receipt of the order; provided, however, that an [ADF Trading Center] Registered Reporting ADF Market Maker must report any information described in paragraphs (1) and (2) to FINRA immediately upon request. Any information related to time must be reported in the finest increment (e.g., milliseconds) that is captured in the [ADF Trading Center’s] Registered Reporting ADF Market Maker’s system.

* * * * *

7440. Recording of Order Information

(a) Procedures

No Change.

(b) Order Origination and Receipt

Unless otherwise indicated, the following order information must be recorded under this Rule when an order is received or originated. For purposes of this Rule, the order origination or receipt time is the time the order is received from the customer.

(1) through (18) No Change.

(19) where the Reporting Member receives an order from a broker-dealer that is not a member, identification of the non-member broker-dealer; and

([19]20) if the member is relying on the exception provided in Rule 5320.02 with respect to the order, the unique identification of any appropriate information barriers in place at the department within the member where the order was received or originated.

(c) Order Transmittal

No Change.

Comments on Regulatory Notice 14-51 Equity Trading Initiatives: OATS and ATS Reporting Requirements

Dear Ms Asquith

UBS Securities LLC ("UBS") respectfully submits this letter in response to the request for comment on proposed amendments to the OATS rules described in FINRA Regulatory Notice 14-51 (the "Notice"). The Notice discusses proposed rules that would require Alternative Trading Systems ("ATSs") to provide FINRA with additional order book information using existing OATS interfaces.¹

The UBS View

UBS supports the underlying goals of this and other FINRA initiatives that are designed to improve transparency for market participants and regulators. To the extent that data provided by brokers, ATSs and other participants can provide meaningful insight into automated trading activities, and is practical and not overly burdensome to produce, UBS agrees that it should be made available to regulators and, where appropriate, to the investing public.

The Notice prompts two fundamental questions: (i) will the additional order information reported by ATSs ("ATS Data") achieve FINRA's stated objectives, and (ii) will the associated burden of producing and processing the ATS Data be justified by the benefits realized², especially in light of other regulatory initiatives?

¹ The Notice also contains proposed amendments to the OATS rules to require members to identify non-member broker-dealers, but UBS is not commenting on that portion of the Notice.

² In the Framework Regarding FINRA's Approach to Economic Impact Assessment for Proposed Rulemaking, FINRA cites the importance of "analysis, including assumptions and risks, as to why the proposal is necessary and how it best achieves its stated goal(s)".

Based upon a careful review of the Notice with our internal subject matter experts, UBS believes the proposed approach *requires thoughtful modifications*. The creation of a new feed for order events and use of OATS as the platform for reporting those events pose significant challenges, and, in our opinion, are not the most effective methods to realize FINRA's goals.

Areas of Concern and Recommendations

1. **The complexities of ATS rulebooks mean a simple price/time priority view of an ATS order book may not provide meaningful information.**

FINRA seeks the ATS Data primarily because "FINRA is not able to use existing OATS data to fully reconstruct an ATS order book for surveillance purposes."

ATSs in many cases have sophisticated order types that mean matching is not carried out in strict price/time priority sequence. The UBS ATS, for example, has multiple crossing restrictions and Source Categories³ that factor into its matching algorithm. Given this complexity, it is difficult to see how FINRA could adequately embed these varied rulesets into its evaluation of an ATS orderbook solely built from the requested order event information.

UBS questions whether a partial recreation of an ATS order book will in practice provide FINRA with sufficient information to perform effective surveillance.

2. **Alternatives to a feed of order events should be explored. Not all ATSs "reprice" pegged orders. Book recreation may be partially achievable through use of detailed order attributes.**

Modelled after the data feeds that it receives from exchanges, FINRA seeks data representing all events and order attributes that would change the number of shares or price at which an order within an ATS could execute.⁴ In reality, an ATS that neither displays nor publishes order information to any external party does not have a need to capture or store this type of 'book' feed. Furthermore, FINRA appears to assume that pegged orders in ATSs are "repriced". Orders in the UBS ATS book, including pegged orders, are evaluated for marketability based upon peg instructions, limit price constraints and crossing restrictions, but are not explicitly repriced. The requirements outlined in the Notice may therefore require an ATS to generate order state events that do not currently exist, solely for the purpose of reporting the data to FINRA. This requirement would require extensive re-engineering of matching engine technology components, which would add risk and complexity to these mission-critical systems.

FINRA should explore whether certain additional information concerning order types (special handling codes) on an OATS order receipt event could better facilitate surveillance without requiring ATSs to provide voluminous and frequent price/size updates based on market data or execution events.

³ Please see UBS ATS' Form ATS, available at www.ubs.com/ats, for the definition of Source Category as well as further details in respect of its matching methodology.

