BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549-2736.

Extension:

Rule 602; SEC File No. 270-404; OMB Control No. 3235-0461.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (“PRA”) (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) is soliciting comments on the existing collection of information provided for in Rule 602 of Regulation NMS (17 CFR 240.602), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (“OMB”) for extension and approval.

Rule 602 of Regulation NMS, Dissemination of Quotations in NMS securities, contains two related collections. The first collection of information is found in Rule 602(a).¹ This third-party disclosure requirement obligates each national securities exchange and national securities association to make available to quotation vendors for dissemination to the public the best bid, best offer, and aggregate quotation size for each “subject security,” as defined under the Rule. The second collection of information is found in Rule 602(b).² This disclosure requirement obligates any exchange member and over-the-counter (“OTC”) market maker that is a “responsible broker or dealer,” as defined under the Rule, to communicate to an exchange or association its best

bids, best offers, and quotation sizes for subject securities.³

It is anticipated that twenty respondents, consisting of nineteen national securities exchanges and one national securities association, will collectively respond approximately 2,184,303,485,488 times per year pursuant to Rule 602(a) at 18.22 microseconds per response, resulting in a total annual burden of approximately 11,640 hours. It is anticipated that no respondents will have a reporting burden pursuant to Rule 602(b).⁴

Thus, the aggregate third-party disclosure burden under Rule 602 is 11,640 hours annually which is comprised of 11,640 hours relating to Rule 602(a) and 0 hours relating to Rule 602(b).

Written comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (b) the accuracy of the Commission’s estimate of the burden of the proposed collections of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of collections of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number. Please direct your written comments to: Pamela C. Dyson, Director/Chief Information Officer, Securities and

³ Under Rule 602(b)(5), electronic communications networks (“ECNs”) have the option of reporting to an exchange or association for public dissemination, on behalf of customers that are OTC market makers or exchange market makers, the best-priced orders and the full size for such orders entered by market makers on the ECN, to satisfy such market makers’ reporting obligation under Rule 602(b). Since this reporting requirement is an alternative method of meeting the market makers’ reporting obligation, and because it is directed to nine or fewer persons (ECNs), this collection of information is not subject to OMB review under the Paperwork Reduction Act (“PRA”).

⁴ For the reporting obligation under Rule 602(b), the respondents are exchange members and OTC market makers. The Commission believes that communication of quotations through an exchange’s electronic trading system effectively means that exchange members currently have no reporting burden under Rule 602(b) for these quotations. The Commission also believes that there are presently no OTC market makers that quote other than on an exchange.

Exchange Commission, c/o Remi Pavlik-Simon, 100 F Street NE., Washington, DC 20549, or by sending an email to: PRA_Mailbox@sec.gov.

Dated: September 2, 2016.

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78759; File No. SR-FINRA-2016-024]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Order Granting Approval of Proposed Rule Change To Create an Academic Corporate Bond TRACE Data Product

September 2, 2016.

I. Introduction

On June 28, 2016, the Financial Industry Regulatory Authority, Inc. (“FINRA”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b-4 thereunder, ² a proposed rule change to amend FINRA Rule 7730 to create a new data product consisting of data on historic transactions in corporate bonds reported to the Trade Reporting and Compliance Engine (“TRACE”) that would be available to institutions of higher learning (the “Academic Corporate Bond TRACE Data product”). The proposed rule change was published for comment in the **Federal Register** on July 7, 2016. ³ The Commission received three comments in response to the proposal. ⁴ On August 9, 2016, FINRA extended to September 2, 2016, the time period within which the Commission shall approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change

² 17 CFR 242.602(b).

should be disapproved.⁵ FINRA responded to the comments on August 23, 2016.⁶ This order grants approval of the proposed rule change.