⁴ See Notice footnote 12: "FINRA already receives these data elements in the order book information provided to FINRA by its exchange clients under Regulatory Services Agreements."

3. OATS is not the best platform to receive the proposed feed.

If FINRA determines that the order event feed is the appropriate mechanism for capture of the information it requires, FINRA should revisit the concept of using OATS as the vehicle to receive the feed. Currently most firms report to OATS in a batch processing mode after the end of the trading day. The window for OATS report submission is generally sufficient to allow even high volume ATSs to handle OATS processing.

Based upon our preliminary analysis, UBS projects that new reporting as proposed under the Notice would increase the overall submission of UBS OATS records by at least a factor of 10. The effect of this massive increase in reporting would most likely mean that UBS would modify its reporting to an intra-day process. That type of change also would require a significant technology investment. As a result, storage costs for ATSs will increase substantially.

FINRA should consider the ability of the existing FINRA OATS infrastructure to support this new reporting volume. Increasing the volume of records submitted by some of its largest participants by a factor of 10 will pose significant challenges to FINRA, as well as the submitting firms and ATSs. The cost of this infrastructure investment will be borne indirectly by the industry, which is also facing a series of costly new initiatives such as the Consolidated Audit Trail, FINRA CARDS and Regulation SCI.

If FINRA proceeds to the rulemaking stage, it should be incumbent upon FINRA to conduct a thorough analysis of the cost implications on the OATS system and estimated impact. Importantly, FINRA should more explicitly justify the investment in significant storage and processing for OATS given the impending implementation of Consolidated Audit Trail with its extensive data processing infrastructure.

Additionally, UBS notes that the reporting requirements outlined in the Notice have certain open-ended descriptions in the reporting layout, such as "(L) any other information as specified by FINRA or the SEC." It is not possible to provide meaningful feedback on such an open ended definition. We suggest FINRA further refine with specificity the reporting requirements.

4. Revising the proposal to require additional order attributes on existing OATS records may address concerns.

As noted above, we believe FINRA could achieve its objectives in a more cost-effective way by expanding the OATS attributes required for ATS OATS reports. This incremental but highly effective approach would eliminate the extensive re-engineering work required by ATS matching engines, storage and capacity concerns for participants and FINRA, as well as process re-engineering requirements for moving to intra-day reporting. The enhanced OATS attributes could facilitate an intelligent recreation of ATS order book data by FINRA based on the order attributes in combination with market data feeds FINRA already maintains.

Conclusion

UBS supports the underlying goals stated in the Notice to enhance the transparency of the US equity securities markets. However, efforts to strengthen our markets should be both effective and not overly burdensome.

ATSs serve an important function in the US equity markets, and their advent was driven by client demand for execution alternatives. ATSs offer meaningful price improvement and reduced market impact costs to investors,

and often allow interaction with more natural order flow. Furthermore, certain ATSS provide additional liquidity opportunities, particularly for those institutional clients that prefer to work their orders away from lit markets. Onerous reporting requirements imposed on ATSS could stifle innovation, or more significantly, create sufficient operational burdens or barriers to entry that will cause them to cease operating. The ultimate result of this contraction would be to limit or suppress the execution choices of buy-side investors, meaning investors will have less ability to effectively manage their trading strategies, and will have diminished opportunities to seek better execution, lower transaction costs and achieve price improvement and investment performance. As a result, the end clients of institutional investors - which include retail investors, individual retirement account and fund holders - would likely be impacted.

We respectfully request that FINRA work closely with the industry to further refine the approach set forth in the Notice to create a framework that is best designed to enhance transparency and preserve the execution choices of investors and enable broker-dealers to serve the evolving needs of clients with innovative execution offerings. Thank you for the opportunity to comment on the Notice. Should you have questions regarding the views of UBS, please do not hesitate to contact me.

Yours sincerely

Re: Regulatory Notice 14-51 - Identification of Non-Member Broker-Dealers in OATS and the Reporting of Additional Order Information by ATSS

Dear Ms. Asquith,

The Financial Information Forum (FIF)¹ would like to take this opportunity to comment on Regulatory Notice 14-51 - Identification of Non-Member Broker-Dealers in OATS and the Reporting of Additional Order Information by ATSS (the "proposal"). We appreciate the extension of the comment period which has allowed for a thorough review of the proposal. As written, we believe the proposal will have a significant impact on implementation and we look forward to continued conversations with FINRA to achieve their regulatory goals in a more efficient manner.