II. Description of the Proposed Rule Change

FINRA has proposed to make available to institutions of higher learning a new Academic Corporate Bond TRACE Data product that would contain transaction-level data on historic transactions in corporate bonds and would include masked counterparty information. Currently, FINRA makes publicly available real-time data in TRACE-eligible securities and a Historic TRACE Data product that provides transaction-level data, on an 18-month delayed basis, without any counterparty information.⁷

In the Notice, FINRA stated that academic researchers cannot use the existing Historic TRACE Data product to track the behavior of an individual dealer or group of dealers due to the lack of any counterparty information. FINRA stated that this proposal responds to requests from academics for FINRA to make available an enhanced data product that includes counterparty identification.⁸ FINRA has represented that establishing a new TRACE data product with masked counterparty identifiers could allow academic researchers to track activity in a variety of ways, including by individual dealer or by groups of dealers, and could facilitate the ability of academic researchers to study the impact of various events on measures such as intermediation costs, dealer participation, and liquidity.⁹

The proposal would amend FINRA Rule 7730 to create a new Academic Corporate Bond TRACE Data product consisting of historic transaction-level data on all transactions in corporate bonds reported to TRACE, including Rule 144A transactions in corporate bonds but not including transactions that are List or Fixed Offering Price Transactions¹⁰ or Takedown

Transactions.¹¹ FINRA noted that the existing Historic TRACE Data product also does not include List or Fixed Offering Price Transactions or Takedown Transactions. Under the proposal, a transaction included in the Academic Corporate Bond TRACE Data product would be aged at least 36 months before being incorporated into the dataset. Each such transaction would not include any MPIDs, but would instead include a masked dealer identifier.¹²

The Academic Corporate Bond TRACE Data product would be available only to institutions of higher education.¹³ Any institution of higher education subscribing to the product would be required to agree: (1) Not to attempt to reverse-engineer the identity of any market participant; (2) not to redistribute the data; (3) to disclose each intended use of the data (including a description of each study being performed and the names of each individual who will have access to the data for the study); (4) to ensure that any data presented in work product be sufficiently aggregated to prevent reverse engineering of any dealer or transaction; and (5) to return or destroy the data if the agreement is terminated.¹⁴

FINRA stated that it would announce the effective date of the proposed rule change in a *Regulatory Notice* to be published no later than 90 days following Commission approval, and that the effective date would be no later than 270 days following publication of that *Regulatory Notice*.¹⁵ In addition, FINRA stated that it plans to file a separate proposed rule change to

sale transaction sold on the first day of trading of a security, excluding a Securitized Product as defined in FINRA Rule 6710(m) other than an Asset-Backed Security as defined in FINRA Rule 6710(cc): (i) By a sole underwriter, syndicate manager, syndicate member, or selling group member at the published or stated list or fixed offering price; or (ii) in the case of a primary market sale transaction effected pursuant to Securities Act Rule 144A, by an initial purchaser, syndicate manager, syndicate member, or selling group member at the published or stated fixed offering price.

¹¹ FINRA Rule 6710(r) defines “Takedown Transaction” as a primary market sale transaction sold on the first day of trading of a security, excluding a Securitized Product other than an Asset-Backed Security: (i) By a sole underwriter or syndicate manager to a syndicate or selling group member at a discount from the published or stated list or fixed offering price; or (ii) in the case of a primary market sale transaction effected pursuant to Securities Act Rule 144A, by an initial purchaser or syndicate manager to a syndicate or selling group member at a discount from the published or stated fixed offering price.

¹⁵ See *id.* at 44360.

address market data fees for the Academic Corporate Bond TRACE Data product before the effective date of this proposal.¹⁶

III. Summary of Comments and FINRA’s Response

The Commission received three comments on the proposed rule change¹⁷ and a response letter from FINRA.¹⁸ Two commenters generally supported the proposal. One of these commenters, an academic researcher, stated that, “[t]o study the impact of banking regulation on bond dealers, it is necessary to obtain information on the identity of dealers associated with each transaction. The Historic TRACE data product does not contain this information.”¹⁹ The commenter pointed to the masked dealer identifier information in the new proposed product as a significant advantage over the Historic TRACE Data product, and stated that he “expect[s] that FINRA’s new Academic data initiative will lead to an explosion in academic research on corporate bonds and provide new insights on the functioning of the bond market.”²⁰

A second commenter, while generally supportive of the proposal, expressed the view that FINRA could make modifications to provide additional protections against the potential for reverse engineering the data without impeding its goals of promoting academic access and research.²¹ This commenter stated that the potential impact of reverse engineering could include deciphering a dealer’s trading strategies and revealing confidential business information relating to specific client transactions.²²

A third commenter opposed the proposal, arguing that it would expose dealers and their customers to unnecessary risks.²³ The commenter stated, for example, that “[i]t is very likely that, as a consequence of this proposal, private and non-educational entities will end up possessing full trade history including dealer names for every trade released.”²⁴

The two industry commenters offered differing views on aspects of the proposal that FINRA designed to reduce the risk of reverse engineering specific dealer identities. The second commenter thought that limiting the

⁸ See Notice, 81 FR at 44359.