Identification of Non-Member Broker-Dealers in OATS

In order to facilitate the identification of non-member broker dealers in OATS, FIF recommends that FINRA augment existing MPID directories² to include MPIDs for non-member broker dealers. We understand that not all non-FINRA members have MPIDs but believe that the FINRA MPID program could be expanded in a manner similar to the provision of MPIDs for NYSE floor brokers as part of the OATS for NMS expansion. Firms would look to this list in order to validate whether an MPID would be required for OATS identification processes.

FIF also evaluated the use of the CRD number, recognizing that all U.S. registered broker dealers have a CRD number. We believe an MPID-based approach is better because current OATS

¹ FIF (www.fif.com) was formed in 1996 to provide a centralized source of information on the implementation issues that impact the financial technology industry across the order lifecycle. Our participants include trading and back office service bureaus, broker-dealers, market data vendors and exchanges. Through topic-oriented working groups, FIF participants focus on critical issues and productive solutions to technology developments, regulatory initiatives, and other industry changes.

² Specifically many firms rely on the MPID list available here:
<ftp://ftp.nasdaqtrader.com/symboldirectory/mpidlist.txt>

FINANCIAL INFORMATION FORUM

identification is based on the MPID. Implementation using an existing MPID directory would allow firms to leverage existing workflows and ease implementation costs. Additionally, CRD numbers may be associated with multiple firm names for the same firm. Reconciling firm names with CRD numbers may prove challenging. It is worth noting that with the implementation of CAT and the corresponding CAT Reporter ID, this issue will be addressed. Rather than interim measures to improve OATS, FIF respectfully suggests that FINRA work diligently with the other SROs towards driving CAT forward.

Reporting of Additional Order Information by ATSs

The proposal states that “ATSs exceeding the volume requirement would be required to report all events and order attributes that would change the ATS’s system quantity (the number of shares of an order, whether displayed or undisplayed, that can currently execute within the ATS), the displayed quantity, the highest (buy orders) or lowest (sell orders) price at which the order can currently execute within the ATS, and the displayed price for an order.” In the proposal, the volume requirement is set at thresholds based on SEC proposal, S7-27-09, that was never adopted. Rather than introduce new thresholds for ATSs to monitor, FIF recommends using an existing threshold based on either the fair access threshold of Reg ATS or the SCI ATS thresholds established in Reg SCI.

For those ATSs that would be subject to the proposal, FIF has several concerns about the implementation impact if the proposal were adopted in its current form. The implementation concerns are as follows:

- The proposal would require ATSs to log events that they do not currently log. The logging of such events may impact the latency of ATS matching engines, and would require significant reengineering of trading infrastructure to comply. It would be very difficult for firms to develop separate processes to re-run market data against ATS order information in order to produce these records. It is questionable if such an approach would produce reliable results since it would require re-sequencing market data against an order stream retroactively. Additionally, this would likely be a more cumbersome process.
- The number of additional OATS records would be significant; depending on implementation specifics FIF members estimate this would range from 10 to 100 times what is sent to OATS today. Many firms that currently generate OATS via an end of day batch process may be required to create a real-time OATS generation process given the sheer volume of submissions that would be required. Additionally, FIF members are concerned with the costs associated with accommodating this volume on the OATS platform and the downstream impact this would have on industry costs associated with supporting OATS.
- If FINRA is looking for ATSs to generate the equivalent of an order book feed, OATS is not suited for this purpose.
- Unlike exchanges, ATSs may not re-price orders with every movement in market data. Often, re-pricing occurs only if there is a contra-order in the ATS. Other times, re-pricing is dependent on whether the order is marketable, e.g., a pegged limit order that is not

FINANCIAL INFORMATION FORUM

marketable will not generate any re-pricing events. FINRA has indicated that they are not looking for ATSs to manufacture events but it is unclear under what circumstances an OATS submission would be required for an ATS that does not re-price all orders.

FIF believes that further discussions between FINRA and ATSs are required in order to ensure that FINRA has an in-depth understanding of the relevance of their regulatory objectives especially with respect to ATSs that do not route out and do not display orders. It is our understanding that surveillance objectives as they relate to identifying spoofing or layering activity depend on orders being displayed and routable which is not the case in many ATSs. The proposal assumes that ATSs operate in a manner similar to exchanges which may not be true for all ATSs. ATSs, in conformance with their Form ATS, may offer different execution models and client functionality including priority that is not strictly based on price/time and options for subscribers to opt-out of trading with certain counterparties. Additionally, ATSs may enhance their functionality on a regular basis. Without a thorough evaluation of an ATS's Form ATS, FINRA will not have a complete picture of an ATS's order/execution model even with the additional order information that the proposal is requesting.

While FIF questions the benefits of providing the additional order information requested in the proposal, we do believe there are benefits to ATS transparency. The recent implementation of the MPID amendments along with the associated ATS OATS and Trade Reporting guidance³ will provide new trade reporting and order audit trail information to FINRA to support their regulatory goals. Additionally, FINRA could explore additional special handling codes to capture various pegging and other market data-dependent order types. To this end, FIF members have expressed a willingness to continue the dialogue with FINRA to determine how best to capture additional data as part of the order audit trail.

Given that OATS will be retired as part of the Consolidated Audit Trail (CAT), FIF recommends that rather than enhancing OATS for the short-term, any requirements to come out of further discussions should become functional requirements of CAT. Requiring significant changes at both firms and FINRA to accommodate this proposal would be short-sighted in light of CAT. We acknowledge FINRA's concerns with the timing of CAT but believe that given their role as both a member of the SRO CAT consortium as well as a bidder for the CAT processor, they are uniquely positioned to drive CAT forward in a timely manner. In its current form, a significant effort will be required on the part of impacted firms to implement this proposal. The implementation time required for the re-engineering efforts described above is not trivial. Requiring firms to make enhancements to OATS in parallel with CAT implementation will drain internal resources and strain CAT implementation timelines. We are hopeful that FINRA will amend this proposal and consider CAT as part of any future rule-making in this area.

Re: FINRA Regulatory Notice 14-51: Proposal Requiring the Identification of Non-Member Broker-Dealers in Order Audit Trail System Reports and the Reporting of Additional Order Information by Alternative Trading Systems

Dear Ms. Asquith:

The Securities Industry and Financial Markets Association (“SIFMA”)¹ submits this letter to comment on the above-referenced Regulatory Notice published by the Financial Industry Regulatory Authority (“FINRA”). In the Regulatory Notice, FINRA requests comment on a proposal to amend the Order Audit Trail System (“OATS”) rules to require members to identify non-member broker-dealers when reporting orders received from those entities. FINRA is also proposing to require Alternative Trading Systems (“ATSS”) to provide FINRA with additional order book information using existing OATS interfaces. The proposal is one of seven FINRA initiatives relating to equity market structure and automated trading activities.

For many years, SIFMA and its members have been vocal advocates and thought leaders on equity market structure issues. The U.S. equity markets are the deepest, most liquid and most efficient in the world, with investors enjoying extraordinarily low transaction costs, narrow spreads, and fast execution speeds. Nevertheless, SIFMA believes there are aspects of market structure that could be enhanced through steps designed to decrease unnecessary market complexity, increase transparency of market information, and promote fairness in access. To sharpen the focus on these important issues, SIFMA’s Board of Directors convened a broad-based task force in 2014 of members from across the country and across the industry, including retail and institutional dealers and asset managers, to develop a series of tangible and actionable

¹ The Securities Industry and Financial Markets Association (SIFMA) brings together the shared interests of hundreds of securities firms, banks and asset managers. SIFMA’s mission is to support a strong financial industry, investor opportunity, capital formation, job creation and economic growth, while building trust and confidence in the financial markets. SIFMA, with offices in New York and Washington, D.C., is the U.S. regional member of the Global Financial Markets Association (GFMA). For more information, visit <http://www.sifma.org>.

Marcia E. Asquith, Financial Industry Regulatory Authority
SIFMA Comment Letter on FINRA Regulatory Notice 14-51
February 24, 2015
Page 2

market structure reforms. Through this task force, SIFMA has developed more than a dozen specific recommendations for addressing equity market structure.²

SIFMA supports FINRA's goal of enhancing its ability to conduct automated surveillance and monitoring of trading activity on ATSs. However, we believe the data collection requirements of the proposal would not serve FINRA's goal because the requirements do not sufficiently account for the unique and customized trading functionalities that each ATS provides. In their current form, the proposed data collection requirements would impose unworkable operational burdens and FINRA has not sufficiently explained how this additional information would enhance its surveillance efforts. Before FINRA files the initiative with the Securities and Exchange Commission ("SEC") as a proposed rule change, we urge FINRA to work directly with SIFMA and its members to refine the proposal, with a goal of providing FINRA with workable data elements that would not impose unnecessarily excessive costs or risks to implement.

I. Reporting of Additional Order Information by ATSs

The Regulatory Notice states that the goal of the proposal is to enhance FINRA's ability to surveil activity occurring within an ATS, and by extension electronic and algorithmic trading more generally across markets. Under FINRA's proposal, ATSs exceeding a volume requirement would be required to report all events and order attributes that would change the ATS's system quantity (the number of shares of an order, whether displayed or undisplayed, that can currently execute within the ATS), the displayed quantity, the highest (buy orders) or lowest (sell orders) price at which the order can currently execute within the ATS, and the displayed price for an order. In addition, ATSs would be required to provide, for every order, the ATS book sequence identifier and the associated OATS identifier, which would link information about that order to the related information and full lifecycle reported to OATS. At the heart of the proposal is a goal of allowing FINRA to use OATS data to fully reconstruct an ATS order book for surveillance purposes.