⁹ See *id.*

¹⁰ FINRA Rule 6710(q) defines “List or Fixed Offering Price Transaction” as a primary market

scope of the data product to transactions in corporate bonds, including Rule 144A transactions but excluding information on List or Fixed Offering Price Transactions or Takedown Transactions, would mitigate the risk of reverse engineering.²⁵ The second commenter also acknowledged that the proposal's aging period of 36 months (expanded from 24 months in an earlier iteration) would help reduce the risk of reverse engineering, but thought that an aging period of no less than 48 months would be more appropriate.²⁶ The third commenter supported the exclusion of List or Fixed Offering Price Transactions from the scope of the proposal and acknowledged that expanding the aging period and masking dealer identities would make reverse engineering more difficult, but expressed the view that these measures were not sufficient to reduce the risk of reverse engineering to an acceptable level.²⁷

In addition, the two industry commenters suggested that FINRA make the transaction data available according to groupings of comparable dealers, instead of on an individual dealer level, arguing that masked dealer identifiers might not effectively protect their identities.²⁸ The academic commenter, who supported the proposal without modification, objected to this suggestion of the other commenters and argued that providing the data by pre-set groupings could stifle academic research. This commenter explained that individual dealer-level data would allow academic researchers to maintain needed flexibility to construct samples of dealers in a manner best suited to their specific research question.²⁹

The two industry commenters also offered suggestions regarding strengthening and enforcing the proposed user agreements. The second commenter urged FINRA to develop "robust operational frameworks around the execution and ongoing oversight of user agreements . . . [in order to] further mitigate concerns of reverse engineering and information leakage."³⁰ The third commenter stated that,

although the proposed user agreements are designed to prevent redistribution of the data, federal and state Freedom of Information Act ("FOIA") laws could defeat such intention if the transaction data is held by a public university and classified as a public record.³¹ This commenter also raised concerns about data security, suggesting that the data could be subject to hacking or data theft during transmission or when held by an institution of higher education.³²

In its response to these comments, FINRA stated that it "continues to believe that the instant proposal strikes the appropriate balance between addressing risks regarding potential reverse engineering with facilitating the ability of academic researchers to study the market for corporate bonds."³³ FINRA explained that it made significant changes to an earlier iteration of the proposal, including limiting the scope of the proposed data product to corporate bonds. In FINRA's view, transaction data on corporate bonds does not present a high risk of accurate reverse engineering because generally these bonds are traded by a greater number of dealers.³⁴ FINRA also noted that it raised the minimum age of included transactions from 24 months to 36 months. FINRA expressed its belief that the "totality of the measures" included in this proposal adequately address the commenters' concerns.³⁵ FINRA also stated that the user agreements will include provisions geared towards data security and designed to limit the risk of public disclosure due to federal or state FOIA requests. FINRA noted that it will utilize its existing processes to oversee user agreements. FINRA further explained that it will monitor use of the Academic Corporate Bond TRACE Data product and may consider amending or discontinuing the product if it finds that academics are reverse engineering the data.³⁶

Finally, although one commenter suggested expanding the user group for Academic Corporate Bond TRACE Data to other non-profit organizations engaged in research activities,³⁷ FINRA responded that "in light of the sensitivities" surrounding making transaction-level data available, even with masked dealer identifiers, "FINRA

believes it is appropriate to restrict the availability of Academic Corporate Bond TRACE Data to institutions of higher education at this time."³⁸

IV. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association.³⁹ In particular, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Act,⁴⁰ which requires, among other things, that FINRA's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