In addition to the overall concern that the proposal would impose a significant operational burden without furthering FINRA's goal of enhanced surveillance, SIFMA members have a number of concerns with the specific aspects of the proposal. First, the proposal's one-size-fits-all reporting requirement does not take into account the variation of business models and trading functionalities across ATSs. For example, ATSs differentiate among themselves through sophisticated and individualized trading functionalities, which do not line up with standardized reporting models the way that traditional exchange trading models do. In addition, compliance with the proposal would require ATSs to carry out extremely significant systems changes, which would introduce unnecessary operational and systemic risk to the market.

² See SIFMA Equity Market Structure Recommendations (July 10, 2014), available at <http://www.sifma.org/workarea/downloadasset.aspx?id=8589949840>.

Marcia E. Asquith, Financial Industry Regulatory Authority
SIFMA Comment Letter on FINRA Regulatory Notice 14-51
February 24, 2015
Page 3

More specifically, the set of data elements that FINRA would require ATSs to collect and report reflect an incorrect assumption that every ATS's business model and matching protocol is the same, and that all ATSs function the same as an exchange. In fact, the business models of ATSs vary significantly because, by their very nature, each ATS seeks to provide a unique, "alternative" order handling and execution methodology. Not all ATSs follow a price/time priority methodology and rather differentiate themselves to meet the specific trading needs of a subset of market participants, for example by placing importance on size of transaction or investor type. Further, an ATS may provide its subscribers with the ability to place various restrictions (*e.g.* counterparty, size) on their orders which may result, by the subscriber's choice, in an otherwise available contra-side order being bypassed.

Several data elements stand out as examples of information that some ATSs do not maintain and would have to begin collecting solely for these requirements. In these cases, ATSs would have to capture, store and report brand new fields that are not otherwise required to be recorded and may have no relation to the ATS's business model, with no corresponding explanation of how the information would enhance FINRA's surveillance efforts.

- The proposal would require each ATS to record whether each order "was marketable on arrival" and whether the order "was not marketable and was placed on the book." However, some ATSs do not record whether or not incoming orders are marketable. In addition, depending on the subscriber's instructions a marketable order might not be executed right away and a non-marketable order might not be placed on an order book.
- The proposal would require ATSs to track the highest (for buy orders) or lowest (for sell orders) price at which an order can currently execute. However, some ATSs do not track this information for every incoming order because it may not be relevant to the matching logic of the trading system.

In addition, the complexity of the proposed data elements would unnecessarily increase operational risk to the market. Each ATS in scope would need to change multiple systems in order to operate in compliance with the proposed requirements, resulting in multiple ATSs making multiple systems changes at the same time. Any systems change, no matter how thoroughly prepared and tested, creates a risk of error and negative impact to the market. The proposed data collection requirements would result in a significant number of systems changes by ATSs with substantial market presence. Any mistake resulting from all of those systems changes could cause systemic problems.

Moreover, the proposal would result in ATSs being required to collect and transmit massive amounts of data. As an example, the proposal would require ATSs to track, record, and transmit extensive data for all price and size changes of each order. Taking aside the fact that some ATSs do not track this information to begin with, for each order that an ATS receives – which can be millions per day given millisecond trading speeds – ATSs would have to collect and record a multiple of those millions to track each theoretical price or size change and the

Marcia E. Asquith, Financial Industry Regulatory Authority
 SIFMA Comment Letter on FINRA Regulatory Notice 14-51
 February 24, 2015
 Page 4

reason for each price and size change, among many other factors. Implementing these aspects of the proposal would require a significant amount of resources to accommodate the enormous increase in data required to be collected, transmitted, and retained.

In addition, FINRA's justification for the proposal is based in part on the incorrect predicate that ATSs should provide the same type of surveillance activity as exchanges. In this regard, FINRA states that it already receives these data elements in the order book information provided to FINRA by its exchange clients under Regulatory Services Agreements ("RSAs"), and this additional information would allow FINRA to have comparable information for both ATSs and exchanges. However, as SIFMA has noted before,³ exchanges serve a specific statutory role as self-regulatory organizations, under which they are responsible for regulating their member firms and enforcing compliance with the federal securities laws. In this regard, it is important to point out that FINRA's exchange clients provide order book information to FINRA *voluntarily*, under RSAs that they elect to negotiate and enter into pursuant to their own choice to outsource their regulatory functions to FINRA. If an exchange experiences issues with transmitting information to FINRA, the two parties resolve the matter as part of their business arrangement. Under the proposed rule, ATSs would be *required* to collect and provide data to a primary regulator as part of a regulatory requirement. If an ATS were to experience issues with transmitting information required by the proposed rule to FINRA, it would then be subject to enforcement penalties and fines, even after the ATS resolves the issue.