The Commission believes that establishing the Academic Corporate Bond TRACE Data product in the manner described in the proposal is reasonable and consistent with the Act. The Commission does not believe that the commenters have raised any issue that would preclude approval of the proposal at this time. The proposal appears reasonably designed to minimize the possibility that the product might reveal the identities or trading strategies of particular market participants. FINRA has limited the scope of the data product to include only transactions in corporate bonds, will mask counterparty identities, is requiring transaction data to be aged 36 months prior to inclusion, and will require subscribers to execute a user agreement imposing restrictions on use of the data. The required user agreements appear reasonably designed to limit information leakage while providing institutions of higher education a potentially important new tool to analyze concerns about bond market liquidity.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,⁴¹ that the proposed rule change (SR-FINRA-2016-024) be, and hereby is, approved.

³⁸ FINRA Response Letter at 3. FINRA noted that non-academic institutions may still subscribe to Historic TRACE Data, which includes transaction-level data without dealer-level information. *See id.*

³⁹ In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

⁴⁰ 15 U.S.C. 78o-3(b)(6).

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-78746; File No. SR-BatsBZX-2016-52]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Delay the Implementation of Amendments to the Options Regulatory Fee

September 1, 2016.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 22, 2016, Bats BZX Exchange, Inc. (the “Exchange” or “BZX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to delay implementation of recently enacted amendments to the fee schedule applicable to Members⁵ and non-Members of the Exchange pursuant to BZX Rules 15.1(a) and (c) regarding its Options Regulatory Fee (“ORF”).

The text of the proposed rule change is available at the Exchange’s Web site at www.batstrading.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange recently submitted a proposed rule change to modify the fee schedule applicable to the Exchange’s options platform (“BZX Options”) to decrease ORF from \$0.0010 per contract side to \$0.0008 per contract.⁶ The Exchange also proposed to expand the application of the per-contract ORF to each Member and non-Member for all options transactions cleared by OCC in the “customer” range, regardless of the exchange on which the transaction occurs. In order to provide market participants additional time to assess the impact of these changes to ORF on their transactions and order execution scenarios, the Exchange is delaying the implementation date of the fee until February 1, 2017.⁷

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of section 6 of the Act.⁸ The Exchange also believes that its proposal furthers the objectives of

⁶ See Securities Exchange Release No. 78453 (August 1, 2016), 81 FR 51954 (August 5, 2016) (SR-BatsBZX-2016-42).

⁷ The Exchange notes that its fee schedule states that it may only increase or decrease the ORF semi-annually, and any such fee change will be effective on the first business day of February or August. See the Exchange’s fee schedule available at http://batstrading.com/support/fee_schedule/bzx/ (dated August 1, 2016). The Exchange initially filed the proposed fee change on August 11, 2016 (SR-BatsBZX-2016-49). On August 19, 2016, the Exchange withdrew SR-BatsBZX-2016-49 and submitted SR-BatsBZX-2016-51. On August 22, 2016, the Exchange withdrew SR-BatsBZX-2016-51 and submitted this filing.

⁸ 15 U.S.C. 78f.

section 6(b)(5) of the Act⁹ in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes delaying the implementation of ORF will provide market participants additional time to assess the impact of the ORF on their transactions and order execution scenarios, and that implementation of the fee on February 1, 2017 will benefit investors and the public interest.¹⁰

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The ORF is not intended to have any impact on competition. Rather, it is designed to enable the Exchange to recover a material portion of the Exchange’s cost related to its regulatory activities. Therefore, the Exchange does not believe delaying the implantation of ORF till February 1, 2017 will have any impact on competition.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act¹¹ and paragraph (f) of Rule 19b-4 thereunder.¹² At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if

⁹ 15 U.S.C. 78f(b)(5).

¹⁰ The Exchange notes that other exchanges have delayed the implementation of fees that were previously published by the Commission. See Securities Exchange Act Release Nos. 72605 (July 14, 2014), 79 FR 42066 (July 18, 2014) (SR-Phlx-2014-44); 67068 (May 29, 2012), 77 FR 33256 (June 5, 2012) (SR-Nasdaq-2012-064); 66287 (February 1, 2012), 77 FR 6161 (February 7, 2012) (SR-FINRA-2012-008); and 57183 (January 22, 2008), 73 FR 5249 (January 29, 2008) (SR-Nasdaq-2008-007).