Taking all of these factors together, we believe FINRA can accomplish its goal of enhanced surveillance in a much less burdensome manner by narrowing the scope of the required data elements. SIFMA and its members stand ready to work with FINRA to find a workable solution.

II. Identification of Non-Member Broker-Dealers to OATS

SIFMA supports FINRA's proposal to require a reporting member that is reporting an order received from a broker-dealer that is not a FINRA member (non-member broker-dealer) to identify the non-member broker-dealer as part of their OATS reports. FINRA notes in the proposal that members would identify the non-member broker-dealer by including a unique non-member identifier on the OATS report that will allow FINRA to obtain the identity of the non-member broker-dealer. Specifically, this identifier would either be an existing Self-Regulatory Organization (SRO)-assigned identifier, such as a market participant identifier (MPID), or if a non-member broker-dealer does not have an SRO-assigned identifier that is available to FINRA, the Central Registration Depository (CRD) number of the non-member broker-dealer.⁴ However, FINRA does not address how member firms should identify non-U.S. broker-dealers, which do not have CRD numbers or MPIDs. For those cases, FINRA should clarify how non-

³ See Letter from Theodore R. Lazo, Managing Direct and Associate General Counsel, SIFMA to Mary Jo White, Chair, Securities and Exchange Commission dated July 31, 2013.

⁴ See FINRA Regulatory Notice 14-51.

Re: Regulatory Notice 14-51: FINRA Request for Comment on Proposed Rules Requiring the Identification of Non-Member Broker-Dealers in Order Audit Trail System (OATS) Reports and the Reporting of Additional Order Information by Alternative Trading Systems (ATS)

Dear Ms. Asquith:

KCG Holdings, Inc. (KCG) respectfully submits this letter in response Regulatory Notice 14-51 (RN 14-51 or the Notice) issued by the Financial Industry Regulatory Authority (FINRA). KCG appreciates the opportunity to comment on the Notice and commends FINRA generally on its recent series of initiatives relating to market structure and automated trading activities.

RN 14-51 requests comment on proposed rule amendments that would require member firms to report additional information to OATS. The proposal has two primary components: (1) identification of non-member broker-dealers to OATS; and (2) reporting of additional order information by ATSS. KCG supports FINRA's goal of improving its ability to support cross-market surveillance and monitor trading activity in the over-the-counter (OTC) market. However, as discussed in more detail below, we recommend that FINRA consider revising its proposal in several respects prior to filing it as a proposed rule change with the U.S. Securities and Exchange Commission (Commission).

I. Background

KCG is a global financial services firm that offers investors a range of services designed to address their trading needs across asset classes, product types and time

zones. As an independent, electronic market maker, KCG combines advanced technology with exceptional client service to deliver greater liquidity, lower transaction costs, improve pricing, and provide execution choices. KCG is a registered market maker on numerous U.S. cash equity and options exchanges, including a DMM and Supplemental Liquidity Provider on the New York Stock Exchange (NYSE), and a Lead Market Maker on NYSE Arca. As a market maker, KCG commits its capital to facilitate trades by buyers and sellers on exchanges, ATSS, and directly to our clients.

KCG offers clients multiple opportunities to interact with our market making operations. In addition, KCG's institutional clients have access to algorithms and experienced trading desks to access liquidity, maintain anonymity and minimize market impact. KCG also operates two Commission-registered ATSS.

II. Discussion

A. Identification of non-member broker-dealers to OATS

FINRA is proposing to require that a FINRA member (Reporting Member) that is reporting an order received from a non-member broker-dealer to identify the non-member broker-dealer as part of its OATS report. Currently, FINRA is able to identify with specificity the trading activity of FINRA member broker-dealers across market centers through the use of OATS reports and data provided to FINRA by the exchanges. FINRA is unable, however, to consistently identify the trading activity of non-member broker-dealers across market centers. Although Reporting Members do report to OATS orders they receive from non-member broker-dealers, these reports do not contain the identity of the non-member broker-dealer.

Under the proposal, a FINRA member receiving an order from a non-member broker-dealer would be required to reference a unique non-member identifier when reporting the order to OATS that would allow FINRA to identify the non-member broker-dealer. FINRA noted this identifier would either be an existing SRO-assigned identifier such as a market participant identifier (MPID) or the Central Registry Depository (CRD) number for non-member broker-dealer that does not have an SRO-assigned identifier. FINRA believes the inclusion of non-member broker-dealer

identities will significantly improve its ability to support cross-market surveillance and better monitor OTC trading activity.

KCG supports FINRA's proposal to better identify non-member trading activity across markets. We do, however, have several suggestions to improve the proposal. First, FINRA should compile a table (FINRA Table) that includes the preferred non-member identifier – whether an MPID, CRD, or some other identifier - to be relied upon by Reporting Members for identifying all non-member broker-dealers to OATS. FINRA should update the FINRA Table regularly and ensure it is readily available to all Reporting Members. Second, Reporting Members should only be required to report to OATS identifying information for non-member broker-dealers appearing on the FINRA Table. In other words, if a Reporting Member receives an order from a non-member broker-dealer that does not appear on the FINRA Table at the time of order receipt, the Reporting Member should not be required to provide any identifying information regarding the non-member broker-dealer to OATS. These revisions to the proposal will allow FINRA to perform appropriate cross-market surveillance while ensuring that Reporting Members identify non-members to FINRA in a consistent manner.

B. Reporting of additional order information by ATSS

FINRA is proposing to require ATSS that exceed a certain volume threshold¹ to report to FINRA through OATS 'additional order information' to supplement the order information ATSS currently report to OATS. FINRA noted that several data elements "are not required to be report to OATS, such as order re-pricing events (e.g., an order that is pegged to the National Best Bid or Offer) ... and [b]ecause these components of, or changes to, an ATSS order book are not reported, FINRA is not able to use existing OATS data to fully reconstruct an ATS order book for surveillance purposes." Under the proposal, an ATS would be required to report all events and order attributes that would change the ATS's system quantity (number of shares of an order, whether displayed or undisplayed, that can currently execute within the ATS), the displayed quantity, the highest (buy orders) or lowest (sell orders) price at which the order can currently execute within the ATS, and the displayed price for an order.

¹ The order reporting requirements would apply to any ATS that accounts for more than 0.25 percent of consolidated market share in any security over a one-month period.

One reason cited by FINRA in support of requiring additional information from ATSs is to allow FINRA to receive comparable information to the information it already receives from exchanges. While we applaud FINRA's efforts to better understand ATS operations, we believe this rationale reflects a fundamental misunderstanding about the meaningful differences between the operation of exchange matching engines and ATS matching engines. KCG believes that the proposal needs to be modified to recognize the real distinctions between exchanges and ATSs. Without such modifications, FINRA will be placing an undue burden on ATS operators to comply with a new requirement that provides FINRA with an enormous amount of supplemental data that will be of limited use towards FINRA's goal of reconstructing ATS order books for automated surveillance.

There are many examples of the differences between ATS and exchange operations, which are a result of markedly different business models and reflected in their respective matching engines. For example – unlike exchanges – ATSs do not necessarily re-price open orders with every movement in the market. While changes in the national best bid and offer (NBBO) impact the prices at which an ATS may potentially execute an order, these NBBO changes may not result in a re-pricing or other event. ATSs that do not display or route orders to other market centers may not re-price orders unless there is a contra-side order in the ATS, if at all. Also, an exchange must accept and execute all orders according to universal protocols based around price/time priority whereas an ATS may or may not use protocols based around price/time priority or may be designed to cater to certain preferences (order size, investor type, etc.). In addition, an ATS may allow for segmentation among subscribers, providing choice as to the types of counterparties with whom subscribers interact on the ATS based upon various categorizations (agency vs. principal; retail, institutional, electronic market maker; or based upon quantitative metrics such as liquidity profiles). As a result, ATSs may permit blocking and filtering among subscribers – such "opt-out" functionality is not permitted on exchanges – that may result in ATS orders that do not execute against what may appear to be otherwise available contra-side interest.

In addition to providing an incomplete view of ATS order books, KCG believes the proposal will manufacture a substantial number of additional new OATS records. On average, KCG currently generates and sends approximately 60 million OATS records

each day related to ATS activities. We estimate that implementation of the proposal will require us to generate and send anywhere from 15 to 30 times the amount of records we currently generate and send to OATS. Other ATS operators are also likely to face a similar surge in the volume of data they will need to generate and send to OATS. In addition, ATSs will also have to store this massive amount of new data to be generated by the additional records requirement. All of this will place a significant burden on ATS operators as they will be required to invest not only in substantial technology development time but also in ongoing hardware, storage and other infrastructure costs.

Currently, many ATS operators generate OATS reports by running an end-of-day batch process. The additional records requirement may necessitate that firms revamp their processes in order to meet their OATS reporting obligations. Specifically, the volume of new records that must be incorporated into ATS OATS workflows and may require the creation of real-time OATS generation process in order to meet this new requirement. The reason for the need to create real-time processes is largely due to existing time to process the overnight batch. Without significant modifications, batch processing times would likely exceed the requirements of delivery to FINRA by 8:00 AM on T+1, which will cause firms to experience breaks in OATS reporting.

KCG believes FINRA should meet with ATS operators and industry groups to discuss their operations with a view towards developing a standardized set of special handling codes to be used by ATS operators in OATS reports and which will account for opt-out features that result in otherwise executable contra-side orders not interacting.

* * *

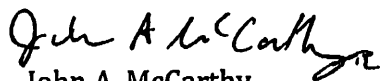

KCG recommends that FINRA consider our comments and suggestions and revise its proposal accordingly prior to filing it as a proposed rule change with the Commission.

III. Conclusion

KCG appreciates this opportunity to comment on FINRA Regulatory Notice 14-51. Please do not hesitate to contact me at 646-428-1615 if you have questions regarding any of the comments provided in this letter.

Sincerely,

John A. McCarthy
General Counsel

Re: Regulatory Notice 14-51; Equity Trading Initiatives: OATS and ATS reporting Requirements

Dear Ms. Asquith,

Liquidnet, Inc. (Liquidnet) appreciates the opportunity to comment on Regulatory Notice 14-51 (the Regulatory Notice) published by the Financial Industry Regulatory Authority (FINRA).

Liquidnet is a broker-dealer registered with the Securities and Exchange Commission (SEC) and a member of FINRA. Liquidnet operates two SEC-registered alternative trading systems (ATSs): the Liquidnet Negotiation ATS, which executes negotiated transactions; and the Liquidnet H2O ATS, which provides for automated execution of orders at the mid-point of the national best bid and offer (NBBO). All orders in the Liquidnet H2O ATS are pegged to the mid-point of the NBBO (mid-peg orders). Based on Rule 605 data filed with the SEC, during 2014 Liquidnet generated average price improvement of 93.90% for covered orders for the Liquidnet H2O ATS, as compared with 9.32% average price improvement for the industry as a whole.¹

Identification of non-member broker-dealers to OATS

FINRA proposes that a reporting FINRA member, when reporting through OATS an order received from a non-member broker-dealer, identify the non-member broker-dealer. FINRA provides that the identifier for the non-member broker-dealer would either be an existing SRO-assigned identifier, such as a market participant identifier (MPID), or the Central Registration Depository (CRD) number of the non-member broker-dealer.

Liquidnet will seek guidance from FINRA as to whether this requirement applies for orders received by Liquidnet from its non-US affiliates. These non-US affiliates are registered securities dealers in other jurisdictions. They do not have SRO-assigned identifiers or CRD numbers.

¹ Data available by subscription to VistaOne Regulatory Services.

Reporting of additional order information by ATSs

FINRA proposes to require ATSs that exceed a specified volume threshold to report additional order information to supplement the information currently reported to OATS. All Liquidnet ATS executions involve either a negotiation process or the execution of a mid-peg order. Liquidnet will seek guidance from FINRA as to how the proposed additional reporting requirements apply to negotiated and mid-peg orders and executions. For example, Liquidnet will seek guidance as to whether FINRA would consider a negotiated order to have a displayed quantity.

Liquidnet also requests clarification on the requirement to report order re-pricing events. As noted above, all orders in the Liquidnet H2O ATS are mid-peg orders. Having to report every time that the mid-peg price changes as a result of a change in the NBBO would create a significant reporting burden for Liquidnet; at the same time, this information would provide limited value to FINRA as FINRA already has access to NBBO data. Mid-peg orders that our customers submit always have an explicit limit price (or a limit price imputed by Liquidnet where the customer fails to indicate a limit price). In either case, Liquidnet reports this limit price to FINRA through OATS, along with any updates to the limit price, as instructed by the customer. A less onerous alternative would be to require that an ATS, in connection with reporting the execution of a mid-peg order, report the best bid and best offer prices that the ATS referenced to derive the execution price.

Effective date

There should be a sufficient time period between FINRA's publication of functional specifications for the new reporting requirements and effectiveness of the rule to enable Liquidnet and other ATSs to seek and obtain guidance from FINRA on the new reporting requirements.

Conclusion

Liquidnet appreciates the opportunity to comment on the rule proposals set forth in the Regulatory Notice. Please contact me at (646) 674-2044 if you would like clarification on any of our comments.

Very truly yours,

Howard Meyerson, General Counsel
